Project description	The prize winning Kikonda Forestation project lies in the heart of East Africa comprising 120 km ² and employing more than 200 people. It is the first in the country to be granted CarbonFix certification for its one-of-a-kind positive social and ecological impact. By 2008 more than 1 million trees had been planted on an area equivalent to approximately 2 000 soccer fields which will store more than 200 000 tonnes of CO ₂ . Through this project, more than 200 people have not only found jobs, but also benefited from additional services provided by the project developer, such as the provision of housing, medical care or the support of local schools. Furthermore, the project has initiated a program to train people of neighbouring villages in tree-planting. Thereby over 300 families have been reached, planting an additional 200 000 trees in the surrounding area of the project. To protect rare species and regenerate natural habitats the project has set aside over 20% of its area for conservation purposes. A team of forestry and business experts from Germany, Uganda and South Africa ensures that the project is managed on the highest professional level. The project received in 2006 and 2008 the sought after Ugandan 'Best Planter Award'. The project has also earned FSC certification.
Objective 1	timber production
Objective 2	climate
Objective 3	social development
Deforestation drivers	cattle grazing;charcoal production;local livelihoods;slash and burn agriculture
Type of forest	dry and humid

Project Type	ARR
Details for Afforestation/Reforestation projects	plantation
Project located in an official IUCN protected area	yes
Dominant type	ARR
Country ID	800
Country	
Name of the protected area	Kikonda Forest Reserve
Category of protected area (IUCN classification)	ND
Status	Ended
Multiple location?	No
Region	Africa
Jurisdiction level 1	Region: Central
Jurisdiction level 2	District : Kiboga
Longitude	31.376406
Latitude	1.100768
