Digos Solar Power Plant

A28.6MW Solar Photovoltaic Power Plant seated in a 30-hectare land farm located in Barangay San Roque, Digos City, Davao del Sur, contracted by clients Sterling & Wilson and Enfinity.

The scope of the work includes, but is not limited to, supply, erection, erection, installation & commissioning, civil works, five year warranty and five years Latent Defect Liability after warranty period for the total solution, including supplied materials, services and support, among others.

The work scope also includes securing all required and necessary statutory approvals, clearances and work permits from local authorities, the labor department and other government agencies for execution of civil, electrical and mechanical works and construction.

As of October 2016, the project is 100% completed.
