The Mehta Group has a remarkable history of serving the nation. While the founders of the Group were noted leaders at the forefront of our freedom struggle, they have also been recognised as the helmsmen of the nation's development, post-independence.

A strong Corporate Social Responsibility is one of Mehta Group's most important core values. Our aim is to touch everybody’s lives, without losing sight of our obligations to the resources of our world and its people. We realise that fostering openness and communication with our stakeholders is the key to sustainability in our business.

The Mehta Group provides housing and free medical facilities to 40,000 family members of the employees. We have a dedicated 60 bed hospital at Lugazi, in addition to 10 Dispensaries at various locations to provide basic healthcare to all workers and their families. The medical services provided are basic maternity services, hospital treatment for illnesses such as malaria, minor surgery and outpatient services. Counselling is also provided to families – mainly mothers – on matters of hygiene, managing child health and similar topics. A basic pathology laboratory provides testing for malaria and a few other basic tests. One clinic manned by a nurse is set up in almost each camp.

We operate 2 Nursery Schools, 13 Primary Schools and 1 Secondary School to provide education for more than 6,000 children from within our staff as well as the local population. With an aim to support meritorious students meet their career goal, Dr. Savitadidi Mehta Foundation was established in 2008, to provide scholarships to needy students. Our commitment towards environment has always kept us moving. We have planted more than 500 hectares with trees.

Cane Growers and transporters form a major part of our family of stakeholders and we support them wholeheartedly to be self sufficient. We assist more than 1,800 cane growers financially through subsidized loans and also provide technical assistance on land preparation, cane growing and supply of seedlings. We maintain roads covering close to 1,000 km through our estates and to nearby villages; often the roads we maintain are the only roads to these remote villages!

Lugazi Town and the district of Mukono thrive on SCOUL's community support. As part of our social responsibility, we work hard to mitigate disease and promote healthier living through educational and social programs. We sensitize workers on a continuous basis on HIV/AIDS. An ongoing initiative of our commitment to people is a rehabilitation program for affected people and families. Not the least, sports is always meant for us, a way of life. We have built a sports stadium and we do encourage people to play and earn a name for themselves in different discipline of sports. That keeps us moving!
