

# Mott MacDonald advises on Malaysian solar plant

4 March 2019 / Global

Mott MacDonald has provided a range of services to help bring the Redsol power plant, a US\$47m solar project in northwest Malaysia, to a financial close.

Acting as technical advisor to Scatec Solar and its partners on the 47 MW photovoltaic plant, Mott performed technical due diligence and provided support to assist the financing, including reviewing the project's design, contracts, environmental and social outputs, financial model, construction and operation arrangements and energy yield.

Located in Perak, the plant will generate enough electricity to power 20,000 homes in Malaysia. Construction began in late 2018, with the plant due to come into operation at the end of this year.

Malaysia is targeting 20% electricity generation from renewable energy sources - from around 2% currently - within seven years.
