 Mineral Port

We develop our projects with highest international standards

The Toromocho project will produce one million tons of copper concentrate, 10 thousand tons of molybdenum and 4 million ounces of silver oxide annually.

[View Support Task Campaign](#)

It will also generate important benefits, due to the 5,000 jobs created during the mine's construction stage, 2500 jobs generated directly, and the 7500 generated indirectly during production over the following 32 years.

[View Ophthalmologic Campaign](#)

In addition, considering a price of copper at three dollars; 7.6 billion dollars via taxes, 3.8 billion dollars through the mining canon, 760 million dollars via royalties and 2.1 billion dollars through utilities' payments will be obtained during life-of-mine.
