Developing and managing large scale commercial crop farms in the developing world and promoting the responsible use of

Promoting African economies and businesses that have the power to change and empower the lives of African people.

Who We Are

In 2009, Aslan entered Sub Sahara Africa intent on transforming people's lives through the application of private market principles in the area of food security. Since that time, Aslan has made significant investments in commercial farming enterprises currently developing over 25,000 acres in Mozambique and 68,500 acres in Tanzania.

Mission

Aslan Group exists to move African people from poverty to middle class by pursuing market based solutions to the challenges of food security in Sub-Saharan Africa.

Social Responsibility

Aslan has, through the application of private market principles, funded and developed large-scale commercial farms in Africa, bringing private market principles to the challenge of food security.

Food Security

Aslan is committed to training local farmers in modern farming techniques, helping to address food security within those communities that Aslan has a presence.
