Amur Region Government Performance Report for 2018

Post date: 06/05/2019 09:49
Date modified: 06/20/2019 11:08

1. ECONOMY

1. Gross regional product

The volume of gross regional product (hereinafter GRP) in 2017, according to the Federal State Statistics Service, amounted to 266.1 billion rubles, in 2016 the GRP amounted to 271.1 billion rubles.

In 2018 (according to estimates), GRP remained at the level of 2017 in a comparable estimate and amounted to 273.8 billion rubles.

The dominant type of economic activity in the structure of the region's GRP is transportation and storage demography, which occupy 16.8% of the GRP.

Wholesale and retail trade (including the repair of motor vehicles and motorcycles) accounts for 13.0% of GRP, mining - 12.1% , construction - 9.6%, state administration and military security, social security - 8.8% , provision of electric energy, gas and steam - 6.7%, agriculture - 6.3%, health and social services - 5.9%, manufacturing - 9.5%, other industries - 15.7% .
2. Industrial production

In the industrial production of the region, the production index in January-December 2018 compared to January-December 2017 amounted to 96.3%, products shipped in the amount of 130.6 billion rubles (in 2017, 122.3 billion rubles).

2.1. Mining

In 2018, goods of our own production were shipped, work and services were carried out on our own in mining in the amount of 57.6 billion rubles, which is 12.0% less than in 2017, the production index was 90.5%.

In 2018, 22.8 tons of gold were mined, which is 3 tons less than in 2017.

The main reason for the decline in production is the previous one - the growing depletion of the raw material base of “refractory” ores at the Pioner and Malomyrskoye deposits. An additional factor in reducing production in 2018 was the decision of Nordgold to additionally involve the Berezitovy deposit in the mining of poor ores, as well as a delay in financing the construction of an autoclave complex at the Pokrovsky gold ore deposit. At the end of 2018, the complex was put into operation and is gradually reaching its design capacity. This allows us to predict an increase in gold production in the region in 2019 relative to 2018 by 1-1.5 tons.

2.2 Manufacturing

In manufacturing, the index of physical volume was 99.9%. The largest decrease was noted in the production of machinery and equipment (by 98.1%), due to shortages from the supplier of machine sets for the production of combine harvesters. The growth in manufacturing was observed in wood processing and the manufacture of wood and cork products, except furniture, by 2.5% (due to lumber), in the beverage industry - by 2.7% (due to drinking water), textile products - by 5.6% (due to sewing bed linen), chemicals and chemical products - by 10.3% (due to oxygen production), in the production of other vehicles and equipment - by 3.8% (due to the provision of restoration services railway transport), in the production of other non-metallic mineral products - by 10.7% (due to mixes of asphalt concrete road), in the manufacture of finished metal products, except machinery and equipment, - by 2.8% (due to structures made of ferrous metals). Food production increased by 10.4%. The increase in production is mainly associated with an increase in the production of meat, meat and meat-containing semi-finished products, milk, vegetable and butter, cottage cheese, cereals, and bakery products.

2.3. Electricity, gas and steam supply

In 2018, 13,836.3 million kW were generated. an hour, or 96.8% of the level of 2017 (hydroelectric power stations operate on an automatic generation system), 10 612.4 thousand Gcal (99.9%) were released of steam and hot water.

Shipped goods of own production, performed works and services to provide electric energy, gas and steam, air conditioning in the amount of 37.0 billion rubles, the production index was 98.2%.

2.4. Water supply; water disposal, organization of waste collection and disposal, pollution elimination activities

In 2018, in 2018, for the supply of water, sanitation, the organization of waste collection and disposal, and the activities for the elimination of pollution, goods of our own production were shipped, 3.2 million rubles of work and services were completed, and the production index was 100.2%.
3. Agriculture

In 2018, the volume of agricultural production in farms of all categories, according to preliminary estimates, decreased (in a comparable estimate) by 8.3% compared to 2017 and amounted to 44.5 billion rubles. The decrease in agricultural production occurred due to a decrease in crop production by 11.9% (crop shortages due to adverse weather conditions).

The main directions of agricultural policy are determined by the state program "Development of agriculture and regulation of markets for agricultural products, raw materials and food of the Amur region."

In 2018, co-financing of state program activities brought the limits of budgetary obligations on federal budget funds in the amount of 1,058.1 million rubles, financing amounted to 1,058.1 million rubles (100% of the limit), funds were allocated to recipients in the amount of 1,024.7 million rubles (96.8% of the financing).

At the expense of the regional budget, a limit of budgetary obligations in the amount of 635.7 million rubles was raised, financing was allocated 628.2 million rubles (99.8% of the limit), cash execution amounted to 622.5 million rubles (99.1% of financing).

The limits of budgetary obligations at the expense of local budget funds were brought in the amount of 1,038.9 thousand rubles, financing was allocated 861.4 thousand rubles (82.9% of the limit), cash execution amounted to 861.4 thousand rubles (100% of financing).

Within the framework of the subprogram "Support of small forms of management", 17 peasant (farmer) farms of novice farmers implemented projects for the creation and development of their farms with the help of state support.

Built or reconstructed 4 family livestock farms.

The volume of subsidized loans attracted by small businesses amounted to 225.2 million rubles.

The increase in the volume of agricultural products sold by agricultural consumer cooperatives that received state support funds amounted to 15.5%.

8 new permanent jobs were created in agricultural consumer cooperatives that received state support funds for the development of the material and technical base.

The number of newly created agricultural consumer cooperatives that acquired material and technical means with the help of state support amounted to 2 units.

In the direction "reimbursement of a part of the costs associated with the acquisition of agricultural machinery and equipment", 8 units of other agricultural machinery and equipment were purchased.

The number of applied research and development is 3 units.

Due to the implementation of the Sustainable Development of Rural Areas subprogramme, the input (purchase) rate of housing for young families and young professionals living in rural areas amounted to 1,165 thousand square meters. As a result of the commissioning of housing, 15 young families living in rural areas are provided with housing.

94 young specialists received a monthly cash allowance, 19 - a one-time allowance in accordance with the Law of the Amur Region dated 03.02.2004 No. 298-OZ “On State Support of the Personnel Potential of the Agro-Industrial Complex of the Amur Region”.

3.1. Plant growing

The total sown area in farms of all categories in 2018 amounted to 1281.2 thousand ha, or 1.6% more than in 2017, including 204.2 thousand ha (+ 1.4%) under grain crops soybeans - 990.0 thousand ha (+ 2.7%), potatoes and vegetables - 16.5 thousand ha, fodder crops - 70.2 thousand ha.
In farms of all categories, the gross harvest of grain crops (in weight after processing) amounted to 360.3 thousand tons, or 8.8% less than in 2017, soybean (in weight after processing) - 1,055.3 thousand tons (less by 16.6%), potatoes - 200.9 thousand tons (less by 2.9%), vegetables - 49.5 thousand tons (less by 5.5%).

From one hectare of sown area, 17.6 centners of grain crops were obtained, which is 10.2% less than in 2017, soybeans - 10.7 centners (- 18.8%), potatoes - 146.6 centners (- 0, 8%), vegetables - 176.8 centners (-8.9%).

The main share of grain (74.9%) and soybean (72.6%), as in previous years, was grown in agricultural organizations, potatoes and vegetables (85.2% and 70.7%, respectively) - in households. Peasant (farmer) farms harvested 25.1% of grain, 27.4% of soy, 13.5% of potatoes and 21.8% of vegetable crops.

The sown area of fodder crops by agricultural organizations, peasant (farmer) farms and individual entrepreneurs in the Far North and equivalent areas amounted to 2.7 thousand hectares., Including the size of the insured sown area - 16.065 thousand hectares.

The share of the area sown by elite seeds in the total area occupied by seeds of plant varieties amounted to 9.2%.

Diesel fuel was purchased for agricultural work in 2018 at 0.4678 thousand tons.

3.2. Livestock

Compared to 2017, the production of livestock and poultry for slaughter (in live weight) increased by 3.1% (59.2 thousand tons) in milk farms of all categories of the region, and milk production - by 3.5% (128.3 thousand tons), egg production decreased by 3.8% (207.1 million pieces).

The number of cattle in farms of all categories of the region amounted to 80.0 thousand heads (1.2% lower than in 2017), including cows - 31.0 thousand heads (1.3% lower), pigs - 65.1 thousand heads (down 4.8%), sheep and goats - 15.8 thousand heads (down 3.7%), poultry 2 176.4 thousand heads (up 8.2 %).

In agricultural organizations, there has been an increase in the number of cattle by 6.6% and a decrease in the number of pigs by 9.8% and poultry by 4.7%, which is associated with the reconstruction of the pig farm IP GKFH Khryakov S.A. and the purchase of LLC SPK Amurplitesprom incubation eggs in 2018 not in full (55 thousand eggs, or 82% of the need).

At the same time, the volume of egg production in specialized poultry enterprises amounted to 162.8 million pieces, with a plan of 160.2 million pieces.

Milk production in agricultural enterprises and peasant (farmer) enterprises amounted to 53.7 thousand tons.

Production (cultivation) of marketable fish amounted to 3 tons.

Within the framework of the development of beef cattle breeding subprogramme, the number of commercial livestock of cows of specialized meat breeds in agricultural organizations, peasant (farmer) farms, including individual entrepreneurs, amounted to 3.875 thousand heads.

The underfulfillment of the indicator is due to the fact that this year due to unfavorable weather conditions prevailing in the Amur Region (overmoistening, flooding, flooding of agricultural land), an emergency mode was introduced from 08/10/2018, which was lifted on 09/03/2018. With this in mind, a number of farms in the region have optimized their livestock numbers. The livestock reduction also occurred due to the fact that LLC Tom of the Oktyabrsky District stopped production activities on raising cattle in the meat production direction, as well as in connection with measures taken to eliminate the infectious disease of livestock in the farms of the Magdagachinsky and Bureysky districts.

3.3 Animal Welfare
In order to prevent violations of legislation on the protection of wildlife, in 2018, 1,818 raids were carried out to protect wildlife, and 1,612 administrative cases were compiled. Violations of fines and lawsuits amounting to 5.6 million rubles. In 2018, 1,149 hunting tickets of a single federal design were issued; at the end of the year, the total number of hunters who received such tickets reached 41,175 people. 51.1 thousand permits and permit forms for the extraction of hunting resources were issued to hunters and hunting users.

In 2018, in order to improve the living conditions of aquatic biological resources, the coastal strip of fishery water bodies with a total length of 48.04 km was cleaned up and 24,066 sq. M were cleared of abandoned fishing nets and other fishing gear. km area of water bodies.

To preserve and reproduce wild animals, biotechnological measures were carried out. In 2018, hunting organizations laid out 82.2 tons of salt, 849 tons of grain and soybean waste, sowed 870 hectares of fertilizing fields.

11.4 tons of salt, 309 tons of grain and soybean waste, 6.4 tons of other feed were laid out in the regional reserves, and 113 ha of feeding fields were sown.

In order to improve the nesting conditions of Far Eastern storks listed in the Red Book of the Russian Federation, 10 nesting supports were arranged in 2018 in the territories of the Amur and Berezovsky regional reserves.

The abundance of wild animals was recorded on an area of 35.6 million hectares. Based on the results of the census, the limits and quotas for the extraction of hunting resources for the hunting season 2018-2019 were approved.

As part of the reintroduction of the Amur tiger on the territory of the Amur Region in May 2014 with the participation of Russian President Putin V.V. 3 individuals of Amur tigers, brought from the Primorsky Territory from the Center for the Rehabilitation of Tigers and other rare animals, were released in the Bureysky district. During the monitoring during 2018, 4 individuals were observed, which confirms the positive results of the work carried out in the Amur Region on the conservation of a rare beast.

### 3.4 Veterinary control (supervision)

In 2018, 516,059 thousand diagnostic tests were conducted for brucellosis, leukemia, tuberculosis and leptospirosis. Headaches were performed against anthrax 226,519 thousand, against foot and mouth disease 367,893 thousand, against rabies and other infectious and parasitic diseases of animals 1986.0 thousand.

The damage incurred by citizens as a result of the alienation of animals during the elimination of foci of especially dangerous animal diseases in the region, in the amount of 58.30 thousand rubles.

Healed 5 dysfunctional points for infectious diseases. In accordance with the approved plan for inspections of legal entities and individual entrepreneurs operating in the field of veterinary medicine and livestock breeding in the Amur Region, approved for 2018, 108 inspections were conducted, in addition to 56 unscheduled inspections. 51 offenses in the field of veterinary medicine have been identified.

The total amount of administrative fines imposed amounted to 806.91 thousand rubles.

In the framework of the implementation of the Law of the Amur Region dated October 11, 2013 No. 254-OZ "On the regulation of the number of stray animals in the region and the vesting of local authorities with the state powers of the Amur Region to organize measures to regulate the number of stray animals", the Law of the Amur Region "On the regional budget for 2018 and the planning period of 2019 and 2020 ", 201 head of stray animals were captured.

In order to increase the efficiency of the organization of breeding and breeding work, to improve the reproduction of the herd in all categories of farms, in 2018 bioproduction (seed of bulls) was purchased for farms of all forms of ownership in the amount of 32.2 thousand doses.
Artificial insemination of cows and heifers in farms of all forms of ownership in 2018 remained at the level of 2017 and amounted to 12.6 thousand heads (in agricultural enterprises - 8.0 thousand heads (97%), in personal subsidiary farms (hereinafter - private farms) - 4.6 thousand goals (28%)). The insemination of one head in the private sector is 150 rubles.

In total, 138 centers for the artificial insemination of cows and heifers work in the region (29 in agricultural enterprises and 109 in private farms). In 2018, 4 new points were opened in Belogorsky (village of Polyane), Konstantinovsky (village of Krestovozdvizhenka), Seryshevsky (village of Novosergeevka) and Tambovsky (village of Lozovoye).

The regional information and breeding center established in 2017 acquired the right to use a problem-oriented set of livestock programs with teaching materials for it in 2018 (module for IAS "SELEX" "Veterinary Medicine. Entering and Processing Data", IAS "SELEX" multi-farm version to maintain 30 databases).

In 2018, on the basis of the State Health Institution of the Amur Region "Amur Regional Veterinary Laboratory", an examination was carried out in the field of immunogenetics to confirm the origin of animals and selective quality control of milk. Over the past year, a total of 839 animal blood samples were examined, and 17.4 thousand milk samples.

In order to increase the number of livestock and increase the genetic potential of cattle in the dairy and meat production lines, 916 thousand breeding young meat chickens.

In 2018, the obstetric-gynecological team carried out work on the medical examination of the breeding stock of cattle using an ultrasound machine. In 2018, a total of 1.0 thousand heads of cows and heifers of dairy and meat production directions were studied. The study of one head is 300 rubles.

In 2018, Agrofirm ANK CJSC of the Blagoveshchensk District increased its status and officially became a red-motley breed cattle breeding plant. Previously, the company had the status of a breeding reproducer. Currently, this is the only breeding farm in the region and in the Far Eastern Federal District.

3.5 State technical supervision

In 2018, 2,341 units of vehicles were registered, and 1,885 units of vehicles were deregistered. As of 01.01.2018, 22,684 self-propelled vehicles were registered (21,712 in 2017) and 3,463 tractor trailers (3,428 in 2017).

During the technical inspection, the technical condition of 17,367 self-propelled vehicles and trailers belonging to 1,009 organizations and 2,815 individuals was checked, 15,793 self-propelled cars and trailers were inspected, administrative offenses were warned and suppressed: 102 orders were issued, 704 protocols were drawn up, and the amount of fines amounted to 1 108 579 rubles. In addition, 1,731 vehicles from other regions were registered on a temporary basis. This is equipment working in the agricultural sector of the region (Rosagroleasing) and on large construction projects in the region (Amur Gas Processing Plant, Vostochny Cosmodrome, etc.).

The automated accounting system based on the Gostekhnadzor Expert software was updated.

4. Forestry

As of 01.01.2019, the forest fund land area is 30 515.7 thousand ha, including 22 805.1 thousand ha covered with forest. The total stock of wood is 1 996.3 million cubic meters. meters, while the stock of ripe and overripe trees is 1,024.0 million cubic meters. meters, including coniferous - 877.3 million cubic meters. meters.

In 2018, the total volume of timber harvested amounted to 1,781.3 thousand cubic meters. meters.

Reforestation works were performed on an area of 28,220 ha (100% of the plan). Thinning in young trees was performed on an area of 2,275 ha (100% of the plan).
Amur Oblast takes 3rd place in the Far Eastern Federal District in terms of harvested wood and forest products after Khabarovsk and Primorsky Territories. The share of industrial wood production in the total volume in the district is on average for three years 7.7%, and lumber 7.3%.

As of 01.01.2019, 116 forest plots intended for timber harvesting are on lease in the Amur Region. The annual allowable supply of wood from these sites is 3.3 million cubic meters. Harvesting is carried out by 67 economic entities (of which 24 are individual entrepreneurs). 258 forest plantation purchase and sale agreements were concluded with small and medium-sized enterprises for a total timber harvest of 421.0 thousand cubic meters. meters.

The timber industry complex of the Amur Region, which is part of the forest complex of the Amur Region, is an enterprise engaged in logging, woodworking and wood-chemical activities in the region.

Currently, woodworking enterprises produce a wide range of products: edged and unedged sawn timber; dry and glued products; molded products (parquet board, euro lining, block house, furniture panel, floorboard, platband, plinth, etc.); wooden details of house building.

In 2018, timber harvesting by forest lessees and small and medium-sized enterprises amounted to 1,781 thousand cubic meters. meters, exceeding the indicator of 2017 by 6% (+111 thousand cubic meters). Commercial wood production amounted to 991 thousand cubic meters. meters, 10% (+99 thousand cubic meters) higher than 2017.

Lumber production in 2018 amounted to 155 thousand cubic meters. meters, which is 1% (+1.5 thousand cubic meters) higher than in 2017. Of the total lumber, 41% was exported, 59% was sold to the domestic market and shipped to neighboring regions (Khabarovsk and Primorsky Krai).

