Social initiative "Emergency service Agro Invest Ukraine caring about people"

In May 2014 the company Agro Invest Ukraine launched a social initiative “Emergency service Agro Invest Ukraine caring about people” in all regional offices. This is an extremely important project for those localities that are distant from the regional centers and has lack of quality infrastructure.

As part of this initiative by Agro Invest Ukraine refurbished paramedical stations, purchased and equipped four ambulances, one for each regional offices, and organized the call-center to coordinate the work of doctors and drivers.
