

EGYPT

Jenaan has been well established in Egypt for over a decade in the agricultural sector.

Sharq Al-Owaynat:

Located 1,200 km south-west from Cairo near the Sudanese and Libyan borders with over 14,000

ha, Sharq Al-Owaynat project is a well-established operation, producing green fodder, corn silage, and wheat for export and the local market.

This project uses the central pivot irrigation system, also using water from the Nubian aquifer, which provides excellent quality and quantity of water.

El-Minya:

El-Minya is located 200 km south of Cairo. Since 2011, Jenaan acquired an area of 48,000 ha of desert land which Jenaan is currently preparing for large-scale farming, with development of infrastructure and water wells.

This will be one of the biggest projects for olive and date palm trees plantation in the region utilizing both drip irrigation and the floppy irrigation method for cultivation between the trees.

Ismailia:

Al-Noor Co. for Agricultural and Animal Investment SAE, a joint venture between Jenaan and a local businessman is currently the biggest operating buffalo milk farm in the region. Established in 2002, it has worked on genetic improvement of the buffaloes in both milk yield and daily weight gain, utilizing exclusively artificial insemination of imported frozen semen from Italy. It has over 1,500 heads, with about 1,200 females.
