How to grow top quality melons? Senegal's melon story reveals the secrets of success in Africa for producing and then shipping delicious fruits to Europe. French fruit company Soldive has brought great benefits to the local farming community and they share how their lives have improved.

This film was made with support of the UK Department for International Development (DFID) through their Food Retail Industry Challenge (FRICH) Fund as part of a project with Waitrose, LEAF (Linking Environment and Farming), Green Shoots Productions and suppliers of African fresh produce to Europe - Blue Skies, British and Brazilian, Sunripe and Wealmoor.
