The main AgroTerra's activity is high quality grain and oilseeds production.

High productivity of AgroTerra is a result of implementation of modern technologies optimal for growing different crops and adopting standards of Good Agricultural Practices, such as the use of balanced crop rotation to grow our crops, which include wheat, rapeseed, corn, barley, sunflower, soya, peas and sugar beet.

For the period of its activity the Holding gained the experience in agricultural production. It helped its employees to learn innovative technologies and effectively use natural and land resources.

AgroTerra uses modern and effective equipment of the known brands like John Deere, Claas, Amazone, New Holland, Case, etc. It helps to achieve high results in terms of minimizing expenses and manual labor.

We support Sustainable Agriculture by protecting the land, our people and the environment.
