Rubber factories encounter export problem with China

May 22nd, 2013

Vientiane Times, 21 May, 2013

Rubber processing factories in Oudomxay province are facing unexpected problems because China is not allowing the import of rubber from Laos at the moment, causing large amounts of the material to remain in stock. Sino-Lao Rubber Company Director Mr Oun told the media recently that, after the company had invested in the building of a rubber processing factory, they encountered an export problem when China refused to allow imports of their rubber, forcing the factory to hold 270 tonnes of processed rubber, worth over one billion kip, in stock.
