## Sivac: Sheikhs took experts

Z. Rajić

February 10, 2015 at 3:00 p.m.

**Agrokombinat "Bačka" is dissatisfied with the selection of employees who moved to "Al Ravafed". In the rest of the company, there is no one to start production on the remaining 1,451 hectares**

Workers who have not moved to a new company fear for their jobs

SIVAC - The Arab company "Al Ravafed", which will officially take possession of the agro-industrial complex "Bačka" in Sivac in the coming days, selected workers and took over 55, out of a total of 113 employees in this company. Others who will continue to work in the unsold part of "Bačka" under the management of the representatives of the state capital, are dissatisfied with the personnel division of the company, emphasizing that the sheikh took the "heart" of the plant.

- "Al Ravafed" took over all the professional staff of "Bačka" - agronomists, technicians, mechanics, electricians and warehouse workers, as well as the director and head of finance. He did not take any of the manual workers, who cannot start the production of the rest of the company without the managers of the field. We have received a promise from the Government of Serbia three times that the part of the plant that does not belong to the Arabs will keep the necessary number of experts in order to maintain production. That did not happen, so we suspect that it was done with the intention of devaluing the rest of "Bačka" and giving it to some of the interested buyers - points out the president of the union "Nezavisnost" in AD "Bačka" Mladjen Svrkota.

The company from Abu Dhabi, at the price of 6,995 euros per hectare, annexed 2,215 hectares of arable land "Bačka", and was given the opportunity to cultivate 2,282 hectares of state land in the Si  area. Due to unresolved property and legal relations on the plots, the Arabs did not appropriate 1,451 hectares of fertile blackberries in "Bačka", which, until the sale of this property, was left to be cultivated by the remaining workers of the sivac plant.

**KASALICA REJECTED THE DIRECTOR'S POSITION**

The current director of "Bačka", Zoran Šćekić, will become the general manager of "Al Ravafed", and with his transfer, the combine was left without a manager. Mechanical engineer Milan Kasalica says that he did not accept the workers' proposal to be the director of "Bačka" because "he will not correct what was messed up by the division of workers". The new director, with the support of the employees, should be the manager of RJ "Stočarstvo" Mile Ačanski.

Agronomist Miodrag Bošković, who moved to "Al Ravafed", says that he understands the fear of unassigned workers for the functioning of the rest of the company, but claims that "Bačka" has all the conditions to continue to work successfully.

- Most of the workers wanted to move to "Al Ravafed", because they think it is safer with the Arabs, and those who stayed in the old company fear for their existence because it is uncertain how and to whom the rest of the company will be sold. However, "Bačka" was left with full silos, the fields were patterned, all agro-technical measures were applied and the plan for spring sowing was determined, so that business is secured, it just needs to be done - Bošković notes.

He says that if he had not signed a contract with "Al Ravafed", he would have returned to "Bačka" to prove that she has a perspective. Due to the social program, the offered contract was rejected by three workers, and one of them is the mechanic Dragan Ostojić.

- I would be a beginner in "Al Ravafed" and my more than 35 years of work experience would be erased, which gives me the conditions for a social program in "Bačka" in case of technological redundancy - says Ostojić.

Much more shedding crocodile tears. You're never well, while "they" were you watched you languish and steal as much as possible, and now that the "cat" has come to get you in order, you're whining that there will be no work. You don't need a job, just a salary for not working. As far as I can see, the "saint" has burned out for you, and it was time. I remember well what was done there, not for years, but for decades. And now, the cat came for milk, and the house for cakes, not that there will be more of that now. Ha, ha .....