In 2018, the volume of timber products exported by Amur enterprises amounted to 431.0 thousand cubic meters. meters, including untreated timber - 367.4 thousand cubic meters. meters, sawn timber - 63.6 thousand cubic meters. meters. The declared value of the goods amounted to 37.5 million dollars.

All exports go to China.

The development of wood processing is a priority for the timber industry in the Amur Region. In order to attract investors, forest areas were selected that are potentially possible for forestry activities. On the official website of the Ministry of Forestry and Fire Safety of the region there is a map of free forest areas.

The priority investment project in the field of forest development “Construction of a woodworking plant east JSC Turanles” is completing the implementation and the priority investment project “Creation of the Far Eastern Center for Deep Processing of Wood in Amursk, Khabarovsk Territory”, OJSC “Dallesprom” is being implemented.

As of 01.01.2019, a total of 450.2 million rubles were invested in the implementation of the investment project of Turanles JSC.

In 2018, the company procured 115.0 thousand cubic meters. meters of wood. The volume of lumber production amounted to 27.3 thousand cubic meters. meters, the volume of production of timber and lumber edged natural humidity - 23.9 thousand cubic meters. meters. 8.4 tons of wood pellets were produced.

The branches of LLC Dallesprom in the Amur Region for 2018 procured 150.4 thousand cubic meters. meters of wood, produced 21.5 thousand cubic meters. meters of lumber.

4.1 Environmental measures

The total planned budget allocation in 2018 for the implementation of the state program “Environmental Protection in the Amur Region” amounted to 1,086.347 million rubles.

According to the results of the fiscal year, the state program measures were funded in the amount of 1,081.498 million rubles, or 99.5% of the planned volumes, the funds received were disbursed in full.
Within the framework of the subprogram "Development of the water management complex and environmental protection in the Amur Region", in 2018 the length of certain (marked on land management maps) water protection zones of water bodies in the length of the coastline was increased to 4676 km; the boundaries of water protection zones and coastal protection zones are fixed on the territory by installing specialized information signs on riverbed sections with a total length of 2,324.8 km (cumulative); An electronic model of the territorial scheme of waste management, including municipal solid waste in the region; cleared, straightened and dredged p. Eastern within the city of Zavitinsk.

Within the framework of the subprogram "Improving the functioning of the system of specially protected natural territories and the system of protection of wildlife in the Amur Region", in 2018, 1,818 raids were carried out as part of control and supervision measures; hunting animals were recorded by winter route accounting; the growth index of the number of main types of hunting resources was increased to 1.008. To delimit the territories of reserves, 300 units of warning signs have been installed. To maintain and improve the food supply of wild animals in the winter period, 10.81 tons of salt and 269.7 tons of feed were laid out. As part of enlightening the population of the region, 658 environmental awareness-raising events were held, 250 units of advertising and publishing products were issued. Conducted 6 types of accounting work. 59 acts on fire-fighting measures were drawn up.

In the framework of the subprogram "Development of forestry in the Amur Region", in 2018, the share of the area of valuable forest stands in the forest land occupied by forest stands was increased to 66.1%; 66.4% of reforestation area to the area of retired forests was provided; the share of forest fires eliminated during the first days from the date of detection in the total number of forest fires in the amount of 32.4% was ensured; the ratio of the area of sanitary and sanitary measures to the area of dead and damaged forests increased to 11%; the volume of payments to the budget system of the Russian Federation from the use of forests located on the lands of the forest fund, per 1 hectare of lands of the forest fund, in the amount of 23.6 rubles; 6,631 raids were conducted to identify violators of forest legislation.

Since the beginning of the fire hazard period of 2018, 433 natural fires have been recorded in the Amur Region (an increase of 30% compared to the previous year) on a total area of 2,286,176 ha (an increase of 10 times), including 282 fires in the territory of the State Forest Fund an area of 2 165 872 ha (the same period last year - 222 fires on an area of 206 361 ha), of which 82 forest fires (31%) were extinguished on the first day. The average area covered by fire per fire is 5,279 ha (an increase of 8 times).

To extinguish the emerging fires, professional interagency groups were recruited, including staff from forestry, air protection, regional and federal fire services.

In order to timely detect and take measures to extinguish forest fires in the region, 6 departmental aircraft of the GAU of the Amur Region 'Air Base' operated: TVS-2Am-1 - 2 aircraft; An-2 - 2 aircraft; Mi-8 - 2 helicopters.

To strengthen the group of firefighting in the region during the emergency regime, employees of the federal reserve of the traffic police of the Federal Aviation Safety Agency "Avialesohrana" were attracted in the amount of 428 people, the rescuers of the FSUE "Amur SC Emergencies Ministry of Russia" (30 people) and the Federal State Budget Institution "Far-East Transport and Emergency Situations Ministry of Emergency Situations of Russia" (30 people) were involved ( Khabarovsk city). In addition, in order to stabilize the forest fire situation and protect settlements, 2 additional MI-8 helicopters of the Russian Emergencies Ministry, 2 MI-8 helicopters of the Russian Ministry of Emergencies, 2 BE-200 aircraft and 1 Il-76 aircraft of the Russian Emergencies Ministry were additionally involved.

The measures taken made it possible to keep the situation under control and pass the peak of burning, not allowing the transfer of fire to settlements and objects of the economy, causing harm to human life and health, as well as property of citizens.

4.2. Emergency protection

In 2018, 3 emergencies occurred on the territory of the region, of which 1 was of an technogenic nature, 2 of a natural nature.

In 2018, divisions of the state fire service of the region eliminated 1,162 fires, which is 7.4% less than in 2017.
In 2018, in order to fulfill the requirements of Article 76 of the Federal Law of July 22, 2008 No. 123-ФЗ "Technical Regulations on Fire Safety Requirements", the Government of the region additionally created 1 fire station for the fire service of the region (Murtigit, Tyndinsky district).

4.3. Regional State Environmental Supervision

In 2018, state inspectors of the Amur Region in the field of environmental protection conducted 116 inspections to ensure compliance with environmental laws, of which 49 scheduled inspections and 67 unscheduled inspections. Based on the results of the inspections, 143 orders were issued to eliminate the identified violations, of which 96 were completed at the end of the year.

In 2018, 85 decisions on initiating cases of administrative offenses from the prosecution and law enforcement agencies of the region were considered, materials of 57 cases were referred to magistrates and courts of general jurisdiction, 1 to the prosecutor's office, 25 to the bailiff service and others supervisory authorities.

A total of 202 administrative fines totaling 4.2 million rubles were imposed on violations of environmental legislation in 2018, of which 4.8 million rubles were collected at the end of the year, taking into account passing administrative fines from 2017.

For the reporting period, the damage caused to the subsoil due to the illegal extraction of common minerals by individuals in the amount of 3.7 million rubles was calculated in transport for a total amount of 2.5 million rubles.

For enforcement by the bailiff, executive orders were sent for damages totaling 13 million rubles.

4.4. State Forest and Fire Supervision

In 2018, 1,330 administrative protocols were drawn up for violation of the requirements of the forest and fire laws in forests, 1,206 decisions were issued on imposing administrative punishments (6% more than in 2017), administrative fines were imposed in the amount of 16.4 million rubles, collected administrative fines in the amount of 6 million rubles.

1 scheduled audit was conducted in relation to legal entities and individual entrepreneurs (in 2017 - 17, of which 9 scheduled inspections, 8 unscheduled inspections). 650 inspections of the fulfillment of the terms of lease agreements for forest plots were carried out (2017 - 521).

For the spring and autumn fire hazard seasons of 2018, forestry inspectors, together with the state fire supervision authorities, law enforcement agencies, voluntary groups, conducted 6631 patrol raids (9% more than in 2017), 348 administrative protocols for violation of the Fire Safety Rules were drawn up by state forest inspectors in forests (15% more than in 2017), administrative fines totaling 3.7 million rubles were imposed (12% more than in 2017), identified and held accountable 74 culprits of the occurrence of dry grass bollards.

5. Transport and road facilities

5.1. Transport

5.1.1. Automobile public transport

Road transport occupies a leading position in providing transport services to the population of the region, in the structure of passenger transportation, whose share is 87%.

Regular bus service on route 271 is maintained.

Of the 538 rural settlements, 445 have regular bus services (82.7%).

In 2018, new inter-municipal routes were established:
"G. Blagoveshchensk - urban settlement Talakan (Bureisk district) through with. Ekaterinoslavka ";

"G. Free - with. Blue ";

"ZATO Tsiolkovsky - the city of Blagoveshchensk ";

"G. Free - p. Bardagon ";

"G. Free - Belogorsk ";

"G. Raichikhinsk - s. Barbarian ".

In 2018, 50.94 million passengers were transported by road (99.5%, 2017 - 51.2 million passengers), passenger turnover - 345.8 million passengers. km (100.1%, 2017 - 345.6 million pass. Km.).

20.1 million tons of cargo were transported by road transport (90%, 2017 - 26.1 million tons), freight turnover amounted to 342.7 million tons-km (78.8%, 2017 - 421.4 million tkm).

On the territory of the region, 237 carriers (216 individual entrepreneurs and 21 legal entities) carry out activities in the transportation of passengers and baggage by taxi. There are 2,120 taxi permits in force.

In 2018, 169 permits were issued (380 in 2017) to carry out activities for the transport of passengers and baggage by taxi, including 8 through the multifunctional center (hereinafter referred to as the MFC) (2017 - 18 permits).

Within the framework of the state program "Development of the transport system of the Amur Region for 2014-2020", 42 photo and video recording complexes were deployed in Blagoveshchensk, Belogorsk, Raichikhinsk, Zeya, Svobodny, Shimanovsk, Tynda and in the Tambov region.

According to the traffic police of the Ministry of Internal Affairs of Russia in the Amur Region for 2018: 25.9 thousand violations were revealed, fines were imposed - 14.6 million rubles, fines - 14.8 million rubles were recovered.

12 753 materials worth 6.7 million rubles were sent to the bailiff service, 6 207 materials worth 3.2 million rubles were recovered.

As a result of the measures taken by the Government of the Amur Region to stabilize the situation with road traffic accidents, in 2018, a decrease in the total number of road traffic accidents with injured people was recorded in the region by 0.3% (from 1 215 to 1 211), the number of deaths in them people - by 6.2% (from 145 to 136), wounded - by 2.4% (from 1578 to 1540). The number of traffic accidents was reduced by 17.5%, and unsatisfactory road conditions were detected at the places where they occurred (344). The number of deaths and injuries in such traffic accidents amounted to 32 people (-17.9%) and 421 people (-20.6%), respectively.

5.1.2. Suburban Rail

In 2018, suburban railway communication in the Amur Region was carried out along 13 routes, including 8 routes at the training ground of the Far Eastern Railway and 5 routes at the training ground of the Trans-Baikal Railway in the Magdagachinsky, Skvorodinsky, Arkharinsky, Tyndinsky and Selemdzhinsky districts between the settlements where this type Transport is the main and non-alternative.

In 2018, in the Amur Region, in the field of passenger transportation by public rail, the tariff approved in 2016 was in effect at the rate of 95 rubles per 10 pass. km

For 2019, the tariff for the population remains unchanged.
In 2018, the passenger turnover of railway transport in suburban traffic amounted to 8.8 million pass. km, compared with 2017, this indicator decreased by 7%. In 2018, 144.7 thousand passengers were transported, which is 5.7% less than the figure for 2017 (153.5 thousand passengers).

The privileges on the fares for students (70% of the fare) and for employees of institutions funded by the regional and local budgets, for people over the age of 55 for women, 60 for men (50% of the fare), and rail travel are saved. General use in suburban traffic.

In 2018, 17.6 thousand people were transported at a reduced rate (an increase of 2.9%), including 8.7 thousand students and 8.9 thousand passengers assigned to a certain category of citizens (pensioners, employees of institutions, financed from the regional and local budgets).

The amount of subsidies provided in 2018 at the expense of the regional budget of the organization of railway transport for the compensation of lost income arising from the establishment of tariffs for the population below an economically justified level amounted to 144.301 million rubles. To ensure preferential travel for students and a separate category of citizens, a subsidy of 4.053 million rubles was provided.

5.1.3. Inland Water Transport

In 2018, on the territory of five municipalities of the Amur Region, there were 2 ferry and 3 boat crossings, providing transport accessibility to 8 settlements, namely:

p. Beregovoi and p. Kirowsky of the Zeya district (1 ferry crossing);
with. Ogodzha Selemdzhinsky district (1 ferry);
Maysky settlement and Ivanovsky settlement of Mazanovsky district (1 boat crossing);
with. Ust-Nyukzha, Tyndinsky district (1 boat crossing);
with. Kukhterin Meadow and with. Uralovka of Shimanovsky district (1 boat crossing).

For 2018, inland water transport enterprises:
24.8 thousand tons of cargo were transported;
unloading work was performed - 273.0 thousand tons of cargo;
233.673 thousand people were transported.

5.1.4. Interregional Air Lines

In 2018, air traffic for residents of the Amur Region was organized along the routes:
Moscow - Blagoveshchensk - Moscow;
Yekaterinburg - Blagoveshchensk - Yekaterinburg;
Novosibirsk - Blagoveshchensk - Novosibirsk;
Yakutsk - Blagoveshchensk - Yakutsk;
Irkutsk - Blagoveshchensk - Yakutsk;
Irkutsk - Ulan-Ude - Blagoveshchensk - Vladivostok;
Irkutsk - Chita - Blagoveshchensk - Vladivostok;
5.1.5. Blagoveshchensk Airport

In 2018, a total of 419 thousand passengers used the services of Blagoveshchensk Airport, which is 3.2% more than in 2017. On domestic airlines served 345 thousand passengers. Compared with 2017, the number of passengers decreased by 1,331 people, or 0.4%, due to the insufficient number of subsidized tickets due to the non-fulfillment of subsidized transportation by Severny Veter Airlines in the Moscow direction during the summer period, and the cancellation of Avrora flights on the route Blagoveshchensk - Khabarovsk.

Passenger traffic on international airlines increased by 24.1% compared to the same period of the previous year and amounted to 73,261 passengers. The growth in passenger traffic is due to the demand for leisure for Russian tourists in the countries of Southeast Asia (Vietnam, Thailand, China).

The total number of take-offs and landings amounted to 2,683 take-off and landing operations, which is 5.0% lower than in 2017.

The volume of cargo and mail handled by the airport in 2018 amounted to 2,973.0 tons, which is 34.4% lower than in 2017.

In accordance with the state program of the Russian Federation 'Development of the transport system', approved by Decree of the Government of the Russian Federation dated December 20, 2017 No. 1596, the event "Construction and reconstruction of the airport complex" Ignatievo " (Blagoveshchensk)" is being implemented.

In the period 2013 - 2015, work was carried out on the development of design estimates for the object "Construction of the runway - 2 (IIWPP-2) with artificial turf, a complex of buildings and structures at Blagoveshchensk Airport", the amount of funding amounted to 117.2 million rubles.

In October 2015, a positive opinion was received from the FAA Glavgosexpertiza of Russia on the technical and estimated parts of the project. The estimated construction cost is estimated at 3.8 billion rubles.

The start of the implementation of the event "Construction and Reconstruction of the Ignatievo Airport Complex (Blagoveshchensk)" has been provided for by the program since 2019 with funding in the amount of 4.7 billion rubles, including by year: 2019 - 781.4 million rubles, 2020 - 2.9 billion rubles, 2021 - 949.2 million rubles.

The organization that exercises the authority of the customer is the Federal State Unitary Enterprise "Administration of Civil Airports (Aerodromes)".

Currently, a request for proposals in electronic form for the implementation of construction and installation works on the object "Construction and reconstruction of the airport complex" Ignatievo " (Blagoveshchensk)" has been announced.

5.2. Road facilities

The total length of the roads of the Amur Region (federal, regional and municipal roads) is 16.2 thousand kilometers, of which the length of regional roads is 5.9 thousand kilometers.

The financing of the activities of the subprogram "Development of the public road network of the Amur Region" of the state program "Development of the Transport System of the Amur Region for 2014-2020" is funded by the road fund of the Amur Region.

In 2018, 10.661.9 million rubles were allocated for the development of the road economy of the region, including:

- federal budget funds - 298.0 million rubles;
- funds of the regional budget - 4,248.6 million rubles;
-
funds from local budgets - 61.9 million rubles;
extrabudgetary sources - 6,053.3 million rubles.

The appropriations are distributed among the following activities:

construction and reconstruction - 587.6 million rubles (5.5% of the total appropriations), including 14.9 million rubles - design and survey works;
construction and reconstruction using extrabudgetary funds - 6,053.3 million rubles (57%);
maintenance of the existing network of regional roads - 1,007.4 million rubles (9.4%);
repair of regional roads - 1,525.4 million rubles (14.4%);
subsidies to municipalities - 953.9 million rubles (9%);
support for the activities of state institutions - 464.9 million rubles (4%);
financial support for the costs associated with the processing and distribution of copies of decisions of state control (supervision) authorities on administrative offenses identified with the help of automatically operating special technical equipment with photo and video recording functions - 1.6 million rubles (0.01 %);
ensuring transport safety of road facilities - 5.9 million rubles (1%).

In 2018, work was carried out to assess the vulnerability of categorized transport infrastructure facilities (62 bridges). State contracts have been concluded for the development and approval of plans to ensure transport safety of road facilities.

Funds from the federal budget were allocated for the reconstruction of the Blagoveshchensk-Svobodny highway, km 90 + 169 - km 96 + 000.

The regional budget funds were allocated for the reconstruction of 9 objects (5 transitional and 4 newly started), the development of design estimates for 9 objects and the conduct of a price and technological audit of the investment project "Construction of a bridge across the river. Zeya."

In 2018, 4 facilities with a capacity of 7.48 km / 583.95 linear meters were commissioned. m.:

1) reconstruction of the highway "Zeya-Tygda", km 33 - km 40, with the reconstruction of two bridge crossings: across the river. Urcan and p. Picked up. Power 6.126 km / 485.8 running meters;
2) reconstruction of the bridge at km 15 of the Krestovozdvizhenka – Poyarkovo – Kalinino highway. Power 0.579 km / 48.75 linear meters;
3) reconstruction of the bridge at km 51 of the Zeya-Zolotaya Gora highway. Power 0.382 km / 18.00 linear meters;
4) reconstruction of the bridge at km 57 of the Zeya-Zolotaya Gora highway. Power 0.39251 km / 24.7 linear meters

In 2018, a significant amount of funds - 2,532.7 million rubles was allocated for the maintenance and repair of regional roads.

