Agriculture in Ukraine

AGRICULTURE IN THE UKRAINE

Agro Invest Ukraine

Within a short period of time from its founding, the company Agro Invest Ukraine has taken over one of the leading regional positions in the field of agricultural production. It manages agricultural land and primary agricultural production.

The mission of the company is to become an effective, and the largest manufacturer of agricultural crops in the Ukraine as well as a modern leader in agricultural management. Its business philosophy is based on the values of the parent company, MK Group, which has managed to successfully implement the knowledge and skills (know-how) from the agricultural field into the Ukrainian market.

The Company's strategy is a long-term, stable leadership position within the fields of agricultural production, and trade in agricultural products, on the Ukrainian and regional markets.

Products and Services

The company Agro Invest Ukraine is currently cultivating 40,000 hectares of land in the Kiev, Vinnitsa, Cherkassy and Zhytomyr regions. Apart from investing in its existing companies and land, this company is also investing in new hectares of arable land.
