## PNOC-AFC and UK NRG Chemical Eng Cancel Tie-up Plans

September 5th, 2007

A ranking official from the Philippine Department of Energy reported to newspapers, on the condition of anonymity, that **PNOC-Alternative Fuel Corp** and UK NRG's tie-up for a Biodiesel and Ethanol Processing plant with accompanying feedstock farms will not push through.

According to the source it was because PNOC-AFC wasn't able to meet UK NRG's requirements so they decided to look for another partner.

As **mentioned previously in this blog** last May, the Agreement signed by the two firms was:

*To build a 3.5 million metric tonne biorefinery at a cost of \$455 million, and a \$600 million plantation for jatropha, a plant material which is used in producing biofuels. They also plan to build a 300,000 metric tonnes bioethanol plant at a cost of \$200 million.*