At the expense of investors, the following projects were implemented:
reconstruction of the public highway of regional importance "Access to the city of Svobodny from the Amur highway from km 7 + 445 to km 13 + 942". In 2018, 6.51 km were commissioned;
construction of a border bridge over the Amur River (Heilongjiang) in the area of Blagoveshchensk (RF) - Heihe (China). Stage 1. Road bridge crossing. Entering the facility is planned for 2019.

In 2018, the regional road fund provided subsidies to the budgets of 44 municipalities for co-financing road activities in respect of local roads in the amount of 953.9 million rubles (9% of the total allocation).
In total, within the framework of the subprogram for the end of 2018:

13.99 km / 583.95 linear meters put into operation upon completion of reconstruction of roads of regional importance;

112 km of regional roads were repaired;

160,697 km of local roads were brought into compliance with regulatory documents, lighting of 22,085 km of road network was restored, a drainage system for 33 km of roads was restored with 64 culverts installed, 10 bridges were repaired, 15 km of sidewalks and footpaths were completed, horizontal markings were made 11 km of roads, 7 traffic lights were installed, 5 stopping areas, 7 pedestrian crossings were equipped.

6. Construction

The volume of construction work in 2018 amounted to 97,517.1 million rubles, or 96.5% by 2017.

In 2018, major investment projects were implemented (Power of Siberia, Amur Gas Processing Plant, road construction projects, Vostochny Cosmodrome), work in the construction of social facilities and public utilities infrastructure.

In 2018, 2,786 residential premises with a total area of 158,91 thousand square meters were built in the region. The largest housing commissioned in Blagoveshchensk - 64,876 thousand square meters. meters - 68.9% of the level of 2017 (2017 - 94,21 thousand square meters) and 40.8% of all commissioned housing in the region.

The population at the expense of own and borrowed funds introduced 301 residential premises with a total area of 36,91 thousand square meters. meters, or 115.8% of the level of 2017. At the same time, the share of individual housing construction amounted to 23.23% of the total entered area of residential buildings in the region as a whole (in 2017 - 17.6%). In Blagoveshchensk, the share of individual residential buildings in 2018 amounted to 3.17 thousand square meters. meters, or 4.9% of the total housing construction in the city (in 2017 - 8.4%). In 16 territories, housing was commissioned only by individual developers.

Among urban districts and municipal regions in 2018, the largest housing commissioning was carried out in the urban district of Blagoveshchensk - 94,21 thousand square meters. meters, or 40.8% of all commissioned housing in the region, in the urban district of Svobodny - 29,19 thousand square meters. meters, or 18.4% of all commissioned housing in the region, 22,671 thousand square meters were commissioned in the Blagoveshchensk district meters, or 14.3%, in the city of Belogorsk commissioned 14,11 thousand square meters. meters, or 8.88% of the total input.

The provision of housing for citizens of the Amur Region is growing annually. This indicator in 2016 amounted to 24.6 square meters. meters, in 2017 - 24.9 square meters. meters, in 2018 (estimate) - 25.1 square meters. meter.

Of the total housing commissioned, 38.8 thousand square meters. meters of living space, or 11.3%, was built under the program “Resettlement of citizens from emergency housing stock, taking into account low-rise housing construction in the Amur Region”. The construction of residential houses under the program “Resettlement of citizens from emergency housing stock taking into account low-rise housing construction in the Amur Region” was carried out in the cities of Blagoveshchensk, Belogorsk, Svobodny, Progress, municipal areas of Skvorodinsky, Tyndinsky.

With a general negative dynamics of housing commissioning in the region in 2018, an increase in housing commissioning was observed in the following municipal areas: Blagoveshchensk, Zavitinsky, Mazanovsky, Oktjabrsky, Svobodensky, Skvorodinsky, as well as in the cities of Belogorsk, Zeya, Raichikhinsk, Svobodny and Tynda.

In 2018, 158.9 thousand square meters corresponded to economy class standards. meters of living space. Such residential buildings include residential buildings, the technical and economic indicators of which, as well as the parameters of residential premises in them, correspond to the characteristics determined by the order of the Ministry of Construction and Housing and Communal Services of the Russian Federation dated 05.05.2014 No. 223 / pr “On approval of the conditions for classifying residential premises to economy class housing.”
A positive trend is observed in terms of the indicator - the provision of affordable and comfortable housing for families of the Amur Region who want to improve their living conditions.

According to the Rosreestr Administration for the Amur Region, in 2018 31,853 families improved their living conditions, which accounts for 68% of the number of families wishing to improve their living conditions.

In the framework of the state program of the region "Providing affordable and high-quality housing to the population of the Amur Region", the following programs are being implemented:

1) "Improving the stability of residential buildings, major facilities and life support systems in the seismic regions of the region." The planned and actual funding for the subprogram for 2018 is 13.3 million rubles (funds from the regional budget). The funds were allocated for landscaping and engineering infrastructure, previously put into operation of residential buildings;

2) "Resettlement of citizens from a dilapidated housing stock recognized as unsuitable for living, and (or) housing stock with a high level of depreciation (more than 70 percent), located in the area of the Baikal-Amur Railway (BAM) in the Amur Region". In 2018, the cities of Tynda and Zeya, Tyndinsky, Zeysky, Selemdzhinsky districts participated in the implementation of the events. The planned and actual funding for the subprogram for 2018 amounted to 178.5 million rubles, including 148 million rubles from the federal budget and 26.1 million rubles from the regional budget. In addition, agreements with municipalities provided for local budget funds in the amount of 4.4 million rubles.

Acquired by the municipalities of the BAM zone in the primary and secondary housing market 5 335.1 square meters. meters of housing, which allowed to relocate 97 families from the dilapidated and emergency housing stock of the BAM zone (32 families more than planned).

As part of the work, an order was made by the Chairman of the Government of the Russian Federation regarding the unconditional implementation of a package of measures to provide housing for people who were provided with temporary housing in connection with the construction of the Baikal-Amur Mainline: housing was purchased for 25 families of citizens who were provided with temporary housing in connection with the construction of the Baikal-Amur Railway housing included in the lists as of 01/01/2017, 1 family refused to relocate due to improvements in the living space and recognition of its suitability for rozhivaniya;

3) "Housing for young families." The actual funding of the subprogramme amounted to 34.2 million rubles.

As part of the subprogramme, in 2018, 41 young families improved their living conditions using social benefits;

4) "Resettlement of citizens from emergency housing stock, including taking into account the need to develop low-rise housing construction in the region". Starting from 2013, in order to implement the Decree of the President of the Russian Federation dated May 07, 2012 No. 600. 225 thousand square meters were settled on the territory of the Amur Region as of 01.01.2019. m of emergency housing, put into operation more than 140 apartment buildings.

Decree of the President of the Russian Federation of 05/07/2012 No. 600 as part of the obligations to fulfill the targets for the implementation of the program for the resettlement of citizens from emergency housing, established by order of the Government of the Russian Federation of September 26, 2013 No. 1743-r "On approval of a set of measures aimed at solving problems, related to the liquidation of the emergency housing stock "; executed.

In pursuance of paragraph 6 of Presidential Decree No. 204 of 05/07/2018, in order to eliminate emergency housing, a federal project has been developed to ensure the sustainable reduction of housing unsuitable for living, which provides for the resettlement of 119.4 thousand square meters in 2019-2024. m emergency housing stock.

5) "Improving the living conditions of certain categories of citizens living in the region." In 2018, 106.8 million rubles were allocated for the implementation of the activities of the subprogram, of which 61.7 million rubles were allocated from the regional budget and 45.2 million rubles were allocated from the federal budget.

As part of the subprogramme, in 2018, 8 activities were implemented:
1. Housing for certain categories of veterans and members of their families. In 2018, 16 participants of the event through social payments improved their living conditions, of which 6 participants in the hostilities are large fathers.

2. Providing large families with social benefits to improve housing conditions. Social benefits were provided to improve housing conditions for 6 large families: one family with 8 children from Svobodnensky district; one family with 6 children from Mikhailovsky, Konstantinovsky, Belogorsky, Bureysky and Ivanovsky districts.

3. Providing regional maternity capital to improve housing conditions for families who have given birth to (adopt) a third or subsequent child. In 2018, 184 families were provided with regional maternity capital to improve housing conditions.

4. The exercise of powers to provide housing for certain categories of citizens established by the Federal Law dated 12.01.1995 No. 5-ФЗ “On Veterans”, in accordance with the Decree of the President of the Russian Federation dated 07.05.2008 No. 714 “On the provision of housing for veterans of the Great Patriotic War of 1941–1945 years.” In 2018, 9 participants of the event improved their living conditions through social payments to improve housing conditions.

5. The exercise of powers to provide housing for certain categories of citizens established by the Federal Law of 12.01.1995 No. 5-FZ “On Veterans”. In 2018, 7 citizens who registered before 01.01.2005 improved their living conditions at the expense of the federal budget.

7. Providing housing for citizens discharged from military service (service), and persons equated to them. In the reporting period, housing conditions were improved for 3 citizens discharged from military service, and persons equated with them, who were registered as in need of improvement of housing conditions until 01/01/2005, by providing a lump sum payment for the purchase or construction of a dwelling;

8) “Ensuring the implementation of the main directions of state policy in the implementation of the state program.” The actual funding of the subprogram amounted to 66.3 million rubles:
9) “Implementation of measures of state support to citizens whose funds were raised for the construction of apartment buildings and whose rights have been violated.” 184.2 million rubles are provided for the implementation of the activities of this subprogram in the regional budget for 2018. According to the results of the last year, the actual execution amounted to 183.5 million rubles, which is 99.62% of the funds provided.

At the end of 2018, a state support measure was provided to 187 equity holders under 149 agreements;

10) “Development of urban development”. The planned actual volume of financing of the subprogram for 2018 amounted to 8.3 million rubles (funds from the regional budget).

The method of quotation request determined the contractor for the execution of the contract for the right to perform work to carry out the research work “Preparation of the draft adjustment plan for the territorial planning scheme of the Amur Region” (hereinafter the draft Scheme).

The Ministry of Construction and Architecture of the region with Grad Institute of Spatial Planning LLC (Omsk) signed a state contract dated 04.09.2018 No. 38-09 / 2018 for the implementation of the draft Scheme. The work in accordance with the state contract is carried out in two stages: stage 1 - from the date of concluding the State contract to 11/30/2018, stage 2 - from the end date of the first stage to 07/30/2019.

In the first stage, the project developer presented materials made in accordance with the terms of reference.

The request for quotation method determined the contractor for the execution of the contract for the right to perform the work “Project for adjusting the standards of urban planning in the Amur Region”.

The Ministry of Construction and Architecture of the region with the Scientific and Design Organization Southern Town-Planning Center LLC (Rostov-on-Don) signed a state contract dated 03.08.2018 No. 35-08 / 2018 for the implementation of the project.

The project was developed and posted on November 14, 2018 on the official website of the Government of the Amur Region for approval and proposals by interested bodies.

6.1. State Construction Supervision

The number of supervised objects in 2018 amounted to 201 objects, in 2017 - 210 objects. In 2018, 423 inspections were carried out, including 55 inspections of completed construction projects. The total number of site visits was 486, including 2 for participating in inspections at the appeals of municipal and executive bodies, 24 for participating in inspections of the prosecutor’s office. 72 instructions on elimination of violations were issued. In 2018, 55 conclusions were issued on compliance with the project of constructed (reconstructed) capital construction projects, in 2017 - 53 conclusions. The number of appeals of citizens and organizations regarding the quality of facilities for which conclusions on compliance were issued amounted to 5 appeals in 2018, and 4 appeals in 2017. In 2018, 109 appeals of citizens and 53 appeals of the prosecutor’s office were considered.

In 2018, 117 decisions on administrative offenses in the field of construction were issued in the amount of fines of 3.3 million rubles. The budget revenues of cities and regions of the region received administrative fines for committed administrative offenses in the amount of 3.1 million rubles, including: Blagoveschensk - 2.9 million rubles, Belogorsk - 25 thousand rubles, Svobodny - 10 thousand rubles, Tynda - 4 thousand rubles, Shimanovsk - 20 thousand rubles, Uglegorsk - 20 thousand rubles, Blagoveschensk district - 114 thousand rubles, Bureysky district - 20 thousand rubles, Konstantinovsky district - 1 thousand rubles, Oktyabrsky district - 10 thousand rubles. According to other decisions, executive documents were sent to the court bailiff service in a timely manner for the enforcement of enforcement measures.

6.2. State Housing Supervision

In 2018, in order to exercise state control over the safety and use of the housing stock of the Amur Region, 5,988 thousand square meters were examined. m. of residential buildings.
In 2018, the Amurzhilinspeksia did not carry out scheduled inspections. During the reporting period, 618 unscheduled inspections were conducted. In general, unscheduled inspections were conducted to examine complaints and appeals of citizens, state authorities and local self-government, as well as to monitor the implementation of orders issued based on the results of previous inspections. As a result of consideration of appeals and unscheduled inspections, 5,159 violations were identified.

The total number of inspections, based on the results of which, on the facts of the revealed violations, cases of administrative offenses were instituted, amounted to 345.

The Amurzhilinspeksia examined 345 administrative cases.

The total amount of administrative fines imposed amounted to 4.5 million rubles.

7. Housing and communal services

In 2018, the following subprograms were implemented as part of the state program “Modernization of the housing and communal complex, energy conservation and energy efficiency in the Amur Region”:

1. “Ensuring accessibility of utilities, improving the quality and reliability of housing and communal services”. The following activities were carried out under the subprogramme:

a) ensuring the functioning and development of the system for supplying the population with electricity generated by diesel power plants. In 2018, a subsidy was granted to 6 organizations for a total amount of 45.3 million rubles;

b) reimbursement to legal entities of a part of the costs associated with the provision of utilities in the Far North and equivalent areas. In 2018, a subsidy was provided to legal entities for part of the costs associated with the provision of utilities in the Far North and equivalent localities, BAM Utility Systems OJSC in the amount of 31.2 million rubles;

c) in accordance with the Law of the Amur Region dated December 24, 2012 No. 131-OZ "On preferential tariffs for heat energy (power), heat carrier to heat supplying organizations for the population of the Amur Region", the heat supply organizations were compensated for the shortfall in income arising from the establishment of preferential tariffs for the population of the Amurskaya area. In 2018, the subvention was sent to all municipalities of the region for a total amount of 1,181.7 million rubles for the subsequent provision of subsidies to heat supply organizations. In 2018, 74 heat supply organizations received a subsidy;

d) in accordance with the Law of the Amur Region dated 08.07.2013 No. 198-OZ “On Support of Heat-Supply Organizations in the Amur Region” and the Procedure for Providing a Subsidy to Heat-Supply Organizations for the Reimbursement of Part of the Costs Associated with Providing Utilities that Caused the Formation of Accounts Receivable of the Population or receivables of public service providers arising as a result of the occurrence of public debt for the provision of public heat supply services recognized in anovlennom order impossible to recover the right to demand that carries performer utilities heat supply organization, approved by Decree of the Regional Government of 10.2.2013 number 467, in 2018 provided grants totaling 29.0 mln. rubles.

The provision of a subsidy made it possible to partially repay the receivables of heat supplying organizations and facilitated timely settlements with fuel suppliers and for electricity consumed;

e) in 2018, as part of modernization measures, 6 boilers were overhauled, 91 boilers were replaced, 20.5 km of heating and water supply networks were replaced and repaired, 5 water towers were overhauled, 4 chimneys were replaced, 2 wells were drilled. The measures taken have allowed to reduce the level of depreciation of utility infrastructure from 53.3% to 52.9%;

f) for the purpose of timely settlements for fuel and electricity, in order to ensure uninterrupted passage of the heating period, subsidies were provided to heat supply organizations:
for the reimbursement of part of the costs incurred in connection with the provision of public services, in terms of the difference between the amount based on the estimated volume of useful supply of thermal energy for the established economically sound tariff for thermal energy (excluding the cost of fuel and electric energy), and the amount based on the actual amount of thermal energy for the established economically justified tariff for thermal energy (excluding the cost of fuel and electric energy), in the amount of 656.5 million rubles;

to reimburse part of the costs incurred in connection with the provision of utilities for fuel and electric energy costs that are greater than those taken into account by the authorized executive body of state power in the region, performing functions in the field of state regulation of prices and tariffs for products (goods, services), when reasonable tariffs for thermal energy in the amount of 943.7 million rubles.

2. "Overhaul of apartment buildings in the Amur region."

In 2018, as part of the state program "Modernization of the housing and communal complex, energy conservation and energy efficiency in the Amur Region for 2014 - 2020", the following subprogram "Overhaul of apartment buildings in the Amur Region" was implemented. The following activities were carried out:

As part of the short-term plan for 2017 - 2019, approved by order of the Ministry of Housing and Communal Services of the Amur Region dated September 15, 2016 No. 299-od (as amended on December 7, 2018 No. 379-od), overhaul of 85 apartment buildings was carried out in 2018:

15 apartment buildings in Blagoveshchensk;
7 apartment buildings in Tynda;
17 apartment buildings in Belogorsk;
8 apartment buildings in the city of Skvorodino;
6 apartment buildings in the town of Svobodny;
1 apartment building in Raychikhinsk;
3 apartment buildings in Zavitinsk;
1 apartment building in the city of Shimanovsk;
1 apartment building in ZATO Tsiolkovsky;
5 apartment buildings in the urban settlement Progress;
2 apartment buildings in the Blagoveshchensk district;
3 apartment buildings in the Ivanovo district;
1 apartment building in Belogorsky district;
2 apartment buildings in the Magdagachinsky district;
1 apartment building in the Konstantinovsky district;
4 apartment buildings in Seryshevsky district;
1 apartment building in the Tambov district;
1 apartment building in the Oktyabrsky district;
2 apartment buildings in the Skvorodinsky district;
3 apartment buildings in the Tynda district;
1 apartment building in the Svobodnensky district
6.17 thousand people improved housing conditions.

