Matanuska

Matanuska is a banana plantation in northern Mozambique

Matanuska is a project established in cooperation with East African farmers. The plantation employs about 2,600 people and is expected to increase to 3,000 people over time. The project operates in its first phase, which consists of planting and putting 3,000 hectares into production. When the plantation operates at capacity, more than 150 containers will be exported weekly to Middle East, Asia and Europe and bring valuable export revenues to Mozambique.

Facts

- Sector: Agriculture
