Salamat sa maagang pamaskong handog ng # Petrowind Energy Incorporated # MEA Management Engineering Association # libreng gamot para sa mga senior citizen ng pawa # reading materials for the pupils of pawa primary school

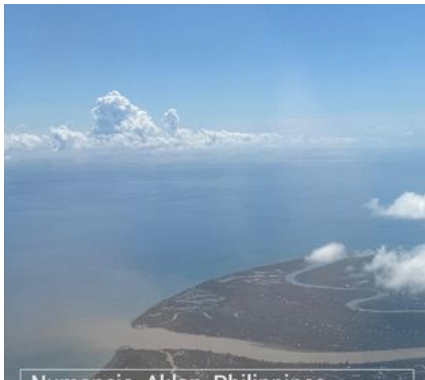

sincere thanks to the active stakeholders who never failed in extending their generosity to Pawa Primary School and Community. We are giving our sincere thanks to Petrowind Energy Inc. for donating construction materials, covid supplies, and free labor for the partition of kindergarten classroom, sneeze guard and etc. We are so very grateful for your help More Power and God bless 🙏 #parasabataparasabayan

KUNG TUNAY NGA NA LAHAT NG HOTELS SA BORACAY ARE SUPPLIED WITH WATER BY THE TWO CONCESSIONAIRES AND THESE TWO TAKES WATER ONLY FROM NABAJOY, DAPAT ANG MGA TUBIG NA LUMALABAS SA TAP, SHOWERS, POOLS NG MGA HOTLES NA ITO SHOULD REFLECT THE WATER FACIES OF THE NABAJOY WATER DIBA? DAPAT CHEMICALLY AND ISOTOPICALLY SIMILAR SA NABAJOY, KASI KUNG DOON KINUHA EH. EH BAKIT MAY MGA ESTBLISHMENTS AKO NAPUNTAHAN SA STATION ZERO , TDS AY 365??? SAAN NYO KINUHA ANG WATER NYO NA YAN? IBIG SABIHIN MAY MGA UNDECLARED WELLS ABTRACTING GROUNDWATER NA HINDI ALAM NG NWRB. TAMA? If it's true that all hotels in Boracay are supplied with water by the two concessionaires, and these two take water only from Naboy, shouldn't the water coming out of the taps, showers, and pools of these hotels reflect the water characteristics of Naboy water, right? It should be chemically and isotopically similar to Naboy, because that's where it's sourced from. So why do some establishments I visited at Station Zero have a TDS (Total Dissolved Solids) of 365??? Where did you get that water from? Does it

The areas of Torralba, Malinao, and Batan experienced flood due to heavy rains brought by the LPA near Palawan and Tail- end of frontal system affecting South Luzon.

Vehicles were stuck near bridges as Aklan River spilled on nearby barangays, meanwhile LGU's and their MDDRMO's are on high alert in preparation for evacuating residents and emergency situations.

PetroWind in the news

PetroWind's Nabas wind farm Phase 2 now supplies power to Panay! Congratulations to our PetroWind team! 🌱👍

This is PetroGreen's sixth renewable energy unit and second wind energy facility.

"According to Energy Secretary Raphael P. M. Lotilla, the Nabas 2 wind farm "is the newest power station added to the system since the January 2, 2024 grid blackout" – in reference to that traumatizing incident which had not only caused extreme inconvenience to consumers in the area, but also resulted in economic losses to many of their industries and commercial establishments."

Nabas Wind Farm spotted 📍

ATM: helping alleviate the power shortage in Panay.

[#NabasWindFarmPhase2](#)

As of this advisory, 89MW is being served by Panay power plants, augmented by 18MW from sources elsewhere in the Visayas, for a total of 107MW or 13.3% served loads. We reiterate that load restoration will be done conservatively, by matching loads to restored generation, to prevent repeated voltage failure.

Plants - Capacity - Actual - %

PEDC U1	- 83	- 0	- 0%
PEDC U2	- 83	- 8.2	- 9.9%
PEDC U3	- 150	- 0	- 0%
PCPC	- 135	- 0	- 0%
VILLASIGA	- 8	- 0	- 0%
NABAS WIND	- 36	- 9.4	- 26.1%
TAREC WIND	- 54	- 9	- 16.7%
GLOBAL	- 6.4	- 6.4	- 100%
PDPP1	- 15	- 13.8	- 92%
PDPP3	- 50	- 11.9	- 23.8%
PB101	- 24	- 22.3	- 92.9%
CASA	- 8	- 8	- 100%
TIMBA	- 18.9	- 0	- 0%

At 9:53PM, 01 March, PEDC Unit 2 (83MW) was synchronized

The Nabas Wind Farm offers new ecotourism and livelihood opportunities for the local commu

Nabas Wind Farm

Selrome Napolitano mam saan po yung pambobola? NGCP na po mismo nagsabi na kumukuha sila ng power sa wind farm para punan ang kulang na kuryente kasi may nasirang isang planta.
