OVERVIEW

Edra Power Holdings Sdn Bhd (“Edra”) is one of South East Asia’s leading international independent power producers, controlling a diversified portfolio of quality power generation assets across a range of technologies.

We have a portfolio of 10 power and desalination plants in five countries, with a gross installed capacity under management of 6,579.5 MW and an effective capacity of 5,932.5 MW.

On 23 March 2016, Edra became a subsidiary of China General Nuclear Power Corporation (“CGN”) following the successful acquisition of the Edra Group operating companies and its subsidiaries. Following the acquisition, Edra Power Holdings Sdn Bhd became the new holding company for these operating companies comprising of Edra Solar Sdn Bhd, Edra Energy Sdn Bhd, Powertek Energy Sdn Bhd, Jimah Teknik Sdn Bhd, Jimah O&M Sdn Bhd and Tiara Tanah Sdn Bhd.

Edra was originally formed in 2014 from the consolidation of three major IPPs in Malaysia, Powertek Energy Group, KLPP Group and Jimah Energy Group, each with an impressive history of over 20 years in the development, operation and maintenance of power plants.

Edra is led by experienced management teams with deep industry knowledge, expertise and established track records, which are further supported by strategic partnerships with reputable global players.

We maintain a strong focus on our existing markets of Malaysia, Egypt, Bangladesh, UAE and Pakistan, as well as emerging markets in South East Asia, the Middle East and North Africa. Our geographic diversity and market leading positions in multiple countries are strategically advantageous to capture growth in fast-developing economies.

We are looking forward to further expansion opportunities in the markets where we already have a strong foothold as well as in new areas. We will explore new mixes of fuels together with potential related infrastructure such as gasification or regasification plants.

In Bangladesh, we currently have one growth project in the pipeline, which is a 660 MW CCGT power plant.