For the implementation of the project "Formation of a comfortable urban environment" in 2018, the budget of the Amur Region provided for 198.1 million rubles, including 160.4 million rubles of federal funds, 28.3 million rubles of funds of the subject and 9.4 million rubles of funds of budgets of municipalities.

Within the framework of the project, the event "Support for state programs of the constituent entities of the Russian Federation and municipal programs for the formation of a modern urban environment" was implemented, the budget of which amounted to 188.8 million rubles, as well as the event "Support for the arrangement of public recreation places (city parks)" with a budget of 9.4 million rubles.

The recipients of the 2018 grant are the administrative center of the region, single-industry cities, as well as the urban settlement Progress, urban settlement Magdagachi, s. Ivanovka, Ivanovo district.

Within the framework of program activities, improvement of 46 local territories was completed (Blagoveshchensk - 24, Belogorsk - 5, Svobodny - 6, Raychikhinsk - 2, Tynda - 3, Progress - 5, Magdagachi - 1), 7 public territories (Blagoveshchensk - 1, Belogorsk - 2, Svobodny - 1, Raichikhinsk - 1, Tynda - 1, s. Ivanovka - 1), as well as a city park in Raichikhinsk was landscaped.

As of December 31, 2018, all work was completed and paid in full.

8. Investments

In 2018, the Amur Region received investments for the development of the economy and social sphere of 239.7 billion rubles, which is 10.1% more than in 2017.

The most attractive for investment are "transportation and storage", "manufacturing", "mining". 201.5 billion rubles of investments were invested in these sectors of the economy, or 87.4% of the total.

The increase in investment in fixed assets in 2018 to the level of 2017 is due to increased funding for the construction of the Vostochny cosmodrome, major investment projects in the gas industry: the construction of the Power of Siberia gas pipeline and the Amur gas processing complex, the construction of the Autoclave and Hydrometallurgical Plant at Pokrovsky Zolotnore field.

The main sources of financing investments in fixed assets were borrowed funds, which accounted for 51% of all investments, of which budget funds - 3.3%, funds of higher organizations - 41.6%, other borrowed funds - 0.9%.

In the Amur Region, three territories of advancing socio-economic development (hereinafter referred to as the TOP) have been created and are functioning: Belogorsk, Priamurskaya, and Svobodny.

For the period from 2015 to 2018, 16 companies that implement investment projects with a total investment of 932.8 billion rubles and the planned creation of 4884 jobs became residents of the Amur Oblast TOP.

Dynamics of attracting TOR residents: 3 residents in 2015, 4 residents in 2016, 4 residents in 2017, 7 residents in 2018.

As of 01.01.2019, residents have invested more than 140 billion rubles and 674 new jobs have been created.

6 residents are registered at the Belogorsk TOP of agricultural orientation: LLC Amursky Oil Extraction Plant LLC, Belkhleb LLC, Bellesprom LLC, Amurekoresurs LLC, Fortress LLC, International Business Unity LLC.

The volume of capital investments of residents of the TOP "Belogorsk" in the implementation of the relevant types of economic activity is 4.6 billion rubles, 3.4 billion rubles were disbursed as of 01.01.2019. As a result of the implementation of investment projects, 624 new jobs will be created, of which 461 jobs are currently created.

The bakery shop of a resident of LLC Belkhleb LLC (April 2016) and the first stage of a plant for the deep processing of soybean of a resident of Amursky Oil Extraction Plant LLC (July 2017) were commissioned.
The financing of infrastructure construction activities of the Belogorsk ASEZ is financed from the budget of the Amur Region and extrabudgetary sources in the amount of 46.2 million rubles.

In 2018, Belogorsk TOR attracted federal funding for the creation of energy infrastructure facilities for TOR residents and potential investors in the amount of 883.2 million rubles. The implementation period is 2018–2021.

6 residents are registered at the Priamurskaya TOP of industrial, transport and logistics specialization: LLC S Technologiya, LLC Amurskaya Energeticheskaya Kompaniya, LLC Agrokhim DV, LLC Agro Fabrika, LLC EcoLife, LLC INPROM.

The volume of capital investments of residents of the Priamurskaya TOP in the implementation of the relevant types of economic activity is 124.5 billion rubles, 2.3 billion rubles were spent on 01.01.2019. As a result of the implementation of investment projects, 1,470 new jobs will be created; to date, 48 jobs have been created.

The logistic complex for storing pesticides and agrochemicals of a resident of LLC Agrohim DV was put into operation (April 2018).

In 2018, the boundaries of the Priamurskaya TOP were expanded to implement an investment project for the construction of a feed mill of a resident of Agro Fabrika LLC.

Financing of measures for the construction of infrastructure facilities of the Priamurskaya TOP is carried out at the expense of residents’ own funds.

TOR “Svobodny” is the largest in the Far East in terms of declared investments. This area is considered as an integrated gas-chemical cluster.

4 residents are registered: LLC Gazprom pererabotka Blagoveshchensk, LLC Production and trading company Bees-Svobodny, LLC Smena, LLC Industry.

The volume of capital investments of residents of the Svobodny TOP is 803.8 billion rubles, 135.6 billion rubles were spent on 01.01.2019. As a result of the implementation of investment projects, 2,789 new jobs will be created; to date, 165 jobs have been created.

Anchor resident of Gazprom Pererabotka Blagoveshchensk LLC is implementing an investment project for the construction of the Amur Gas Processing Plant, which will become the largest natural gas processing company in Russia and the second largest in the world.

In 2018, concrete production complexes for residents of LLC Production and Trade Company Bees-Svobodny, Smena LLC, and Industry LLC were launched in production mode.

The financial support for measures to create the infrastructure of the Svobodny TOP is planned at the expense of the federal budget in the amount of 12.5 billion rubles for the construction of a residential neighborhood for 5 thousand inhabitants in the town of Svobodny for employees of the Amur gas processing plant. The development of mechanisms for the receipt and development of financial resources.

The list of investment projects in the Far East to obtain infrastructural state support at the expense of the federal budget includes two investment projects implemented in the Amur Region.

The declared volume of private investments is 36.5 billion rubles, the volume of support in the form of subsidies from the federal budget is 4.9 billion rubles.

In fact, the number of jobs amounted to 2,927 people, of which 37 jobs have been created since receiving support.
Within the framework of the investment project "Production and logistics complex for storing vegetable raw materials with equipment for processing, drying, transshipment of grain and an integrated breeding and seed production center for the production of seeds of agricultural crops (including soybeans) 1–20 thousand tons," it is planned to allocate subsidies from the federal budget for infrastructure in the amount of 182 million rubles, including 178.82 million rubles for the reconstruction of the section of the Varvarovka-Preobrazhenovka highway, technological connection to the electric power Kim networks 3.18 million. rubles. The investor is Amuragrokompleks LLC. The project is included in the List in accordance with the order of the Government of the Russian Federation of August 27, 2016 No. 1806-r. No budgetary funding was provided.

The volume of declared private investments is 1.6 billion rubles.

The volume of frequent investments made as of January 1, 2019 is 1.1 billion rubles.

The construction of complexes for part-time and storage of grain with a total storage capacity of 104 thousand tons and an integrated breeding and seed-growing center for seed production of 1–20 thousand tons have been completed; a complex with a storage capacity of 20 thousand tons per second is under construction. Annovka Ivanovo district.

Creation of 52 jobs was declared, 44 jobs were actually created, of which 16 projects have been created since the project was included in the List.

9. State regulation of prices and tariffs

The number of regulated organizations for which prices (tariffs) are set by the state regulation of prices and tariffs in the region, as of 01.01.2018 amounted to 425 business entities, including:

- in the field of heat supply - 142;
- in the field of power supply - 26;
- in the field of cold water supply - 102;
- in the field of hot water - 11;
- in the field of water disposal - 56;
- in the field of MSW disposal - 5;
- in other areas of regulation - 83.

For 2018, by the order of the Federal Antimonopoly Service of Russia dated 13.10.2017 No. 1354/17 "On Limit Levels of Tariffs for Electric Energy (Power) for 2018", the maximum and minimum levels of the average tariff for electric energy with a calendar breakdown were set for the Amur Region:

- from 01/01/2018 to 06/30/2018 - 320.95 kopecks / kWh and 342.66 kopecks / kWh respectively;
- from 07/01/2018 to 12/31/2018 - 320.95 kopecks / kWh and 355.68 kopecks / kWh respectively.

The actual value of the average selling tariff (excluding the costs of implementing investment programs) for electric energy for consumers in the Amur Region for 2018 amounted to:

- from 01/01/2018 to 06/30/2018 - 332.41 kopecks / kWh (excluding VAT);
- from 07/01/2018 to 12/31/2018 - 343.07 kopecks / kWh (excluding VAT).

The increase in average electricity tariffs for consumers of the Amur Region, determined by the state regulation of prices and tariffs in the region, from 01.01.2018 to 06.30.2018 and from 01.07.2018 to 12.31.2018 in relation to the maximum minimum tariff levels determined by the Federal Service according to tariffs, for 2018 amounted to 11.46 kopecks / kWh, or 3.57%, or 22.12 kopecks / kWh, or 6.89%, respectively.
Reduction of average electric energy tariffs for consumers of the Amur Region, determined by the state regulation of prices and tariffs of the region, for the period from 01/01/2018 to 06/30/2018 and from 01/07/2018 to 12/31/2018 in relation to the maximum maximum tariff levels determined by the Federal Service according to tariffs, for 2018 amounted to 10.25 kopecks / kW / h or 3.0%, and 12.61 kopecks / kW / h, or 3.55%, respectively.

Based on the results of tariff regulation for 2018, unreasonable expenses - 6640.48 million rubles were excluded by the regulatory body for utility services and in the electric power industry.

The actual prevailing growth of established tariffs in the housing and utilities sector on average in the Amur Region for 2018 relative to 2017 is presented in Table 1.

</tr>
</tbody>
</table>

Thus, in the first half of 2018, tariffs were set without growth by 2017, their growth occurred from 07/01/2018.

Tariffs for electric energy for the population in the first half of 2018 were set at the level of December 2017, since the second half of 2018 their growth amounted to 103.4% compared to the first half of 2018.

The growth of electricity tariffs in 2018 on average compared to 2017 for other consumers amounted to 98.91% - 103.8% depending on the voltage level.

In accordance with the Law of the Amur Region dated 12.24.2012, preferential tariffs for thermal energy are established for the population of the region. The establishment of preferential tariffs for thermal energy is aimed at ensuring accessibility for the population of the total amount of utility bills and ensuring compliance with the Housing Code of the Russian Federation on limiting the total amount of utility bills.

Federal Law dated December 28, 2013 No. 417-ФЗ introduced Article 157.1 in the Housing Code on limiting the increase in the amount of utility bills paid by citizens, in accordance with which it is not allowed to increase the amount of utility bills made by citizens above the limit (maximum) indices of changes in fees in municipalities approved by the highest official of the constituent entity of the Russian Federation (head of the highest executive body of state power of the Russian Federation).

By order of the Government of the Russian Federation of October 26, 2017 No. 2353-r, the maximum (maximum) indices for changing the aggregate amount of citizens' fees for utility services from 07/01/2018 in the constituent entities of the Russian Federation were established. In the Amur Region, the marginal growth index of aggregate utility bills is set at 3.8%. The maximum
permissible deviation of this index for individual municipalities was established for the Amur Region by order of the Government of the Russian Federation dated 01.11.2014 No. 2222-r for 2015-2018 in the amount of 2.5%.

Accordingly, by the decree of the governor of the region, the maximum (maximum) growth indices for the aggregate amount of utility bills for each municipality of the region were established.

In accordance with the established indices, the maximum (maximum) increase in the total amount of fees for citizens in the Amur Region should not exceed 6.3% from July 1, 2018. At the same time, from January 1, 2018 to June 30, 2018, the size of the payment for utility services (under comparable conditions, that is, with the same set of utility services and their volumes) should correspond to the size of the payment as of December 31, 2017.

The implementation of the resolution on the restriction of citizens' fees with limit indices on 07/01/2018 was achieved by setting preferential tariffs for thermal energy, the values of which were set in amounts that would increase the amount of utility bills paid by citizens within the framework of established limit indices, i.e. not higher than 6.3%.

Величина льготных тарифов значительно ниже установленных экономически обоснованных тарифов на тепловую энергию для потребителей теплоснабжающих организаций области. На возмещение суммы выпадающих доходов, возникающих у теплоснабжающих организаций в связи с применением льготных тарифов на тепловую энергию для населения, предусмотрены финансовые средства в бюджете области на 2018 год в размере 840,0 млн. рублей.

Since the second half of 2018, prices for liquefied gas sold to the population through group storage units have been set with an increase of 105.5%. The price of liquefied gas sold in cylinders increased from 3.8% to 7.9% from the second half of 2018. In the first half of 2018, gas tariffs remained at the level in force in December 2017. The amount excluded from the regulation of unreasonable costs is 28.19 million rubles.

Marginal retail prices for solid fuels, household stove fuel sold to the population for 2018 are set by the municipalities of the region. The growth rate of retail fuel prices in force in the second half of 2018 ranged from 100% to 111.8% of the level of prices in force in the first half of 2018. The amount excluded in the regulation of unreasonable costs is 0.63 million rubles.

The main reasons for the increase in tariffs in 2018 are the increase in prices for fuel, rail and road transport services, materials, fuels and lubricants, growth in labor costs in accordance with the Industry Tariff Agreement.

10. Tax policy

In 2018, according to preliminary estimates, tax benefits in the amount of 442.2 million rubles were provided, which is 20.5% more than in 2017 (366.7 million rubles).

72% of the total amount of tax benefits (or 318.2 million rubles) falls on the property tax of organizations, of which 272 million rubles were provided to agricultural producers who produce agricultural products and (or) grow fish and process and sell them.

15% of the total amount of benefits provided (or 65.8 million rubles) were preferences on corporate income tax. The main taxpayers applying the reduced tax rate are residents of territories of advanced social and economic development (65.6 million rubles).

Between the Government of the region and organizations 2 tax agreements have been concluded (Russian Railways OJSC, Turanles JSC). According to preliminary estimates, the amount of benefits for the profit tax of these organizations amounted to 0.3 million rubles, and for property tax - 4.1 million rubles.
8.5% of the total amount of tax benefits provided for transport tax (or 37.8 million rubles). In 2018, an additional preferential category was established, providing for exemption from tax payment of war veterans for one vehicle with a capacity of up to 150 hp, taking into account the criterion of means of poverty, which is valid from 2019.

4.5% of the total amount of tax benefits (or 20.3 million rubles) were preferences for simplified and patent taxation systems for which two-year tax holidays are applied in the region (tax rate of 0%).

In order to stimulate the development of socially oriented sectors of the region's economy, a law of the Amur Region was adopted in 2018, establishing lower tax rates on a simplified tax system for organizations and individual entrepreneurs operating:

care for the elderly and disabled with the provision of accommodation;

care for the elderly and the disabled without security.

11. Development of small and medium enterprises

The main priority areas for the development and support of entrepreneurship in the Amur Region are determined in accordance with the subprogram "Development of small and medium-sized enterprises in the Amur Region" of the state program "Economic Development and Innovative Economy of the Amur Region for 2014 - 2020", approved by the Government of the Amur Region from 09/25/2013 No. 445.

The priority areas of the subprogramme are the reduction of administrative barriers, the financial support of small and medium-sized enterprises, the increasing role of municipalities in the development of entrepreneurship in regions, including single-industry towns, the creation and development of support infrastructure, the development of human resources for entrepreneurs, the creation of new and the preservation of existing jobs.

In 2018, 141.7 million rubles were provided for the support and development of small business at the expense of the regional and federal budgets, including 76.8 million rubles - the regional budget and 64.9 million rubles - the federal budget. In fact, 134.5 million rubles were used, or 95% of the plan (including 75.3 million rubles from the federal budget (98% execution) and 59.1 million rubles from the regional budget (91% execution).

1. At the expense of the federal and regional budgets:

a subsidy was granted to single-industry towns for the support and development of small business - 9.5 million rubles, including Svobodny - 1.4 million rubles, Tynda - 2.0 million rubles, Raichikhinsk - 1.3 million rubles and Belogorsk - 4.8 million rubles. As a result of competitive procedures conducted by single-industry towns, 1.7 million rubles remain unused, including 1.5 million rubles of the federal budget and 0.2 million rubles of the regional budget. Actual performance was 85%. The main reason for the non-appropriation of funds by single-industry towns was the lack of need for small and medium-sized enterprises to support in the areas defined by Order of the Ministry of Economic Development of Russia dated 07.05.2018 No. 67 (payment of interest on loans, leasing, franchises, social entrepreneurship). Monotowns provided support to 13 entities;

funded activities to involve young people in entrepreneurial activity - 5.2 million rubles. As a result of this measure, the number of small businesses created by individuals under the age of 30 years (inclusive) amounted to 68 units;

a cluster development center (hereinafter - CCR) was created - 14.9 million rubles. The work of the CCR provides for the creation of tourist-recreational and agro-industrial clusters. As of 01/01/2019, more than 60 SMEs have become cluster members.

For current and potential participants in the tourism and recreation cluster, the Amur International Tourism Forum "AMURTRAVEL" was held. Within the framework of this forum, a presentation of the tourism opportunities of the Amur Region was made - the routes of internal and inbound tourism of the region. The forum participants were Russian and foreign tour operators, representatives of the entrepreneurial and expert community, Russian and foreign tourists, private pilots (owners of airplanes, helicopters, hang-gliders, paragliders, balloons, etc.), interested organizations, students.
For agribusiness entities, 4 visiting round tables were held (in the territories of Seryshevsky, Konstantinovsky, Mikhailovsky and Arkharin districts) and 2 seminars highlighting cooperative principles and areas of financial support for agricultural producers.

In collaboration with a partner of the FSBEI HE Far Eastern GAU, normative documentation has been prepared on the creation of 6 cooperatives in the region.

CCR provided support in obtaining 5 certificates by seed farms, 14 declarations for new types of goods.

Organizational events of the CCR were attended by over 600 participants.

