What is the point

Harvesting in a war zone is important and dangerous. In recent weeks, shelling of the territory of Bilopol region by the Russian Federation has intensified.

Therefore, not all agricultural enterprises have started harvesting yet. Also, not all farmers report work in the field for safety reasons.

"Bilopillia Agrosvit" LLC was the first to report on the harvest.

" Bilopillia Agrosvit LLC sends its greetings from Sumy Oblast! The harvest campaign is in full swing and there is no time to waste. The 2022 harvest is special for Sumy Oblast this year. Despite all the difficulties caused by the war, farm equipment went to the fields for harvesting in time
