## A NEW BEGINNING FOR COFFEE IN UGANDA

In 2001 the Neumann Kaffee Gruppe began developing Uganda's largest and most modern coffee farm- Kaweri Coffee Plantation- as part of its global concept for sustainable farming of high quality coffees.

Robusta coffee is indigenous to the country, and examples of natural wild Robusta can be found growing within our bio-corridors.

Planting of 1800ha of clonal Robusta was completed between 2001 and 2004.
