SUSTAINABILITY

SUSTAINABILITY SUKUK FRAMEWORK

Under Edra Solar, our newly built 50MWac large scale photovoltaic solar farm in Kuala Ketil, Kedah, has at the onset during project planning stage reserved a meaningful land size of 40 acres, designated as buffer zone surrounding the solar farm facility, within the project land to facilitate development of fruit farming by the local community at zero cost.

This community partnership that is aligned with The UN Sustainable Development Goals #8, where the objective is to sustain per capita economic growth and achieve higher levels of economic productivity and promoting development-oriented policies that support productive activities, decent job creation, entrepreneurship, creativity, innovation and decouple economic growth from environmental degradation.

Edra Solar intends to issue the ASEAN Sustainability SRI Sukuk, with the aim of financing climate and environmentally friendly solar project which also contributes to the social and economic development of the communities.
