Business Concern

Kerian Solar Sdn. Bhd., a joint venture company between a subsidiary of French utility giant, ENGIE and TTL Energy Sdn Bhd. As part of this joint venture, Kerian Solar has also signed an EPCC Contract with local solar energy solutions provider Ditrolic Solar to begin construction of the project.

Kerian Solar Sdn. Bhd. had signed a 21-year power purchase agreement (PPA) with utility Tenaga Nasional Bhd for the project, back in June 2020. Once completed, it will hold a total installed capacity of 136 MWp, reaping a carbon emission reduction of 157.2 tons of carbon dioxide (CO2) per year.

country's energy mix, of which 67% comes from solar energy.

About Us

What We Do

"The energy transition is a critical enabler to support the country's economy," said Thomas Baudlot. "The signing of the EP is a critical milestone for the Malaysian solar industry. It represents the first solar project of this scale to be undertaken by Kerian Solar and Ditrolic Solar is proud to be a part of it."

Chief Executive Officer of Ditrolic Solar is pleased to be able to cooperate with Kerian Solar on this arms in Malaysia when it is completed. "The signing of the EP solar marks a significant milestone for the Malaysian solar industry. It represents the first solar project of this scale to be undertaken by Kerian Solar and Ditrolic Solar is proud to be a part of it."