An export support center (hereinafter - CPE) has been set up - 14.9 million rubles. The Export Support Center was established in July 2018. Thanks to him, Amur companies traveled to Japan, where they visited leading enterprises in the food industry, exchanged contacts and met potential partners. With the support of the Center, exporters participated in an international exhibition in South Korea, where they also presented their products. Since the beginning of the CPE, 5 Amur companies have concluded 12 export contracts, two of which entered the foreign market for the first time.

An additional capitalization of the regional guarantee organization was carried out - 32.9 million rubles. In 2018, 80 surety agreements were concluded in the amount of 367.7 million rubles, while loans were issued in the amount of 1.0 billion rubles.

The share of small and medium-sized enterprises that used the services of the Fund in the total number of small and medium-sized enterprises in the Amur Region is 0.30%.

The share of loans granted to small and medium-sized enterprises with the involvement of the Fund’s guarantee in the total volume of loans granted to small and medium-sized enterprises in the Amur Region is 4.71%.

An enterprise support center was funded - 25.74 million rubles. In total, 5,805 people used the services of the Enterprise Support Center in 2018. Among them, 3,845 small and medium-sized enterprises. Entrepreneurs and organizations from all over the region could take part in the events of the Entrepreneurship Support Center.

One of the main directions of the Center for Entrepreneurship Support is the conduct of training events (including in the form of seminars, trainings) for small and medium-sized businesses and their employees. The share of trained in the total number of small and medium-sized enterprises in the Amur Region amounted to 6.31% (1697 small and medium-sized enterprises and their employees).

The Center for Entrepreneurship Support under the programs of JSC "Corporation" SME "conducted 12 trainings, which were attended by 213 participants.

As part of the activities of the Entrepreneurship Support Center, training events and consultations were held for beginners of small and medium-sized enterprises and individuals wishing to start their own business. As a result, out of 187 individuals who attended the events, 109 subsequently registered their business.

184 small and medium-sized enterprises took advantage of the support of the center and took part in exhibition and fair events.

2. At the expense of the regional budget:

Part of the costs associated with the acquisition of equipment was reimbursed - 15.5 million rubles. Based on the results of the competitive procedures, 53 entities received subsidies;

a subsidy to the leasing company was provided in the amount of shortfalls in income arising from the provision of a single or small business entity with a lump-sum discount when paying the down payment under a leasing agreement - 12 million rubles. An agreement has been concluded with Delta Leasing Company LLC. According to the results of the examination of documents, the subsidy of the leasing company amounted to 7.98 million rubles. Actual use of funds was 67%. The reason for non-development is the absence of leasing agreements that comply with the conditions for providing financial support;

Grants were provided to 15 start-up entrepreneurs. 5 million rubles were allocated for this event. Actual use of funds - 100%;

a subsidy was granted to 9 entities for the implementation of social projects. 3 million rubles were allocated for the event.
In addition to financial and advisory support, entrepreneurs are provided with property support. In order to promote business development, lists of state and municipal property have been compiled for leasing small and medium-sized enterprises (including at preferential rental rates).

The composition of the property is constantly replenished, as of 01.01.2019 791 objects are included. The lists can be found on the websites of the Ministry of Property Relations of the Amur Region (mio.amurobl.ru) and local authorities.

Together with the business, the development of an interactive map of property support for small and medium-sized enterprises is being completed, which allows for quick viewing of free real estate objects of any municipality, characteristics, photos of the object and contacts of those responsible.

12. International, foreign economic and interregional relations

In 2018, contacts with foreign partners were carried out in the following areas: trade and economic cooperation, implementation of projects for the construction of cross-border transport infrastructure objects in the Amur Region (border bridge, cableway across the Amur River (Heilongjiang) in the area of Blagoveshchensk (Russian Federation) - Heihe (China)), cooperation in the field of agriculture, culture, education, environmental protection, medicine, sports, tourism, organization of freight and passenger transportation between points s and passes Blagoveshchensk Kheikhe et al.

In 2018, a total of 145 international events were held. The region was visited by 82 foreign delegations. On an annual basis, together with the Chinese side, the installation and operation of floating (pontoon) bridges across the Amur River for passenger and freight transportation is organized.

Last year, the participation of regional delegations in the following major international events was held and organized in the Amur Region:

international friendly hockey match on the border river Amur (January 2018);
participation of the region’s delegation in the Opening Ceremony of the “Years of Russian-Chinese Interregional Cooperation” (February);
“Russian-Chinese Exhibition of Border Cities - 2018” (simultaneous holding of the Amur International Exhibition and Forum AmurExpoForum-2018 and the International Trade and Economic Fair in Heihe) (May 2018);
participation of the region’s delegation in the 29th Harbin International Trade and Economic Fair (PRC) (June 2018);
9th International Festival “Russian-Chinese Fair of Culture and Art” (June 2018);
International Tourism Forum ‘AMURTRAVEL’ (August 2018);
IV Eastern Economic Forum (September, Vladivostok);
joint events to mark World Tourism Day (September 2018);
participation of the region’s delegation in the First Russian-Korean Forum in Pohang (Republic of Korea) (November 2018);
business mission of the region’s enterprises to Japan (December 2018);
traditional humanitarian exchanges between delegations of the Amur Region and Heilongjiang Province (exchange of women’s delegations in the framework of the celebration of International Women’s Day on March 8, exchange of delegations of older people, exchanges of cultural groups);
Organized the participation of regional delegations in the following meetings of the intergovernmental commissions:
22nd meeting of the Sub-Commission on Cooperation in the Field of Transport of the Commission on the Preparation of Regular Meetings of the Heads of Government of Russia and China (August, St. Petersburg);
22nd session of the Joint Russian-Chinese Commission on the Border (June, Moscow);

Foreign economic relations.

In 2018, the Amur Region carried out trade and economic relations with 72 countries (an increase of 9.0% compared to 2017 - 66 countries). Traditionally, the main trading partner of the region is China, which accounts for an average of 84% of the region’s foreign trade.

For the reporting period, foreign economic activity in the region was carried out by 499 participants (compared to the previous year, the indicator increased by 10.4%).

The foreign trade turnover of the region in 2018 amounted to 681.7 million US dollars, which is 165.0 million US dollars more than in 2017 (32%), while exports increased by 68.0 million US dollars (by 19.7%) and amounted to 369.2 million US dollars, while imports increased by 104.0 million US dollars (1.5 times) and amounted to 312.5 million US dollars. In general, the share of exports in the region’s trade turnover with foreign countries for the indicated period amounted to 54.2%, the trade balance was positive - plus 56.7 million US dollars.

The share of the region’s foreign trade in the total turnover of the Far Eastern Federal District amounted to 1.98% (1.8% in 2017).

At the end of 2018, the following countries became the largest counterparties of the region in foreign trade:

- China - 569.2 million US dollars, or 83.5% of the value of trade;
- Turkey - 33.8 million US dollars, or 5%. In 2017, trade with Turkey was negligible;
- Mongolia - $ 26.0 million, or 3.8%. Decrease in value by 4.9%, or by 1.4 million US dollars;
- Finland - 21.3 million US dollars, or 3.1%. Increase in value by 8.1 times or by 18.7 million US dollars;
- Belarus - 6.1 million US dollars, or 0.9%. An increase in value by 1.5 times, or by 2.1 million US dollars.

In the region’s export structure, the largest share was occupied by deliveries of the following products: food products and agricultural raw materials - 45.9%, electricity - 44.4%, wood and timber - 8.8%, chemical products - 0.4%.

In the reporting period, there was an increase in the share of non-primary exports, mainly to the PRC (agricultural products (soybean, corn) and food products (soybean oil, flour, chocolate products, confectionery, etc.).

In the structure of imports, the largest share was occupied by deliveries of the following types of products: machinery, equipment and vehicles - 49.4%, food products and agricultural raw materials - 11.4%, metals and metal products - 9.9%, textile products and shoes - 6.9%.

The region’s foreign trade turnover with China amounted to 569.2 million US dollars, which is 25.2% more than in 2017. At the same time, exports increased by 23.1% and amounted to 337.9 million US dollars, imports from China increased by 28.3% and amounted to 231.4 million US dollars.

The volume of deliveries of food products and agricultural raw materials to China in 2018 amounted to:

- soybeans - in the amount of 76.6 million US dollars;
- soybean oil - in the amount of 17.5 million US dollars;
- honey - in the amount of 193.8 thousand US dollars.

Interregional cooperation.
Amur Oblast has concluded agreements on trade, economic, scientific, technical and cultural cooperation with 18 constituent entities of the Russian Federation.

The largest trading partners of the region were the Republic of Sakha (Yakutia), Khabarovsk Territory, Primorsky Territory and the Jewish Autonomous Region.

The main items of supplies from the Amur Region to the Far Eastern regions are food products (dairy and meat products, soybean processing products - soybean oil and meal, confectionery, etc.), cereals and animal feed; the main import positions in the region from the subjects of the Far Eastern Federal District: fuel products (coal, fuels and lubricants), industrial products (building materials, metal structures, etc.), vehicles and machinery.

In 2018, and on an annual basis, work was carried out to attract representatives of official and business circles of the regions to participate in the events of the Amur International Exhibition and Forum AmurExpoForum 2015. At AmurExpoForum-2018, participants from the Moscow Region, Yekaterinburg, Primorye, Khabarovsk Territory, the Jewish Autonomous Region, the Republic of Sakha (Yakutia) and other regions of the Russian Federation presented their products and services to exhibition guests. Also, 19 foreign companies from China participated in the forum.

13. The consolidated budget of the region

The budget system of the region is represented by the regional budget, the budgets of 9 urban districts, 20 municipal districts and 257 rural (urban) settlements.

In 2018, the revenues of the consolidated budget of the region amounted to 65.3 billion rubles, which is 12.4%, or 7.2 billion rubles, more than the revenues of the previous year.

The tax and non-tax revenues of the consolidated budget of the region amounted to 51.2 billion rubles, which is 7.1%, or 3.4 billion rubles, more than the revenues of 2017. Gratuitous receipts amounted to 14.1 billion rubles, which is 36.9%, or 3.8 billion rubles, more than the receipts of 2017.

In tax and non-tax revenues, the largest amounts of revenue since the beginning of the year fall on:

- personal income tax - 20.1 billion rubles, or 39.3% of the total amount of tax and non-tax revenues received;
- corporate profit tax - 9.4 billion rubles, or 18.4%;
- corporate property tax - 8.1 billion rubles, or 15.8%.

Revenues accumulated in the region are distributed between the levels of the budget system in the following ratio: federal budget - 11.0%, regional budget - 32.7%, local budgets - 20.4%, off-budget funds - 35.9%.

The execution on expenses of the consolidated budget of the Amur Region for 2018 amounted to 64.8 billion rubles, which is 12.3%, more than the execution of 2017. The largest share in the structure of expenses is taken by expenses for:

- education - 17.0 billion rubles, or 26.3%;
- social policy - 15.6 billion rubles, or 24.1%;
- national economy - 9.7 billion rubles, or 15.0%;
- Housing and communal services - 7.3 billion rubles, or 11.3%;
- national issues - 5.2 billion rubles, or 8.0%.

As of 01.01.2019, the consolidated budget of the Amur Region was executed with a surplus of 0.5 billion rubles.

Sources of financing the deficit of the consolidated budget of the region were:
1) budget loans from other budgets of the budget system of the Russian Federation to replenish the balances on the accounts of the budgets of the constituent entities of the Russian Federation (local budgets) in the amount of 2.4 billion rubles, repaid - 2.4 billion rubles;

2) repaid budget loans from other budgets of the budget system of the Russian Federation to partially cover the regional budget deficit in the amount of 0.7 billion rubles;

3) loans of credit organizations in the currency of the Russian Federation in the amount of 5.5 billion rubles, bank loans repaid - 5.0 billion rubles.

The return of budget loans granted to the budgets of municipalities and urban districts from the regional budget in the amount of 7.6 million rubles.

According to the results of monitoring and evaluation of the quality of regional finance management, conducted by the Ministry of Finance of the Russian Federation in 2017, the Amur Region was awarded the II degree of regional finance management quality, which is characterized as an appropriate quality of regional finance management.

14. E-government

The Amur Region is one of the entities in which the proportion of citizens using the mechanism of obtaining state and municipal services in electronic form exceeded the planned value of the indicator established by Decree of the President of the Russian Federation of 05.07.2012 No. 601 “On the main directions of improving the public administration system” and for three years, holds the leading position among the subjects of the Far Eastern Federal District. According to the Federal State Statistics Service, the share of citizens using the mechanism for receiving state and municipal services in electronic form in 2018 amounted to 77.9%.

According to the results of monitoring carried out in 2018 in order to ensure the quality and accessibility of mass and socially significant public services to citizens, as well as to study the degree of satisfaction of citizens with the quality of government activities in the provision of public services, the overall level of satisfaction with the quality of services was estimated at 98%.

In order to ensure equal access to public services in each municipality of the Amur Region, multifunctional centers for the provision of state and municipal services (hereinafter referred to as the MFC) operate. Currently, 23 MFCs have been opened in the Amur Region. In MFC, you can get 121 state and 989 municipal services in various fields of activity - citizenship and registration, land and property relations, social security, taxation, etc. In 2018, the MFC accepted 443.6 thousand applications for the provision of state and municipal services.

In order to expand the list of services and increase the availability of services to representatives of small and medium-sized enterprises, in 2018, specialized windows for accepting documents on the provision of state and municipal services in the field of opening and developing a business were opened on the basis of the MFC Blagoveshchensk.

According to the rating conducted by the Ministry of Economic Development of Russia, the Amur Region scored more than 80 points out of 100 possible and entered the group of subjects of the Russian Federation with high efficiency in organizing the activities of the IFC network.

In order to increase the information openness of the activities of the executive bodies of state power of the region and local self-government bodies of the region, the effectiveness of interaction between authorities and society, the Government of the region has created a single multi-service platform of the sites of the Government of the Amur Region. At the moment, the platform of sites includes the Portal of the Government of the Amur Region and typical sites of executive bodies of state power.

In accordance with Federal Law dated 09.02.2009 No. 8-ФЗ “On providing access to information on the activities of state bodies, local self-government bodies”, as well as in order to organize digital interaction of citizens of the region with regional authorities on improving the quality of life and creating a comfortable urban environment, work has begun on the creation of the Internet resource “Open Region Amur Region”, which is scheduled to be commissioned in 2019.
In 2018, the federal project to eliminate the digital divide was successfully completed; Internet access points were created in 118 settlements of the region with a population of 250 to 500 people.

In pursuance of the order of the President of the Russian Federation Putin V.V. In 2018, 72 medical organizations of the region are connected to high-speed Internet. Since 2017, 118 medical organizations of the region have been connected to high-speed Internet.

During the implementation of these projects, Rostelecom PJSC built up fiber-optic communication lines (hereinafter - FOCL) up to 125 settlements of the region, and organized satellite communication channels in 14 settlements.

The construction of fiber-optic communication lines to the settlements of the region allows operators to improve the quality of the provision of communication services, apply unlimited tariffs, the cost of which is much lower and the speed is higher than the tariffs used on copper networks.

In 2018, mobile operators focused on the development and modernization of existing networks in the high-speed 3G, 4G standard. In 2018, operators upgraded and built more than 150 base stations in cities and regions of the region.

In 2018, the Digital Economy project was launched. The national program “Digital Economy” aims to:

- ensure a threefold increase in internal costs for the development of digitalization from all sources;
- create a stable and secure information and telecommunications infrastructure for high-speed transmission, processing and storage of large amounts of data, accessible to all organizations and households;
- on the use of predominantly domestic software by government agencies, local governments and organizations.

The implementation of the federal project “Digital Economy” is planned for the period from 2018 to 2024.

15. National policy

The work on the implementation of the state national policy in the region in 2018 was carried out in accordance with the Action Plan for the implementation of the Strategy of the State National Policy of the Russian Federation for the period up to 2025 in 2017 - 2018 (approved by order of the Government of the Amur Region dated December 6, 2016 No. 141-p).

In the framework of improving public administration in the field of state national policy, March 12, 2018, a seminar was held with the deputy heads of city districts and municipal districts of the region responsible for implementing the national policy in the Amur Region, at which regional issues of the implementation of the state national policy of the Russian Federation in the Amur Region were considered area, interaction of executive authorities and local authorities in the field of prevention of extremism. The seminar was attended by employees of the Office of the Ministry of Internal Affairs of the Russian Federation in the Amur Region, the prosecutor’s office of the Amur Region, and the Office of the Ministry of Justice of the Russian Federation in the Amur Region.

In the framework of measures to ensure interethnic peace and harmony, harmonization of interethnic (interethnic) relations, the following activities were carried out.

Representatives of the Azerbaijan National-Cultural Society “Araz”, the autonomous non-profit organization “Belarusian Community”, the regional branch of the Union of Armenians of Russia, the Uzbek national-cultural center “Altinvodiy” (Golden Valley), the Tajik national-cultural center “Dusti” (Friendship) take an active part in holding Russian holidays, hold national cultural events that contribute to the formation of interest in national traditions and culture, respect for peoples, living in the region.

On the eve of Victory Day celebrations, national-cultural associations organized festive dinners and concerts for veterans of the Great Patriotic War. Together with the ministry of social protection of the population of the region, an action was held and gifts were prepared for participants in the Great Patriotic War.

06/12/2018 a friendly football match “Commonwealth” dedicated to the Day of Russia.
11/04/2018 in the Amur Regional House of Folk Art organized an exhibition-competition "Corner of national culture", a festive concert program "Together".

In the framework of ensuring socio-economic conditions for the effective implementation of state national policy, support was provided for projects aimed at creating conditions for the development and preservation of the Amur Cossacks and the original national culture of the indigenous peoples of the North of the Amur Region. The amount of funds allocated for grants amounted to 1.0 million rubles.

As a result of the competition, 7 SONCOs were recognized as winners, two projects aimed at working with young people: the creation of the Cossack shift youth organization and the Cossack Youth Forum of the Amur North Indigenous Minorities.

