• Community

Boikanyo Solar is focused on empowering and strengthening the local communities in and around the Siyancuma Local Municipality area in the Northern Cape Province, namely Douglas, Bongani and Breipaal.

The aim is to empower and build capacity of targeted communities through the funding of various socio-economic development (SED) and Enterprise Development (EnD) programmes that positively address local skills gaps and needs, and to empower the communities to be economically independent and take ownership of their future.

The approach is characterised by continuous engagement, the sharing of knowledge and experiences, and a focus on relevance and practicality of projects supported. All of Boikanyo Solar's local economic development programmes are results and impact-driven; designed to be sustainable and make a lasting difference in communities within which the company operates.

The beneficiary communities will benefit directly from the economic development programmes, for the duration of the solar plant's twenty-year operation period, in accordance with the plant operating agreement.

SED FLAGSHIP PROJECTS

The focus of Boikanyo Solar's Socio-Economic Development (SED) Projects will be on Education, Youth Development, Health, Enterprise Development, Food Security and Welfare.

Following research and engagement, programmes are well informed and address Priority Needs of the Siyancuma Local Municipality, namely: poor Educational system; Health infrastructure improvement requirements; Up-skilling Youth and youth development; Agriculture and agro-processing support; and Infrastructure upgrading.
