

# FUELING THE PHILIPPINE ECONOMY

## ERFCTC

**Eastern Renewable Fuel & Commodities Trading Corporation (ERFCTC)**, formerly known as Eastern Renewables-Fuels Corporation, is the agriculture and alternative fuels subsidiary of Eastern Petroleum Corporation.

The Company was established in August 2007 for the purpose of developing existing and emerging alternative sources of energy as well as projects related to enhancing the energy security and promotes sustainable energy development in the Philippines.

Under the Biofuels Act of 2006, Petroleum Companies are mandated to have five (5) percent blend of ethanol in gasoline products in two years (2009) after the signing of the law and 10 percent blend of ethanol after four years (2011). With such mandate, the Philippines would need more than 330 Million liters of bioethanol yearly starting 2011 which is equivalent to at least 10 bioethanol plants.

ERFCTC is currently consolidating at least 8,000 hectares of cassava for feedstock production for its planned bioethanol plant which is planned to have an annual capacity of 30 Million liters.
