About Granjas Marinas

Grupo Granjas Marinas S.A (GGM) is a Honduran company engaged in the production of Pacific white shrimp (Litopeneaus vannamei). Our operations is vertically integrated, beginning with the production of seed (larvae) in our laboratory,and includes grow-out in ponds, harvest and processing, culminating in the marketing of our products to international markets.

We have operated in the Honduran area of the Gulf of Fonseca, for 39 years. We respect all legal requirements of shrimp production in a sustainable manner while showing respect to our neighbors and their environments.

Our management supports education, health, community self-management and infrastructure development efforts in local communities. Our human capital consists of 1,900 employees who enjoy fair working conditions and safe access to training and educational development.
