South African renewable energy independent power producer, BioTherm Energy, has rebranded to [BTE Renewables](#), the company announced this week. The rebranding comes after BTE

company announced this week. The rebranding comes after BTE Renewables successfully brought online four renewable energy IPP projects over the past year, a great feat considering the slow-down effect of the COVID-19 pandemic.

The company is majority owned by Actis, a leading global emerging markets investment firm focused on the private equity, energy, infrastructure, and real estate asset classes.

“We have officially rebranded from BioTherm Energy to BTE Renewables – a re-brand that stands as an acknowledgment of our successes of the past with a clear focus on the future,” the company announced in a LinkedIn post.

BTE Renewables has a renewable energy portfolio that extends across South Africa’s borders into Kenya where its fifth renewable energy asset was connected to the grid in January of this year.

Thebe Investment Corporation (TIC), has a 37.5% stake in four of BTE Renewables’s projects in South Africa.

The renewable energy developer’s 100MW Kipeto Wind farm in the southwest of Nairobi, Kenya is the East African country’s second largest wind farm.