Three projects - a regional ethnic workshop on arts and crafts "Gems of the North" on the basis of s. Ust-Urkim of the Tynda region, which was attended by 45 craftswomen, including from the Khabarovsk and Zabaykalsky territories, the youth forum of the indigenous peoples of the North of the Amur Region "Amur North", holding a circle of the Amur Cossack army. Two projects of the Amur regional public organization "Civil Initiative" and the local public organization "Association of Indigenous Minorities of the North of the Selemdzhinsky District of the Amur Region" aimed at developing the culture of the indigenous peoples through cultural activities will be implemented in the near future.

In the framework of promoting the preservation and development of the ethnocultural diversity of the peoples of the Russian Federation, the Days of the reindeer herder and hunter were held in the places of traditional residence of the indigenous peoples of the North of the Amur Region in the Amur Region: p. Bomnak Zeya district; with. Ivanovo Selemdzhinsky district; with. Ust-Nyukha, s. Ust-Urkim, s. May Day Tyndinsky district.

On April 29 - May 3, 2018, representatives of the Amur Region took part in the Moscow Gems of the North international exhibition-fair.

Organized the participation of representatives of regional public organizations of the indigenous peoples:

from July 6 to 9, 2018, at the V Congress of Evenks of the Russian Federation in Krasnoyarsk;

from November 15 to 16, 2018 in the Far Eastern Forum of Indigenous Minorities of the North, Siberia and the Far East of the Russian Federation in Petropavlovsk-Kamchatsky;

From November 16 to November 18, 2018 at the International Introductory Course "The Arctic Council and the Role of Permanent Participants" in Moscow.

From August 17 to August 18, 2018, the regional sports day of the pre-conscription Cossack youth "Cossack Sich on the Amur" was held. The events were funded by a resident grant a. 480 thousand rubles were allocated for the organization of the Cossack Spartakiad.

In 2019, it is planned to conduct field and stationary seminars on the formation of Russian identity, holidays dedicated to the Day of Russia and the Day of National Unity, with the participation of national associations, the festival of Slavic culture, sports competitions between teams of national and cultural diasporas in various sports; the organization and holding of the holiday to the Day of the World’s Indigenous People with the organization of the indigenous exhibition of applied arts in Blagoveschensk, the organization and holding of traditional national holidays - Day of the hunter and reindeer herder in all villages in the places of traditional residence of the indigenous peoples, holding a workshop "Gems of the North", a holiday "Bakaldyn", the annual Evenki Youth Forum, which will run thematic venues and trainings; inter-district festivals of the Cossack song.

16. Lawmaking
As part of the solution to the problem of legal support for the activities of the region's governor and the region's government, a legal and anti-corruption examination of 1,532 draft legal acts of the region's governor and the region's government was carried out in 2018, of which: resolutions of the Government of the Amur Region - 748, orders of the Government of the Amur Region - 248, resolutions the governor of the Amur region - 358, the orders of the governor of the Amur region - 178. Over the past year, in the course of legal monitoring, an analysis of 575 federal laws, 170 decrees President of Russian Federation, 1347 Russian Government Resolution, which resulted in the executive bodies of state authority sent 70 letters of the need to bring the normative legal acts in the area of compliance with the federal legislation. 59 expert opinions of the Department of the Ministry of Justice of the Russian Federation in the Amur Region on regulatory legal acts of the region, 7 acts of prosecutorial response were examined; Representation of the governor of the region and the government of the region was ensured in 244 cases in courts of general jurisdiction. Considered 314 appeals of citizens and their associations, 278 letters of state authorities, local authorities and other legal entities.

For 2018, of the 137 laws adopted by the Legislative Assembly of the region, 57 in the order of legislative initiative were introduced by the governor of the region. In addition, for consideration in the Legislative Assembly of the region by the governor of the region, amendments to 27 draft laws adopted in the first reading were sent. Also in 2018, 1,128 draft federal laws were examined, which were sent for consideration to the regions, of which 21 projects were sent to the relevant committees of the State Duma of the Federal Assembly of the Russian Federation, including proposals and comments.

For 2018, as part of the organization and maintenance of the regional register of municipal regulatory legal acts, 10,168 acts were entered into the database of the regional register of municipal regulatory legal acts; legal examination of 4,391 municipal normative legal acts was carried out, of which 53 on non-compliance with federal legislation, 185 reconciliations were conducted with the heads of municipalities on the number of normative legal acts submitted for inclusion in the register.

The work of the commission on pardon in the region was ensured. In 2018, this commission examined 28 applications for clemency received from convicts, for which it was recommended to apply the clemency act against 4 convicts.

In 2018, the Law of the Amur Region No. 81-OZ of September 11, 2012, “On Certain Issues of Providing Free Legal Aid in the Amur Region” was also implemented, during which lawyers participating in the state system of free legal aid provided free legal assistance to 161 citizens.

In the exercise of powers to ensure the activities of administrative commissions in the region, the current personnel rotation of the composition of the administrative commissions of the region is ensured, as well as the financing of state powers for the organizational support of the activities of administrative commissions transferred to local governments. The result of this work is 9,580 protocols on administrative offenses drawn up by the administrative commissions of the region, they have examined 9,368 cases, 8,341 decisions have been issued on imposing an administrative penalty. The amount of administrative fines collected amounted to 5.6 million rubles.

17. Anti-corruption

In accordance with the schedules of inspections of the organization of work to combat corruption in the executive bodies of state power of the Amur Region, the schedules of monitoring the organization of work to combat corruption in local authorities of the Amur Region, by the decision of the interagency working group to coordinate the activities of law enforcement bodies and public authorities of the region to combat corruption from 12/28/2017, by decision of a meeting of the Commission for the Coordination of Work to Combat Corruption in Am in the Ural region dated July 9, 2018, the Directorate of State Civil Service and the Prevention of Corruption and Other Offenses conducted relevant inspections and monitoring in 9 executive bodies of state power of the Amur Region.

Based on the results of inspections and monitoring, 88 facts were revealed that showed signs of violation by the state civil servants of the executive bodies of state power of the Amur region, municipal officials of local governments of the Amur region, on anti-corruption, including:
72 signs of violation in the provision of information on income, expenses, on property and liabilities of a property nature (hereinafter referred to as information on income): 28 state civil servants, 44 municipal employees;

1 sign of violation of prohibitions established in order to combat corruption (conducting commercial activities) by 1 state civil servant.

The department revealed signs of violation of anti-corruption legislation by 7 officials of the Amur Regional Perinatal Center. Information about this fact was sent to the Federal Security Service of Russia in the Amur Region.

Thus, in 2018, the department revealed 97 signs of violation of the legislation of the Russian Federation on combating corruption, on public service and municipal service.

The department conducted 27 inspections:

5 - on the facts of the submission of inaccurate (incomplete) information on incomes, expenses, on property and liabilities of a property nature (hereinafter referred to as information on incomes) submitted by a person who replaces a state position in the region (verification materials were reviewed by the Presidium of the Commission for Coordinating Anti-Corruption Work in the Amur Region the region, according to the results of the meeting of the presidium of the person filling the state position of the region, indicated the prevention of violations of anti-corruption legislation when submitting information income statement).

3 - on the facts of non-compliance by state civil servants of the Amur Region with requirements to prevent or resolve a conflict of interest;

1 - on the fact of non-compliance by state civil servants of the Amur region with anti-corruption prohibitions (participation in the management of a commercial organization) the audit materials were reviewed by a commission under the Government of the region to comply with the requirements for official conduct of state civil servants of the region and the settlement of a conflict of interest, following a meeting the commission decided to indicate to the state a civil servant to prevent violations of anti-corruption legislation;

18 - on the facts of the submission of inaccurate (incomplete) information on incomes by persons replacing municipal posts (deputies of the representative body of the region), according to the results of the checks, relevant information was sent to the chairman of the representative bodies of the region.

In accordance with the requirements of anti-corruption legislation, conclusions were prepared based on the results of consideration:

4 notifications of the possibility of a conflict of interest presented by 2 persons filling the state posts of the region and 2 state civil servants of the region;

3 requests for permission to participate on a gratuitous basis in managing a non-profit organization as a sole executive body or joining its collegial management bodies, represented by one state civil servant of the region;

1 notification of the fact of appeal in order to induce corruption offenses, submitted by the state civil servant of the region, received by the department for its analysis.

**18. Management of state property**

As of 01.01.2019, the property registry of the Amur Region (hereinafter referred to as the Register) includes property of 268 legal entities (including: 6 regional enterprises, 262 regional state institutions), the treasury of the region contains blocks of shares of 9 joint-stock companies, in the authorized capital of which there is a share of the Amur region.
In total, on 01.01.2019, 6,834 real estate objects were registered in the Register (including 3,293 land plots with a total area of 771.7 thousand hectares and 3,541 buildings, premises, facilities with a total area of 23,740.5 thousand square meters), and 3,899 objects of movable property, the book value of a unit of which exceeds 500 thousand rubles.

In 2018, there was an increase in land plots by 1% mainly due to the formation of plots as a result of the division, merger or separation from existing land plots, as well as a slight decrease in real estate by 0.11% due to a reduction in the number of unused objects.

The main work in 2018 was aimed at:

1) to reduce the number of unused or inefficiently used objects.

In connection with the optimization of the network of regional institutions and the expenses of the regional budget, real estate is being released.

As of 01.01.2018, 56 released unused objects were on the balance of regional organizations. In 2018, another 49 objects were released, and 56 objects were also involved in the economic turnover (7 objects were sold, 9 were transferred to municipal ownership, 27 objects were written off, 8 were transferred to the balance of regional structures, 5 are used for statutory activities).

This allowed to reduce the regional budget expenses for the maintenance, protection of objects and payment of taxes on them in the amount of 5.5 million rubles, as well as income from the sale of objects in the amount of 11.8 million rubles.

Thus, as of 01.01.2019, the share of unused objects in the total number of objects owned by the region (3,541 objects) is 1.4%, or 49 objects. In relation to these objects, together with the branch authorities of the region, local authorities and balance-sheet holders of the objects, the question of their further use was worked out, as a result of which in 2019 it is planned:

sell - 28 objects;
write off - 12 objects;
transfer to municipal ownership - 1 object;
to lease - 4 objects;
to transfer to citizens in privatization order - 1 object;
in relation to 3 objects, the question of their further use by regional and other structures is currently being considered.

The planned amount of cost reduction for the regional budget for the maintenance of these facilities will be about 20.0 million rubles.

In the reporting year, in accordance with the Forecast Plan (Program) for the privatization of regional property for 2017 - 2019, approved by the Resolution of the Legislative Assembly of the Amur Region dated November 24, 2016 No. 3/123, it was planned to privatize nine complexes of real estate objects recorded in the treasury of the region, and a package shares of a joint stock company.

The sale of real estate and a block of shares was carried out at auction through a public offer. At the auction, one complex of objects located in Svobodny on Administrative Street, 37 was sold. 11.3 million rubles were received from the sale of this object to the regional budget.

As of 01.01.2019, 212 lease agreements with a total area of 24.2 thousand square meters were concluded and are in force. m and 253 contracts for gratuitous use - 39.3 thousand square meters. m. In 2018, 90 lease agreements were concluded, including at a market value of 76. 37.9 million rubles were received in the income of regional institutions and enterprises from property leases.

Based on orders and orders, in 2018, 96 free use agreements were concluded;
2) to reduce the number of objects unsuitable for further operation, which allowed to reduce inefficient expenses for the maintenance of these objects related to the payment of property tax and land plots under them, as well as more rational use of land occupied by dilapidated objects.

To achieve this goal, in 2018 a decision was made to write off (disassemble) 29 property in unsatisfactory condition, in 2017 - in respect of 22 objects, in 2016 - in respect of 10 real estate objects;

3) to ensure the safety of regional property and reduce violations in the use of regional property. In this area, in relation to the regional organizations in the operational management of which regional property is located, in 2018, 42 inspections were conducted, including 2 unscheduled ones.

As a result of the control measures carried out in 2018:

the Register includes 24 real estate objects, 23 units of other movable property;

1 contract for the free use of regional property was concluded;

a decision was made to write off 2 real estate objects, 16 units of vehicles, 22 units of especially valuable movable property, and institutions have written off 169 units of other property not classified as especially valuable movable property;

Regional organizations have taken measures to recover unjust enrichment in the total amount of 2.0 thousand rubles.

According to the schedule of inspections to monitor the intended use and preservation of regional property, approved by order of the Ministry of Property Relations of the region on November 7, 2018 No. 1042-OD, 40 inspections of regional organizations are planned in 2019, including 1 state unitary enterprise;

4) for the implementation in the Amur Region of the Federal Law dated 01.05.2016 No. 119-ФЗ "On the peculiarities of providing citizens with land plots that are state or municipal property and located on the territories of the constituent entities of the Russian Federation, which are part of the Far Eastern Federal District, and on introducing changes to certain legislative acts of the Russian Federation.

As of 01.01.2019, 5,707 plots with a total area of 6,314.68 ha were provided to citizens for free use in the region.

More than 2 thousand sites are being developed by citizens (60% - for agriculture, 5% - for housing, 35% - for other purposes).

In order to develop "Far Eastern hectares" in 2018, the Government of the region received state support measures (9 farmers received grants for the creation and development of a farm for a total amount of 27 million rubles, 7 recipients of hectares were given quotas for logging in the amount of 750 cubic meters. m).

Work was continued to provide the necessary transport infrastructure for places with the highest concentration of adjacent and compactly located land plots provided under the Law on the 'Far Eastern Hectare'.

In the region, 3 territories have formed, on which the land plots provided under the program are compactly located - s. Novopetrovka and with. Markovo Blagoveschensk district, with. Ivanovka, Ivanovo district. In 2018, the regional government provided financial assistance to the districts for the development of project documentation. It is planned to complete these works in 2020. Road construction is planned for 2020-2021, it will require 320 million rubles.

The provided plots are provided with electricity by energy-saving organizations at the request of citizens. 243 applications were satisfied (95%);

5) for the efficient use of agricultural land in the region.

The total area of agricultural land located in the region is 3,542 thousand hectares (including arable land) - 1,514 thousand hectares. Of the total array of arable land, 1,280 thousand ha (85%) are used for cultivating crops.

In 2018, 228 thousand hectares of agricultural land were inspected, the results of which revealed land non-use on a total area of 90.7 thousand hectares.
Inspection materials for violations identified were sent to the Rosselkhoznadzor Office in the Amur Region. Unscrupulous tenants brought to administrative responsibility (the amount of fines - 1.8 million rubles).

As a result of the work carried out in 2018, 48 thousand hectares of agricultural land were additionally involved in the turnover.

In order to provide citizens with land plots necessary for haying and grazing private cattle, methodological recommendations on organizing events aimed at establishing public easements for these purposes have been prepared and sent to municipal areas. All municipalities have presented schedules for these events. Work on determining places for grazing and establishing public easements will continue in 2019.

As part of the implementation of the subprogram “Improving the Efficiency of Using State Property of the Amur Region” of the state program of the Amur Region “Improving the Efficiency of the Activities of State Authorities and Administration of the Amur Region for 2014 - 2020”, approved by the Decree of the Government of the region No. 442 dated September 25, 2013, in 2018 cadastral work in respect of 22 land plots, as well as comprehensive cadastral work (hereinafter - KKR) in respect of two cadastral quarters in the city of Blagoveshchensk.

As a result of the KKR carried out in 2018, accurate information about the location of the borders of 279 land plots and real estate objects was entered into the Unified State Register of Real Estate;

6) to replenish the revenue of the regional budget.

In 2018, the regional budget received income from the use of property and land in the amount of 192.2 million rubles. The most significant part of the total revenue is income from the rental and sale of land - 169.0 million rubles (87.9%).

In 2019 and in the medium term, it is planned to continue work aimed at ensuring the efficient use of state property of the Amur Region, including by:

- reduction of inefficiently used and unused property through involvement in the economic turnover (redistribution and sale) of 49 released objects, the estimated amount of reduction in the costs of the regional budget for the maintenance of these objects will be about 20 million rubles;
- privatization of real estate objects and shares of a joint stock company included in the forecast plan (program) of regional property privatization for 2017–2019, the forecast amount of revenues to the regional budget from the sale of privatized property will be 184.2 million rubles;
- increase the revenue of the regional budget from the use of regional property and land;
- efficient use of agricultural land;
- targeted development by citizens of land plots provided for free use under the Federal Law on the ‘Far Eastern Hectare’. In accordance with the instructions of the governor of the region, within the framework of an interdepartmental working group, work is being carried out with local authorities of the region to increase budget revenues of municipalities. As a result of this work, the revenues of the budgets of municipal entities of the Amur Region from land tax and property tax of individuals in 2018 amounted to 2.4 billion rubles, which is 2 times higher than the level of 2017 (1.2 billion rubles).

19. Public order placement

The Office of the State Order of the region carried out 4,027 determinations of the supplier (contractor, contractor) by conducting electronic auctions and tenders at the expense of the regional budget and extra-budgetary funds in the amount of 6.0 billion rubles, including:

3,996 auctions in electronic form in the amount of 5.9 billion rubles;
31 (33 лота) tenders in the amount of 109.9 million rubles.

4953 checks were carried out on the validity of the methods used by customers to determine the initial (maximum) price of a contract (agreement) (hereinafter - NMCC) and the established price level when purchasing goods and services. Based on the results of the examination, the NMCC indicated in the applications of customers was reduced by the management in 605 cases (12.21% of the total number of applications that passed the examination). Savings in budget funds and extrabudgetary sources received:

according to the results of auctions in electronic form in the amount of 240.6 million rubles;
according to the results of tenders - in the amount of 29.9 million rubles;

based on the results of a reduction in the price level set by customers during the procurement process, in the amount of 38.5 million rubles.

II. SOCIAL SPHERE

1. Demographics
According to a preliminary estimate of the Federal State Statistics Service, as of 01.01.2019, the number of resident population of the region amounted to 793.6 thousand people (536.9 thousand people in the urban population, 256.7 thousand people in the rural population) and decreased by 4 in January-December 2018, 8 thousand people, or 0.60% (the decrease as of the corresponding date in 2017 was 3.3 thousand people, or 0.42%).

In 2018, the natural decrease was 1,727 people, or 2.2 ppm per 1000 population, which is 458 people higher than 2017 (minus 1,269 people).

