BRUSSELS

Experts Urge Lawmakers to Focus on Food-Migration Nexus

Lawmakers at the highest levels urgently need a "revolution in thinking" to tackle the twin problem of sustainable food production and migration. Starting with an inaugural event in Brussels, then travelling on to New York and Milan, an international team of experts led by the Barilla Center for Food and Nutrition (BCFN) is urging far-reaching reforms in agricultural and migration policy on an international scale.

"A free press is essential for peace, justice and human rights for all. It is crucial to building transparent and democratic societies and keeping those in power accountable."
UN Secretary-General António Guterres

China Generates Energy and Controversy in Argentina

As in other Latin American countries, in recent years China has been a strong investor in Argentina. The environmental impact and economic benefits of this phenomenon, however, are a subject of discussion among local stakeholders.

Greece: SDGs a Way to End Economic Crisis?

Seven years after being on the verge of a financial collapse, Greece is now seeing better times. Its economic accounts have clearly improved but what is not under the spotlight is how the Greek people are still paying for the effects of the crisis.
