

1. Local markets

**Perspectives**

There is a high demand for organically grown food in the world. Demand trends indicate a demand for organically grown products has increased over the past decade in Europe and the United States of America as consumers gain more knowledge on the health benefits of organically grown products.

Namibia as a key tourist destination which will provide a platform for the business to market the organically grown produce.

With the prospects of an export market that is increasingly demanding the products this creates prospects for a viable business.
