## Location and History

LEFA

Our Lefa mine is some 700 km north east of Conakry, the capital of the Republic of Guinea and is connected to an all-season road that has easy access to an air strip.

Commercial production began at the Lefa mine in 2008. The mine was acquired by Nordgold at the end of July 2010, as part of the Crew Gold acquisition, with financial results consolidated from August 2010.

Lefa gold mine operates a typical modern open pit operation with three major mining areas and several smaller, higher grade satellite pits, which will provide supplementary feed for the mill over the life of the project.

In 2014, Lefa achieved significant improvements in its performance following the implementation of the planned turnaround programme. The mine increased gold output by 26% year-on-year to 205.1 thousand ounces due to the improvement of all mining and processing parameters.
