In the north east of Ukraine, there is a Bontrup Ukraine farm of about 22,000 hectares. This area, also known as the Bread Basket of Europe, is particularly suitable for agriculture and dairy farming because of the type of soil and the favourable climate. Bontrup Ukraine was established in 2007 with the aim of operating a large-scale agriculture operation with a long-term vision. Respect for people and nature is a central theme. This is why we spend a lot of time constructing and maintaining good cooperation with the local people, as well as the local and national government.

Thanks to the specialist knowledge and workforce of the local population, and the use of the latest agricultural machinery and techniques, the crop yield of the country has increased without depleting farmland.

A large Bontrup Ukraine dairy farm is located in the same region. Here, harvested crops are used to feed the cows, and the manure is used to make the soil more fruitful.
