TECHNOLOGY USED IN VICTORIA GROUP MEMBER COMPANIES:

High standard technology is used in Victoria Group member companies' production lines and management system:

- ✓ SAP business solution (and Silver SAP Quality CEE Award for successful implementation for middle-sized companies);
- ✓ Lurgi technology (Germany) in Victoriaoil, electrostatic filter (BETH electrostatic standard precipitator, type 300/2F-3x6-10 from the producer AEROB-BETH Filtration GmbH, Germany);
- ✓ for production processes in Sojaprotein company, the used technology includes Swiss-made «Bühler» technology, for reception, purification and preparation of soybean for extraction. German-made «ExTechnic» is used for oil extraction, while US-made »Wenger« and Swiss "Buhler" are used for the production of TSP and TSPC. Flour is obtained through mills «Hosokawa Alpine» and «Bauermeisterer» from Germany, two lines for automatic packaging and palette forming with bags of the Dutch manufacturer «BTH», while full equipment for the new facility of alcohol extraction in TSPC factory is of manufacturer «Europa Crown» from the UK. For handling the goods, German-made fork trucks «Youngheinrich» are used;
- ✓ modern laboratory equipment: IRMS - ISOTOPE RATIO MASS SPECTROMETER device for examining the genuinity and geographical origin of the produce, PCR device for genetic modification examination, ICP/MS – induced cone plasma with mass detector, HPLC with fluorescent and PDA detector, GC with mass detector, LC with mass and PDA detector, GC with electron capture detector and many more;
- ✓ floating cranes – brand SCHWIMMKRAN 3;
- ✓ systems for oxygenizing of water in fish ponds, etc.

BUSINESS ASSOCIATIONS MEMBERSHIPS:

- ✓ United Nations Global Compact;
- ✓ American Chamber of Commerce in Serbia – AmCham;
- ✓ FIC (Foreign Investors Council);
- ✓ Business Leaders Forum;
- ✓ German Chamber of Commerce
- ✓ Danube Soya Association