Natural growth in January-December 2018 was recorded in the urban district of Blagoveshchensk and the Blagoveshchensk municipal district (in 2017 - in the urban districts of Blagoveshchensk and the city of Tynda, Blagoveshchensk, Konstantinovsky and October municipal regions).

The excess of the number of deaths over the number of births in the whole region amounted to 19.4% (in 2017, the number of deaths exceeded the number of births by 13.5%).

The number of deaths in 2018 amounted to 8889 people, or 11.1 ppm (in 2017 9430 people, or 11.8 ‰), the number of deaths - 10 616 people, or 13.3 ppm (in 2017 10 699 people, or 13.4 ‰).

In 2018, as a result of migration exchange, the region lost 3392 people (in 2017 - 2104 people), which occurred as a result of an increase of 1,114 people who left the region, respectively.

Migration loss within Russia amounted to 3166 people (in 2017 - 3252 people), international migration - 226 people (in 2017 - (+) 1148 people).

In 2018, 42.5 people died of migration per 10 thousand resident population in the region (26.3 people in 2017).

The total volume of migration external to the region (the sum of arrivals and departures) in 2018 amounted to 27.8 thousand people, having increased by 3.3% compared to 2017. The number of migrants within the region decreased by 14 people, or 0.1%, compared with migration in 2017.

In 2018, the number of arrivals from the CIS countries decreased by 91 people compared to 2017, and the number of departures to these territories increased by 674 people.

In 2018, the structural subdivisions of the civil registry office conducted 32,129 all types of civil registration (2017 - 32,958).
In 2018, 5,745 acts were registered on state registration of marriage (2017 - 6,118), 2,172 acts on establishing paternity (2017 - 2,181), 90 adoptions, which is 5 more compared to 2017 (2017 - 85).

10/01/2018 The Amur Region, together with the civil registry offices of Russia, switched to a new format of work in connection with the commissioning of the federal state information system "Unified State Register of Civil Status Register" (FSIS "USR Civil Registry Office") in commercial operation.

Registration of acts of civil status is carried out in the FSIS "USR registry office" on-line.

The Ministry of Health of the Amur Region and the Office of the Civil Registry Office at the initiative of the Agency for the Development of Human Capital in the Far East during the state registration of marriage are issuing certificates of "Young Family Health".

In 2018, the period for the implementation of this certificate has changed. Due to sufficient demand, it has been extended from 3 to 6 months. Also, currently certificates are issued on the basis of the registry office in the city of Svobodny and Svobodnensky district.

In total, 1361 certificates have been issued during the project’s existence.

In order to promote the positive experience of fatherhood and motherhood, as well as to improve the demographic situation in the Amur region in 2018, work continues on the project "Taking Care of the Future". In 2018, with the support of public organizations (Amur branch of the All-Russian Children’s Fund, People's Front) and sponsorship, more than 160 essential gift baskets were awarded under this project.

2. The standard of living of the population of the region

According to a preliminary assessment of the Territorial Authority of the Federal State Statistics Service for the Amur Region, in 2018 the cash income of the population of the region compared with 2017 increased by 3.2% and amounted to 302.8 billion rubles.

Compared to 2017, cash expenditures of the population increased by 3.1% and amounted to 295.5 billion rubles.

The excess of cash incomes of the population over cash expenditures amounted to 2.5%.

On average, per capita cash income increased by 2017 by 3.7% and amounted to 31.7 thousand rubles, real disposable cash income - 96.4%.

The average monthly nominal accrued wages of employees of enterprises and organizations, including small businesses, in 2018 compared with 2017 increased by 11.6% and amounted to 42.3 thousand rubles. The real accrued wages calculated taking into account the consumer price index at the end of 2018 amounted to 108.5%.

The highest salary of employees of enterprises and organizations of the Amur Region in 2018 was 2.7 times higher than the lowest salary for the main types of economic activity.

A high level of wages was noted in organizations operating in the fields of transportation and storage - 57.7 thousand rubles; providing electric energy, gas and steam; air conditioning - 54.9 thousand rubles; mining operations - 53.9 thousand rubles; professional, scientific and technical - 51.5 thousand rubles; state administration and ensuring military security, social insurance - 48.2 thousand rubles; finance and insurance - 48.0 thousand rubles; construction - 47.9 thousand rubles.

Below the average level, there was a wage for workers engaged in real estate operations - 21.4 thousand rubles; among hotel and catering workers - 21.9 thousand rubles; wholesale and retail trade enterprises; repair of motor vehicles and motorcycles - 22.3 thousand rubles; administrative activities and related additional services 28.1 thousand rubles; those engaged in the provision of other types of services - 28.8 thousand rubles; water supply organizations; water disposal, organization of waste collection and disposal, pollution elimination - 30.7 thousand rubles; agriculture, forestry, hunting, fishing and fish farming - 30.9 thousand rubles.

According to the results of 2018, the average monthly salary of one employee of the public sector increased by more than 25.0% compared to the corresponding period of the previous year and amounted to 34.4 thousand rubles.

During the implementation of the Decrees of the President of the Russian Federation, wage growth in the region by 2012 increased: 3 times - in the field of culture and sports; 2 times - in healthcare; 1.9 times in social protection of the population and 1.7 times in education.

3. Employment

The situation in the registered labor market of the region in 2018 was relatively stable, the number of unemployed citizens in comparison with 2017 decreased from 10.8 thousand people to 9.8 thousand people, of which 56.1% were dismissed of their own free will, 9.2% - due to release.

According to the weekly monitoring of the dismissal of workers in connection with the liquidation or reduction of the number or staff of workers, as well as part-time employees of enterprises and organizations of the region in 2018, employers laid off 3,500 workers from 566 organizations in the region (in 2017, 4,100 workers from 738 organizations).

Activities to promote employment were carried out as part of the subprogramme “Promoting Employment in the Amur Region” of the state program ‘Economic Development and Innovative Economy of the Amur Region’.

In 2018, the following results were achieved on the main activities of the program:

- the proportion of employed citizens in the total number of citizens who applied for assistance in finding suitable work to the employment service bodies amounted to 38.8%. The main reason is the qualitative discrepancy between supply and demand of the workforce due to dissatisfaction of employers with the professional and qualification characteristics of job candidates. So, among citizens who applied for assistance in finding a suitable job, 28.3% had a basic general education or did not have a basic general education, 5.5% were classified as disabled, 31.1% had not worked for more than a year (having lost professional skills), 14.0% - first-time job seekers (previously not employed);
- the proportion of citizens engaged in entrepreneurial activity, of the total number of citizens who received state services to promote self-employment, amounted to 68.4%;
- the share of employed citizens in the number of citizens who completed vocational training amounted to 89.8%;
- 239 people completed vocational training, including 201 unemployed citizens, 8 retirees seeking to resume work, 30 women on maternity leave until they reach the age of three.

In 2018, computer literacy training was conducted as part of the regional Program for improving the quality of life of older people in the Amur Region for 2014-2018, approved by the Government of the Amur Region dated 10.04.2014 No. 222, 604 of an elderly citizen.

The implementation of the programme’s activities allowed to reduce the tension in the labor market of the region. So, the level of registered unemployment at the end of 2018 amounted to 2.4% of the labor force (at the beginning of the year this indicator was equal to 2.6%).

The coefficient of tension in the labor market, which determines the ratio of the number of citizens registered with the employment service of the population in job search, to the number of vacant jobs, amounted to 0.2.

4. Education

4.1 Preschool education

There are 114 preschool educational organizations in the region. In addition, children attend preschool education groups in kindergartens - school branches, in preschool education groups at schools.
The total coverage of children with pre-school education services in the Amur Region, taking into account the varied forms (counseling centers, game support centers, family-type groups), the non-governmental sector (non-governmental preschool educational organizations, supervision and care groups for individual entrepreneurs) is more than 45,000 people.

Actual demand for the provision of preschool education services for children aged 3 to 7 years is 100% satisfied.

Actual demand for places in preschool educational organizations of the region for children under the age of 3 is not satisfied in 5 municipalities (Blagoveshchensky, Ivanovsky, Oktyabrsy, Seryshevsky districts, Blagoveshchensk).

As of November 1, 2018, the queue for the provision of a place in VET at the current demand for children of this age category is 1,419. These children currently require a place in kindergarten.

Another 10,869 children under the age of 3 years are in line for the so-called “deferred demand”. Parents of these children immediately after the birth of the child registered in the queue, but the child will need a place in the early childhood care center in a year, two or three years.

In order to fulfill the instructions of the President of the Russian Federation to achieve 100% accessibility of preschool education, the Ministry of Education and Science of the region is taking measures to ensure the availability of preschool education services for children of this age category. The total coverage of children under the age of 3 years attending nursery groups in municipal educational institutions is 6,480.

Groups for children aged 1.5 to 3 years are available in all municipal districts and urban districts (275 groups, 6,232 pupils).

Groups for children of younger age (up to 1.5 years) work in the Zavitinsky, Selemdzhinsky districts, the cities of Svobodny, Tynda (12 groups, 248 children).

In addition, children under the age of 3 years attend groups of different ages, which are mainly found in kindergartens located in rural areas (125 groups, 560 children).

In order to ensure the availability of preschool education for children under the age of 3 years, additional places are created due to the construction of new kindergartens, as well as from the internal reserves of existing pre-schools.

This year, a new kindergarten building was opened in the Zvezdnaya microdistrict ZATO Tsikolkovskaya. The kindergarten is designed for 230 places, of which 40 places are for children under the age of 3 years.

Overhaul of the additional room in the MDOAU d / s 'Fairy Tale' of Magdagachi settlement was carried out, where a group for young children with 20 seats was placed.

During the year 2018, 160 additional places were created in Blagoveshchensk in the sports center No. 14, 28, 35, the Central Development Center - in the school No. 4, a gymnasium.

The total number of pupils under the age of 3 years in municipal educational organizations is 7,040.

720 kindergartens under 3 years old attend private kindergartens.

Preschool education and supervision and care services are also provided in private kindergartens, groups of individual entrepreneurs, family-type groups, short-stay groups, and counseling centers.

88 short-term groups work, more than 100 advisory points covering more than 1000 people every month.

During the year, the opportunities of the non-state sector were actively used: 4 individual entrepreneurs received licenses for educational activities, 25 private kindergartens with 1,080 children were working.

The activities of individual entrepreneurs in providing care and care services for 500 children are also carried out.

Parents are ensured openness and transparency of priority in pre-school educational institutions through the information system 'Electronic Commission'.
In pursuance of the “May” Decree of the President of the Russian Federation following the results for 2018, the salary of teachers of preschool educational organizations of the region amounted to 32.6 thousand rubles.

4.2 General education

In the academic year 2018/19, in 10 municipalities of the region, all schoolchildren are taught in one shift. In the second shift, training is being conducted in 62 general education organizations (24% of the total number of schools) located in 18 municipalities of the region. There is a tendency to increase the number of children engaged in the second shift, their number is 20.9 thousand people (21.6%) (in 2017 - 21.3%). The largest percentage of students in the second shift is observed in the cities: Blagoveshchensk - 41%, Belogorsk - 41%, Free - 35%.

To solve the issue of eliminating the second shift in the region, it is necessary to build at least 40 schools with a capacity of 528 seats each, which is not possible in the shortest possible time. At the same time, work is underway to expand the building No. 2 for 528 places to the MOAU “School No. 22 of Blagoveshchensk”, in 2019 it is planned to build a school in Svobodny for 528 places.

In order to solve the problem of eliminating the second shift in general educational institutions of the region, the Government of the Amur Region is developing a regional component of the national project “Education”, which, in accordance with Decree of the President of the Russian Federation dated 07.05.2018 No. 204 “On national goals and strategic objectives of the development of the Russian Federation for the period until 2024” includes an event to eliminate the second shift until 2024.

At the same time, in the Amur Region, the priority task set by the Government of the Russian Federation was solved - to eliminate the training in general education organizations in three shifts in the regions.

In Amur schools, there is no third shift.

The school library fund has more than 7 million items, including about 2 million textbooks. This year, in order to provide free textbooks, 245 thousand copies worth more than 83.5 million rubles were purchased. The work on the acquisition of educational publications in 2018 was carried out in collaboration with 9 publishers.

The specialized training of Amur schoolchildren at the level of secondary general education is carried out in 9 areas, the most popular of which are socio-economic (22%), physical and mathematical (21%), social and humanitarian (19.5%) (in 2017, respectively - 20%, 17.5% and 16.3%).

The number of students in specialized classes is growing annually, in 2018 amounted to 82% (in 2017 - 80%).

Taking into account the real needs of the labor market of the Amur Region in qualified personnel for the aerospace, gas processing, and energy sectors, specialized training is being introduced in the regional educational institutions, which is focused on the individualization and professional orientation of students in Gazprom Classes, Energetichesky, Aerospace.

So, over three years, the share of students in the natural sciences has increased by 40%, by 30% in the information and technology profile, and by 25% in the chemical and biological profile.

In order to improve the material and technical base of MBOU secondary school No. 3 in Skovorodino, in which training was organized in the specialized Gazprom classes in the academic year 2017/18, financial funds were transferred to the school under the corporate charity program for the development of school education at Transneft-Vostok LLC in the amount of about 4 million rubles for the purchase of equipment for equipping physics, chemistry and mathematics classrooms.

The share of Amur graduates who continued their education in vocational education organizations in 2018 amounted to 96.5%, (in 2017 - 94.9%). Accordingly, the share of graduates who entered universities in full-time under the undergraduate and specialty programs among all applicants increased: from 62% in 2013 to 72% in 2018.

Amur universities entered 1,462 graduates of educational institutions of the region, 1,415 Amur graduates of 2018 entered various professional educational organizations for further study outside the region. At the same time, the most prestigious of them for Amur graduates are in the cities of Khabarovsk and Vladivostok (in 2018, 946 graduates of general educational organizations of the Amur
region enrolled in them (in 2017 - 850 people).

In universities located outside of Russia, the number of Amur graduates who entered has remained at the level of last year - 23 people.

In the current academic year, the implementation of the ethnocultural Cossack component in pre-school, general and vocational education continues on the basis of 23 educational organizations in which experimental, testing, pilot sites have been created. Since September 1, 2018, as part of the educational program, Cossack educational component has been studied by 1,356 people aged 6 to 20 years, which is 2 times higher than the indicator of the previous school year (708 people in the academic year 2017/18).

In 2018, for the first time, training in the basics of financial literacy as part of an educational program is implemented on the basis of 25 educational organizations that actively cooperate with representatives of the Ministry of Finance of the Amur Region and representatives of the Far Eastern State Institution 'Bank of Russia'. In the current academic year, as part of the educational program, the basics of financial literacy are studied in 1503 people aged 6 to 18 years (in 2017/18 academic year - 459 people).

Work is underway to create the necessary conditions for general education for children with disabilities (hereinafter - HIA) and children with disabilities.

In educational institutions of the Amur Region, 5526 students are classified, who are classified as needing special educational conditions (including 2203 disabled children).

Education for children with disabilities and children with disabilities is organized in educational institutions in separate correctional classes and inclusively; in special (correctional) boarding schools; at home or in medical organizations, including with the use of distance educational technologies.

In 2018, 6.0 million rubles were allocated for the adaptation of educational institutions for children with disabilities and children with disabilities from budgets of all levels. Five general educational organizations of the region located in Blagoveschensk, ZATO Tsiolkovsky, Arkharinsky, Ivanovsky and Magdagachinsky districts received subsidies. The money was spent on the purchase of specialized equipment, the installation of ramps, the expansion of doorways, etc.

In just 5 years, 54 general education organizations (18%) participated in the Accessible Environment program, which made it possible to improve the educational conditions for 2268 students with disabilities and children with disabilities (38%).

Since September 1, 2018, training according to the Federal State Standard of Primary General Education for more than 700 students with disabilities is conducted according to adapted educational programs.

In order to introduce the Federal State Educational Standards for students with disabilities for training in adapted educational programs, in 2018, 6.2 thousand copies of textbooks worth 2.3 million rubles were purchased.

With the help of distance technologies, 75 children study in the basic educational programs of general education. An equipment exchange fund has been created for distance learning participants. In the regional educational institutions, which are basic schools, hardware and software systems for teachers have been installed.

For free temporary use, each disabled child is provided with a set of specialized equipment, high-speed Internet access for the duration of the training, and authorized access to specialized educational resources.

The network of special (correctional) schools and boarding schools for children with disabilities is represented by 6 general education organizations, where 859 people study, including: 718 people with mental retardation (intellectual disabilities), 108 people with hearing impairments, visual impairment - 110 people, including those with a complex defect.

Correctional and pedagogical work with children with hearing impairment is carried out on the basis of boarding school No. 8, Blagoveschensk; those with visual impairment, mental retardation (intellectual impairment) - on the basis of the Svobodensky special (correctional) boarding school; with mental retardation (intellectual impairment) - on the basis of 4 special (correctional)
organizations (boarding school No. 5 of the urban settlement Novobureysky”, school No. 7, Blagoveshchensk, boarding school No. 9, village Ivanovka”, boarding school No. 10, Belogorsk”).

In 2 boarding schools, children from among orphans and children without parental care, with disabilities, and mental retardation are studying and living (state autonomous general educational institution of the Amur Region “Special (correctional) general educational boarding school No. 5 for children - Orphans and children without parental care, urban settlement Novobureysky”, state general educational autonomous institution of the Amur region” Svobodnenskaya special (correctional) school-boarding school”).

As of December 1, 2018, 157 children in this category are studying at boarding schools for orphans and children without parental care.

In pursuance of the “May” Decree of the President of the Russian Federation based on the results for 2018, the salary of teachers of educational organizations of general education in the region amounted to 37.5 thousand rubles.

4.3 Further education, upbringing and rehabilitation of children

In 2018, 80 municipal institutions of additional education for children in the field of education, in the field of culture, in the field of physical education and sports, carried out their activities in the region.

Continuing education programs reach 74% of children.

Continuing education programs are also implemented in educational organizations of professional, higher education and in general educational organizations.

During 2018, the coverage of children and youth with supplementary education programs in the Amur Region amounted to 74%, or 94.2 thousand people involved in supplementary education, of the total number of children (127.3) aged 5 to 18 years.

