Agribusiness

NCH Agribusiness Partners, L.P. was established to invest in a diversified portfolio of agricultural land and related businesses, including, but not limited to, farmland, agribusiness assets, and agribusiness-related securities throughout the Region. We have identified Ukraine and Russia as our principal markets of investment. These countries are blessed with some of the most fertile soil on earth.

We believe the fund has the unique opportunity to purchase and/or lease vast tracts of prime farmland, implementing modern farming techniques to enable the production of agricultural commodities for global consumption at comparatively low cost. In our opinion, very few such opportunities remain elsewhere in the world.

Both directly and through our network of joint venture relationships, NCH has established farming operations in its target markets, and has implemented a rapidly-growing program of investing in agribusiness infrastructure opportunities.

Where it all started: the story of NCH's first farm.
