The Conservancy

Mahali Mzuri is located in the Olare Motorogi Conservancy, one of four established conservancies which together cover a total area of 63,000 hectares in the Greater Maasai Mara ecosystem, bordering the northern edge of the Maasai Mara National Reserve. The other three conservancies are Olare Orok, Mara North and Naboisho, and together all are helping to increase the protected area of the ecosystem by nearly 50%.

Since 2006 a unique land management structure has been developed in the conservancies with a dual aim of extending the protection afforded to wildlife in the National Reserve to an even greater area whilst directly supporting the needs of some 1,550 Maasai families. Today we are seeing both the Maasai community and safari guests enjoying the true benefits of conservation of this land in a relationship that will see the ecosystem protected for many years to come.
