

## NCH Capital

NCH is among the largest owners and managers of farmland in Eastern Europe, with over 850,000 hectares of prime farmland principally in the "Black Earth" regions of Russia and Ukraine. Agribusiness represents approximately \$1.7 billion

**Bronze**

of our firm's \$3.4 billion\* of assets under management. Established in 1993 and headquartered in New York, NCH conducts investment operations through nine Eastern European offices. Staffed by over 200 highly experienced local personnel dedicated to executing the firm's deep value strategies, NCH has focused agribusiness teams in Ukraine, Russia, Moldova, Kazakhstan, Romania, Latvia and Bulgaria. Our operations are based upon the concept of purchasing

and/or leasing vast tracts of prime farmland, establishing agribusiness infrastructure and implementing modern farming techniques to enable the production of agricultural commodities for global consumption at comparatively low cost. NCH's agribusiness operations in the Black Sea region have a multi-year positive track record and a proven knowledge of the local and global factors driving the agricultural sector.
