Land Purchase

Information for purchasers and lessors of arable land

AGRARIUS AG specialises in purchasing and leasing large areas of arable land in Romania. There is also the possibility of selling areas of arable land to AGRARIUS and leasing them back (Sale & Lease Back). We are a reliable partner for farmers – we are interested in long term leasing contracts.

It also offers institutional investors the acquisition and management of areas of arable land in the Agricultural Investment Services business area.

To extend the areas of land we manage in Western Romania we are looking for attractive areas of arable land with ...

- quality of soil and location inspected
- good transport links
- buildings sometimes

You may send us an offer. We would ask you to let us have the questionnaire for sellers and lessors of arable land so that we can check your offer. We look forward to you contacting us.

Questionnaire for sellers and lessors of arable land in Romania (EN, pdf, 131 kB)
