Preschool opening in village Bogdanivka

In September 2013 Agro Invest Ukraine presented completely renovated preschool in the village Bohdanivka, Yagotynsky district, Kyiv region. This preschool has not functioned for many years, and there were about 100 kids under school age in this village. The company Agro Invest Ukraine, as a responsible investor, could not stand by the pressing problems of the village and fully implemented the project of restoring the preschool building.

The several groups of preschoolers attend kindergarten from the beginning of 2013 school year and also several classes of primary school organize their studies there.
