The African Development Bank (AfDB) provides access to information on all of its lending projects from 1967 up to now. Based on the IATI data, the dataset includes basic information such as the project title and ID, country, sector, task manager but also, financial information, results and links to publicly disclosed documents. Through this portal, the AfDB provides a ready-made tool for monitoring and showcase its resource flows for development at country level, as well as providing decision-makers at national and sub-national level with information to support decisions on resource allocations.

Do you have a concern about a Bank-financed project? Individuals, workers and communities who are (or may be) adversely impacted by AfDB-financed projects are encouraged to contact the project-level grievance mechanism or submit their complaints to the [Independent Recourse Mechanism \(IRM\)](#).

The [Disclosure and Access to Information \(DAI\) policy](#) is a reaffirmation of the Bank Group's commitment, to carry out its development activities in an open and transparent manner. The policy is grounded on the principles of good governance, particularly transparency, accountability and sharing of information in its operations. It establishes the disclosure requirements for documents and information the AfDB produces or requires to be produced.
