Shenyu New Energy to increase its jatropha acreage in China by 60 percent; 28 Mgy biodiesel plant envisioned

Jim Lane | February 24, 2010

In China, Shenyu New Energy announced that it intends to increase its jatropha plantings in Yunnan province from 49,445 acres to 82,410 acres in 2010, through contract growing arrangements with farmers, focusing on the Yongxing district.

The company is building a $9.5 million jatropha biodiesel plant that will open in Q3 2010 that will initially process 860,000 gallons of jatropha oil per year but will have a capacity of up to 28 Mgy which will be utilized as plantation volumes increase. Yunnan province, overall, has set a provincial goal of producing 140 million gallons (500,000 tonnes) of jatropha oil by 2015.
