Agroholding UkrLandFarming is preparing a lawsuit against the Russian government in the amount of \$1-1.2 billion for assets lost as a result of the war. This was stated by the owner of the company Oleg Bakhmatyuk in an interview with [Economic Truth](#).

According to him, since the beginning of the full-scale war, the holding has lost 160,000 hectares of land. These areas are in the occupation and gray zone where military operations are taking place: in Kherson, Mykolaiv, Donetsk, Luhansk, part of Zaporizhia and Kharkiv regions.

"In the south, we lost a huge management of 140,000 hectares. There was equipment worth \$80-100 million, fertilizers and seeds worth another \$90 million. According to our data, all this was looted, all the equipment was taken away," said O. Bakhmatyuk.

In addition, the Chornobayivka and Chornobayivka nova poultry farms were lost in the occupation zone, where 4.5 million poultry died.

"The Areal-Snigurivka poultry factory in the Mykolaiv region was also bombed, production in Mykolaiv, Volnovas and Bakhmut was stopped, and the Donetsk poultry factory was stopped. The Kyiv poultry farm was bombed, Makarivska was damaged - they are also not working," the businessman added.

As a result, the production of eggs in the agricultural holding "Avangard", which is part of the structure of UkrLandFarming, fell by 60% from the pre-war volume of production. In natural form, the decline in production is about 100 million units. month.
