## Project/Jurisdiction Partners

Name	Website	Location of headquarters	Organization type
Government of Uganda	ND	Uganda	Public

## Project characteristics

**ID-RECCO ID**

420

**Project status 2022**

Ongoing

**Project name**

Namwasa Central Forest Reserve Reforestation Initiative

**Secondary name**

**Country**

Uganda

**Last IDRECCO update year**

2020

**Size (in hectare)**

2481

**Start year**

ND

**End year**

2024

**Duration**

20

**Project description**

The project is supposedly "Uganda's largest sustainable plantation forestry operation". Through a licensing agreement, NFC has committed to a minimum 50 years of forestry activities in the reserve, with operations certified to the Forest Stewardship Council's ten principles. NFC was certified to FSC in May of 2009. The company plants trees and harvests timber destined for sawlog production, pole treatment and other value-added wood products.

**Objective 1**

timber production

**Objective 2**

return on investment

### Objective 3

biodiversity conservation

#### Deforestation drivers

cattle grazing, fire, industrial wood exploitation,  
Natural Disaster, slash and burn agriculture

#### Type of forest

dry

#### Project activity

ARR

#### Project Type

ARR

#### Details for Afforestation/Reforestation activity

ecosystem restoration

#### Multiple locations?

No

#### Jurisdiction level 1

Region: Central

#### Jurisdiction level 2

District : Mubende

### Carbon accounting

#### Crediting period

2005-2025

#### Period to calculate annual carbon credits

#### Annual carbon credits

#### Total carbon credits

226563

#### Leakage is expected?

no

#### Carbon pools included

Above ground biomass | Below ground biomass

#### Gasses included

CO2
