Eco Oro Minerals Corp. (TSX: "EOM") is a Canadian publicly-traded precious metals exploration and mining development company with a portfolio of projects in Colombia. Eco Oro has been focused on its wholly-owned, multi-million ounce Angostura gold-silver deposit, located in northeastern Colombia, since 1994 and in the development of the surrounding communities. We are fully committed to further advancing the Angostura Underground Project in a socially and environmentally sustainable manner that will be beneficial for all stakeholders.

Eco Oro's current objective is to maximize long-term value for shareholders by advancing our project pipeline through to construction and mining, while adding to our portfolio of current assets. We explore and develop precious metals deposits following the highest standards of ethics and transparency. In our day-to-day operations, we strive for excellence in efficiency, quality, safety, social responsibility, and environmental sustainability. Our ultimate goal is to generate economic and social benefits for our shareholders, employees, and the communities in which we operate.

Vision

- To be a world-class company known for the development of responsible and sustainable mining
- To be recognized as an employer of choice for our organizational culture, work environment, and employment conditions

Values

At Eco Oro, all values come from within. This means we live by our values first before seeking them in our relationships with others. Our values are:

- Ethics
- Integrity
- Teamwork
- Respect
- Honesty
- Tolerance
- Leadership
- Recognition
- Trust

- Continuous Improvement
