

PetroWind wins top award for CSR in education; MGI & PetroSolar recognized for social development projects

July 1, 2024

MGI, PWEI, and PSC representatives during the 2024 LCF Awarding Ceremony last July 5, 2024 in Makati City.

(From L-R: MGI Business Support Manager Lea Camelia D. Fernandez, MGI ComRel Associate Maria Samantha Jay D. Rey, MGI Environment and ComRel Officer Carina P. Buduan, PSC ComRel & Admin Coordinator Bryan S. Pajanonot, and PSC Operations Supervisor Engr. John Paul de Jesus Luna)

Yuchengco-led PetroGreen Energy Corporation's (PGEC) operating units, PetroWind Energy Inc. (PWEI), Maibarara Geothermal, Inc. (MGI), and PetroSolar Corporation (PSC) were recognized for their Corporate Social Responsibility projects in the 2024 LCF Awards organized by the League of Corporate Foundations (LCF). The awarding ceremony was held last July 5, 2024 in Glorietta Activity Center, Makati City. The LCF's CSR Award acknowledges outstanding CSR projects and collaborations in the country promoting meaningful and sustainable impact to communities.

PetroWind won the top award with Medal of Recognition in the education category for its *Basic Education Support through Technology (BEST) Project*. This program equips public schools with essential technology and resources to foster more accessible and engaging learning environment for students. PWEI was also recognized for its *Ridge-to-River Rehabilitation and Restoration (R4) Program*, a comprehensive approach to environmental protection and rehabilitation in its 50MW Nabas Wind Power Project located in the municipalities of Nabas and Malay in Aklan.

In addition, PSC and MGI were recognized for their outstanding contributions to sustainability and social development through health, education, and environment projects. PSC was named a finalist in the health category for its *Petrobibo Program*, aimed at providing nutritious meals to malnourished and underprivileged children in Tarlac.

MGI was also among the finalists for two of its initiatives in education – the *Basic Education Support Technology (BEST) Program* and *Waste-to-Ecobrick Project* in Batangas and Laguna. MGI's BEST program benefitted all Grade 1 students of Puting Lupa Elementary School in Calamba, Laguna through MGI's donation of smart tablets with reading and writing lessons and exercises. On the other hand, its *Waste-to-Ecobrick Project* is an initiative aimed at promoting proper waste management in partner schools and communities. The plastic waste collected by students and community members are used to produce bricks which later on serve as construction materials for pavements and walkways in MGI's partner schools.

These awards testify to PGEC's unwavering commitment to social development and community empowerment in areas where it operates. PGEC is the RE holding unit of publicly-listed company PetroEnergy Resources Corporation (PERC).
