Regent Seruyan Yulhaidir (center) chairing a meeting to evaluate PT Tapian Nadenggan permits, in Kuala Pemburan, (22/8/2022). ANTARA/Radianor.

Kuala Pemburan, Seruyan (ANTARA) - The Seruyan Regency Government Team, Central Kalimantan, together with the Regional Leadership Coordination Forum (Forkopimda) and the National Land Agency (BPN) since, have submitted the results of a meeting decision in the form of minutes regarding PT Tapian Nadenggan's obligation to implement a 20 percent plasma of land area according to the decree of the Minister of Environment and Forestry (LHK).

"The minutes submitted were based on the Minister of Environment and Forestry Decree Number 19/Kpts-II/2001 dated January 30 2001 and the Minister of Environment and Forestry Decree Number SK.486/MENLHK/SETJEN/PLA.2/9/2017 PT Tapian Nadenggan," said the Regent of Seruyan Yulhaidir in Kuala Pemburan, Thursday.

It is said, in the minutes of the event, PT Tapian Nadenggan was given seven days from the receipt of the minutes, namely August

22, 2022, to carry out the obligations as stated in the minutes of evaluation of PT Tapian Nadenggan's business licensing made on August 10, 2022.

Yulhaidir hopes that PT Tapian Nadenggan will immediately realize its obligations to the surrounding community, because this is indeed aimed at improving the welfare of the people in Seruyan in particular. To make it happen, of course, it must be supported by all parties.

"This is the obligation of the company, especially as it has also been stated in the ministerial decree, that's why we ask that this be realized quickly, because this problem has been around for a very long time," he said.

. Yulhaidir, who is also chairman of the Indonesian Palm Oil Producing District Association (AKPSI), added that in 2001 the central government released 11,860 hectares for the oil palm plantation of PT Lestari Unggul Jaya, which was then taken over by PT Tapian Nadenggan and stated that the obligation to provide 20 percent of the shares released.

Then in 2017 another 1,735.91 hectares were released. The company's obligation to provide plasma is 20 percent of what is released.

"If this can be realized for the community, of course the community around the company will be more prosperous and their economy will also improve," said Yulhaidir.
