The administrator of PT SJA Unari Samidi said the MoU with the cooperative and the Singkona Village Government was the sixth MoU on plasma. Because previously PT SJA also made an MoU with Tiu, Petiro, Matialemba and Olumokunde Villages in East Pamona District and Salindu Village in Southeast Pamona District.

"Apart from being mandated by law through the Minister of Agriculture Regulation Number 26 of 2007, this MoU on plasma is also a form of the company's commitment to the company's surrounding communities to return 20 percent of the concession area to the community in the company's surrounding area," he explained.

Based on the area of land included in the Singkona Village land concession, said Unari, the community has the right to a concession area of 155 hectares.

It's just that, he continued, there are criteria that must be met by the community, including the community must return the production costs built by the company in installments. This is because plasma plantations will be managed in an operator system by the company. "However, every month we will continue to provide the community's rights as a form of company commitment that we set forth in this MoU," he said.

Still said Unari, even though the MoU had just been carried out, the community's rights from plasma plantations had been calculated since the oil palm plantations began production in January 2019. "If calculated, the amount of material that is the right of the community to date is Rp524,265 million. And

"As long as it can advance the region and improve the people's economy, then we will certainly provide positive support," he said.

Head of Pamona Tenggara Subdistrict, MD Wololi, said that the steps taken by the company to sign an MoU with cooperatives and the village government were a form of partnership which essentially leads to improving the welfare of the local community. **ULY**
