Wide range of registered types of economic activities	🚨 Total number of types of economic activities is 48	Today
---	--	-------

Only declaring types of economic activities that are too generic and not industry specific may indicate that the company doesn't aim at achieving real business results and may be a sign of its fictitiousness.

Court decisions related to a contractor	🚨 Number of court cases against the company within the last three years 48 Number of criminal cases against the company within the last three years 45 Number of court cases within the last three years 120	16.12.2020
---	--	------------

It is crucial to study the jurisprudence of the contractor, as it may contain facts established by the court, in particular regarding: the commission or involvement in the commission of offenses by him, his officials and/or related persons; termination or bankruptcy proceedings; invalidation of transactions (including due to fictitiousness); the presence of debt (including tax debt); other circumstances that indicate possible business risks.

Mentioning a legal entity in court decisions does not necessarily point on its status of the participant of the case/proceeding (criminal, administrative, civil, economic). For a clearer picture of the status and details of the legal entity participation in the relevant court case/proceedings, you need to study the court decisions.

Connection with a bankrupt company	🚨 The counterparty has a connection with a bankrupt company. Quantity of connections: 4	Today
------------------------------------	---	-------

Bankruptcy is a debtor's inability, adjudicated by economic court, to restore its solvency and satisfy creditors' adjudicated claims other than through liquidation proceedings. Partnership with a counterparty related to a bankrupt company (have a common top executive and/or members with decisive influence) needs due care, as it is likely that such counterparty's business model may be not working either, consequently leading to negative financial repercussions.
