Today, guests from Norway paid a friendly visit to our community - the head of the community of Rode, a representative of the Norwegian Parliament, Rene Rafshol, and a business representative, the owner of Kolos Polissya LLC and UKR AGRO RT LLC Roar Paulerud. The guests were interested in the main questions of life in our small community, to which they received comprehensive answers. In turn, we were interested in learning about the functioning of local self-government in Norwegian communities. There was an introduction to the main facilities of the social infrastructure: the local fire brigade, a lyceum and a medical clinic. The visit showed the interest of both sides in establishing further cooperation and exchange of work experience. The first steps towards international cooperation have been taken!