Additional education of children in the region is represented by a number of areas (natural science, technical, creativity, including robotics, physical education, tourism, local history, art, socio-pedagogical, civil-patriotic).

There are 60 technical creativity associations and 30 scientific societies in which more than 4,000 children are involved in continuing education organizations.

12/13/2018 in the Amur region launched the children's industrial park "Quantorium - 28". 83.0 million rubles were allocated from the federal budget for the creation of the technopark.

The partners of the project, SIBUR company, took part in the creation of "Quantorium - 28".

For the period of 2018, more than 45 thousand children were accepted in events at the regional, interregional, all-Russian and international levels.

Winners and prize-winners of events at the regional level were given the opportunity to prove themselves at the national and international levels.

More than 250 children took part in the shifts of the All-Russian children's centers: "Ocean", "Artek", "Eaglet", "Sirius".
The educational institutions of the region have 389 gyms, 718 open planar sports facilities, 188 football fields, 129 basketball courts, 46 hockey and ice rinks.

In 2018, 15.4 million rubles were allocated for co-financing activities to create conditions for physical education and sports in general educational institutions located in rural areas, 8 sports clubs were created, 8 gyms were overhauled and equipped with sports equipment and equipment 1 open planar sports facility.

According to the draft distribution of subsidies provided in 2019 from the federal budget to the budgets of the constituent entities of the Russian Federation for carrying out the above measures, the amount of the subsidy for the Amur Region will amount to 11.9 million rubles. The event is planned to be implemented as part of the order of the Government of the Amur Region dated November 14, 2018 No. 165-r "On the list of measures to create conditions for physical education and sports in general educational institutions located in rural areas".

As part of the development of the socio-pedagogical direction in 2018, a center for the prevention of road traffic injuries for children (hereinafter referred to as the center) was opened on the basis of GAU DPO “Amur Regional Institute for the Development of Education”

During the year, the preventive work of the center reached over 29 thousand people.

Currently, there are 171 detachments of young traffic inspectors and 31 associations (4095 students) in the region.

Particular attention in the education system is paid to patriotic education and pre-conscription training of the youth of the region.

The total number of participants in regional events organized by the regional center for training citizens of the Russian Federation for military service and military-patriotic education is more than 33 thousand people.

In the area are:

96 military-patriotic clubs in which 2,453 pupils are engaged;
42 military-patriotic associations - 1,218 pupils;
14 civil-patriotic clubs - 460 pupils.

Every year, a regional gathering of youth soldiers is held.

Currently, in the Amur Region there are more than 3,000 Unarmed men, including cadets, pupils of military-patriotic clubs and members of the search squads of the Amur Region.

One of the blocks of the child-rearing system is the organization of children's vacations, the employment of children and youth on vacation.

Coverage of children with leisure and recreation activities in 2018 during the vacation time was 82,469 people aged 6.6 to 17 years, or 91.7%, including:

15,216 people - in 271 camp with a day stay;
10,427 people - in 18 country camps and sanatoriums;
543 people - in 15 labor and rest camps;
927 people - in 12 campgrounds;
55,356 children took part in low-cost forms of recreation and rehabilitation (physical culture, military sports events, hiking, excursions, etc.).

Under the conditions of subsidies, 17,050 children, or 20.7% of the total number of people who have recovered and rested, have been rehabilitated.
In 2018, 51 regional profile shifts were carried out, including on the basis of non-governmental (non-municipal) organizations for rest and recreation of children (2017 - 32 shifts).

Within the framework of the regional project “Success of every child”, in 2019, a Center for identifying and supporting gifted children will be created in the region.

The main site of the Center will be located on the basis of the Amur State University.

The center will implement programs of additional education for children and youth in the areas of bio- and genetic engineering, genomic engineering, and “machine learning”.

In order to ensure equal access to modern educational programs in 2019, the creation of the Quantorium mobile technopark is planned.

Within the framework of the Digital Education Environment project of the Education national project, it is planned to create the IT-cube key education center.

The center will include standard sites for modern centers (chess room, coworking, media library and specialized sites - Cuba (laboratories) in the areas of: Python programming, Java programming fundamentals, mobile development, system administration, digital hygiene and big data, basic programming skills in C-like languages - 240 sq.m.

In pursuance of the “May” Decree of the President of the Russian Federation based on the results for 2018, the salary of pedagogical workers of organizations of additional education of children in the region amounted to 37.0 thousand rubles.

4.4 Professional education

In 12 professional educational organizations (hereinafter - VET), 15.8 thousand students study.

In 8 VET programs from the list of 50 most popular and promising professions and specialties of VET are implemented in accordance with international standards and advanced technologies (“Top-50”).

About 3,500 budget places are allocated annually for admission to the organization of professional education for graduates of grades 9 and 11. Acceptance figures are generated on the basis of proposals from employers and sectoral ministries of the region, taking into account the prospective needs of the region’s economy for personnel, as well as preliminary stage-by-stage labor requirements for the construction and operation of processing plants in the city of Svobodny, Gazprom Pererabotka LLC for 2018-2022, Vostochny cosmodrome and Nizhne-Bureyskaya hydroelectric station.

So, in the academic year 2018/19, the total amount of CCPs amounted to 3,440 budget places (1,525 - training of skilled workers and employees, 1915 - training of mid-level specialists).

The number of contracts and agreements with employers on staff training is growing annually (2016 - 319 units; 2017 - 378 units; 2018 - 457 units).

The Agreements on training for the residents of the TOP were signed: Gazprom Pererabotka Blagoveshchensk, Gazprom Transgaz Tomsk, Transneft, Amur Energy Company. Contracts have been concluded with LLC Belkhleb and LLC Oil Extraction Plant.

At the request of employers, new professions and specialties have been included in the total volume of CPC since 2018: Apparatchik for Obtaining Vegetable Oil, Production Technology and Processing of Agricultural Products, Repairman of Mining Equipment, Fire Safety, Organization of Transport and Transportation Management ”, Technical operation of hoisting-and-transport, construction, road machines and equipment ”, Management, operation and maintenance of an apartment building “.

Taking into account the potential staffing needs of the gas processing plant being set up in the city of Svobodny, training is being carried out in the professions “Process Pump and Compressor Engineer”, “Laboratory Assistant Ecologist”, and “Oil Refining Operator".
In 2017, 2018, professional educational organizations licensed 6 specialties and 2 professions in accordance with the new federal state educational standards of open source software: “Ensuring the information security of automated systems”,”Infocommunication networks and communication systems”,”Network and system administration”,”Operation and repair of agricultural machinery and equipment “,”Technology of hairdresser’s art “,”Cook, pastry chef “,”Welder (manual and partially mechanized welding and (welding)).”

Since 2016, 4 multifunctional centers of professional qualifications have been operating in the Amur Region:

Interregional Resource Center, a structural unit of the Annunciation Polytechnic College, which is a training center for professional qualifications in the mining industry;

Industrial Safety Center, which provides training, retraining and advanced training of workers and specialists of Transneft enterprises: Vostoknefteprovod, Dalneprovod, Spetsmornefteport Kozmino, structural unit of the Amur Multifunctional Center for Professional Qualifications;

Amur Technical College is defined as the base for the training of skilled workers for the operation of the Amur Gas Processing Plant;
multilevel educational center of the agricultural profile of the Association "Far Eastern State Agricultural University Complex" (educational center DalAUK).

The total volume of training of workers in the professions most in demand on the labor market is more than 7 thousand people a year.

Vocational educational organizations also implement retraining, advanced training and further professional education programs for working citizens (over 6,000 people annually).

In order to increase the prestige of working professions and the development of professional education through the organization and holding of professional skill competitions in 2015, the Amur Region joined the Young Professionals movement (WorldSkills Russia).

During this period, the number of competencies increased 2.4 times, the number of participants increased 3.5 times.

The share of professional educational organizations and higher education organizations, whose students took part in these competitions, amounted to 70% - 11 professional educational organizations and 3 higher education organizations.

In the “Brickwork” competency, students of Amur colleges twice became winners in the finals of the National Championship “Young Professionals” (WorldSkills Russia).

In the Amur Region, 3 specialized competence centers of the Young Professionals movement (WorldSkills Russia) are created and operate.
In 2019, accreditation according to WorldSkills standards is planned for the competencies “Bricklaying”, “Painting and decorative work” on the basis of the Amur College of Transport and Road Management, which is also the regional coordination center for this movement - 5.0 million rubles were allocated from the regional budget.

In addition, at the expense of funds from the federal budget through the Ministry for the Development and Development of the Russian Federation in the amount of 21.0 million rubles, the material and technical base of the Amur Technical College in Svobodny is being modernized (acquisition of equipment for the Top 50 professions: 01/15/05 “Welder (manual and partially mechanized welding (surfacing)” and 01/23/17” Master repair and maintenance of cars with the qualification “Car Driver”).

In order to promote the development of professional inclusion of students, graduates and young professionals with disabilities or with disabilities in the regional labor market, since 2017, the Amur Region has joined the Abilimpix movement (olympiads for professional skills of disabled people of various categories).

In 2018, the II regional championship “Abilimpix” was held in 10 competencies with the participation of 56 schoolchildren and students (schoolchildren - 25, students - 25, specialists - 6).

In 2018, both the number of participants (from 30 to 56 people) and the number of competencies of competitions (from 5 to 10) doubled, new competencies for students were introduced - Tailor, Dry Construction and Plastering.

For the first time, schoolchildren took part in the championship (according to the competencies Photographer-Reporter, Floristics, Artistic Design, Beading).

According to the results of the competition, the national team of the Amur Region took part in the IV National Championship “Abilimpix” in Moscow. According to the results of the national championship, the second place in the competence “Woodcarving” was won by a graduate of the Amur Pedagogical College.

In pursuance of the “May” Decree of the President of the Russian Federation, according to the results for 2018, the salary of teachers and masters of vocational training of educational organizations of primary and secondary vocational education amounted to 37.8 thousand rubles.

5. Health

The network of medical organizations includes:

- hospital facilities - 32, including 4 dispensaries;
- outpatient clinics - 125 (structural units), 7 legal entities;
- medical outpatient clinics - 56.
community hospitals - 22;
feldsher-midwife stations - 317;
housekeeping - 65.

In the region there are: 1 center for medical prevention, 6 departments and 15 rooms for medical prevention, 4 health centers (2 for children and 2 for adults), which allows to expand methods of prevention.

The indicator of the provision of the population with doctors of all specialties for 2018 amounted to 44.8 per 10 thousand people (city - 58.5; rural area - 16.3).

The shortage of medical personnel decreased to 35.6% in 2018.

The index of provision of the population with average medical workers is 99.5 per 10 thousand people.

One of the main measures to attract medical workers to work in state medical organizations is to increase the level of wages.

In order to comply with the Decree of the President of the Russian Federation dated 07.05.2012 No. 597 as of 01.01.2019, the average wage level was increased compared to 2013:
doctors 1.9 times and amounted to 75 391 rubles;
paramedical personnel 1.7 times and amounted to 37.9 thousand rubles;
nurses 2.6 times and amounted to 57.6 thousand rubles.

The salary increase indicators for all categories of personnel of all state medical organizations subordinate to the Ministry of Health of the Amur Region have been fully implemented.

The program “Zemsky doctor” and “Zemsky medical assistant” is being implemented.

In total, from 2012 to 2018, 349 agreements were concluded on the provision of a lump-sum compensation payment, including 329 - doctors, 29 - paramedics (from 2018), which helped to reduce the shortage of doctors in 18 municipalities of the region.

In 2019, 25 contracts will be concluded with doctors (one-time compensation payment in the amount of 1.0 million rubles) and 10 contracts with paramedical workers (one-time compensation payment in the amount of 500 thousand rubles), which will reduce the staff shortage. For these purposes, 30.0 million rubles are provided at the expense of the regional and federal budgets.

For the successful preservation and attraction of personnel in healthcare, other measures of social support are also needed.

Payments were made of lifting equipment, lump-sum payments, partial payment of housing, compensation for renting housing, supplements to scholarships, payment for postgraduate education.

In 2018, measures were taken to strengthen the material and technical base of state medical organizations.

At the expense of the federal budget, 21 class "B" ambulances were delivered to the region, which made it possible to improve the availability of medical care.

106.1 million rubles were allocated from the reserve fund of the Government of the Russian Federation for the development of the material and technical base of children's clinics and children's polyclinic departments of medical organizations. 52 units of modern medical equipment were purchased.

Funds from the federal budget in the amount of 9.6 million rubles were allocated for the purchase of a mobile medical complex in order to increase visits by rural residents (Seryshevsky district).

Measures were taken to erect 5 modular feldsher-midwife stations in the village. Antonovka Arkharin district, with. Vinnikovo, Mikhailovsky district, with. Bratolyubovka and Novonikolayevka of the Romnensky district, with. Ignashino of the Skovorodinsky district (18.2 million rubles).
Funds in the amount of 28.5 million rubles have been allocated from the reserve fund of the Government of the Russian Federation for the provision of medicines, including painkillers, and the organization of monitoring the provision of palliative care to adults and children.

In order to implement medical information systems in medical organizations of the state healthcare system, the budget of the region allocated funds from the reserve fund of the Government of the Russian Federation in the amount of 14.0 million rubles.

Funds in the amount of 59 million rubles were allocated for the purchase of equipment of the State Medical Institution of JSC Amur Regional Clinical Hospital - a computer tomograph, operating tables, an ultrasound machine of an expert class.

As part of the implementation of the measures of the social development plan for the centers of economic growth of the constituent entities of the Russian Federation, which are part of the Far Eastern Federal District, in 2018, 35 units of medical equipment for health care facilities in Svobodny were purchased in the amount of 51.2 million rubles.

In 2018, 441.5 million rubles are provided for the provision of medicines to the privileged category of citizens. As a result of the measures taken as of 01.01.2019, the number of recipes that are on deferred service was minimal (110). The issue of drug support for the privileged category of citizens is a priority in the activities of the Government of the Amur Region.

For timely emergency specialized medical care for patients with life-threatening conditions living in hard-to-reach areas with difficult climatic and road conditions, the work of ambulance aircraft was organized. The priority project “Development of air ambulance” is being implemented with the involvement of federal budget funds.

In 2018, 257 sorties of ambulance aircraft were carried out, 576 patients were evacuated during departures.

In order to increase the availability of medical care to the population of remote areas of the region, during 2018, field specialists of 24 mobile teams were carried out in remote settlements of the region in accordance with the approved schedules.

In 2018, medical organizations of the region, in accordance with the approved plans, carried out 5,067 field visits of specialist teams, during which 122.5 thousand people were examined, including 49.9 thousand children.

As a result of the work carried out, the number of newly diagnosed diseases increased, which facilitated the timely taking of patients for follow-up, and the timely appointment of treatment.

When conducting field work in the settlements of the region, 7 mobile medical outpatient clinics, 9 mobile fluorographs, and 1 mobile FAP are used.

In order to increase the efficiency of field work and complement its types, the project “The Way to Health” is being successfully implemented in the Amur Region. For field work, doctors are involved - narrow specialists, senior students of the Amur Medical College, using a mobile outpatient clinic, a mobile fluorograph and other equipment.

Over the 12 months of the project, 4525 people were examined: adults - 3105 people (68.6%), children - 1420 (31.4%).

Newly diagnosed diseases among the adult population were recorded in 453 people.

545 people were sent for further examination, including 425 adults and 120 children.

On 01/01/2019, the Oncological Patrol pilot project began, aimed at improving the diagnosis of cancer detection in the early stages.

In 2018, 5,506 (in 2017 - 5,075) patients (478.1 million rubles) were provided with medical care.

At the same time, the volume of high-tech medical care in the most demanded profiles has significantly increased: cardiovascular surgery - more than 3.2 times, traumatology and orthopedics - 2.1 times, ophthalmology - 5.5 times.

It was possible to achieve a reduction in the mortality rate from all causes, which at the end of the year amounted to 13.3 per 1000 population (2017 - 13.4).

In the region, a set of measures is being taken to reduce the infant and maternal mortality rates.
The system of level-by-level rendering of medical care and routing of pregnant and sick children has been clearly worked out. 2 round-the-clock advisory centers operate around the clock. An electronic monitoring program for all pregnant women in the region and a monitoring program for visits to children up to a year are working.

Active patronage of families in socially dangerous situations and in difficult life situations is carried out in accordance with the established Procedure for interagency cooperation to identify and prevent family problems, approved by the Government of the Amur Region.

Increasing fertility is possible through the prevention of abortion and increasing the availability of in vitro fertilization. In 2018, 598 IVF procedures were performed, which is 15.1% more compared to 2017.

As a result of the measures taken, the infant mortality rate in the Amur Region was 5.1 per 1000 live births, which corresponds to the indicator for the Russian Federation and lower than the indicator for the Far Eastern Federal District (5.4 ‰).

To further reduce mortality, the regional projects “Healthcare” and “Demography” are being implemented.

In order to implement the Decree of the President of the Russian Federation dated 07.05.2018 No. 204 “On national goals and strategic objectives of the development of the Russian Federation for the period until 2024”, 7 regional projects were approved in priority areas in the field of “Healthcare” for 2018-2024 (7 878, 6 million rubles), including:

- development of primary health care (835.2 million rubles);
- fight against cardiovascular diseases (193.6 million rubles);
- a program for the development of children’s health in the Amur Region, including the creation of a modern infrastructure for the provision of medical care for children (564.5 million rubles);
- the fight against cancer in the Amur region (5,155.8 million rubles);
- provision of medical organizations of the region, subordinate to the Ministry of Health of the region, with qualified personnel;
- creation of a single digital circuit in healthcare in the Amur Region (1,129.3 million rubles);
- development of the export of medical services (the provision of medical services to foreign citizens).

The implementation of regional projects will reduce mortality from diseases of the circulatory system, mortality from neoplasms, including from malignant, infant mortality.

6. Culture

The main areas of activity in the field of culture in 2018, as before, were determined taking into account the provisions of the Decree of the President of the Russian Federation of December 24, 2014 No. 808 “On Approving the Foundations of State Cultural Policy” and the Strategy of state cultural policy for the period up to 2030, approved by order of the Government of the Russian Federation dated 02.29.2016 No. 326-r, the purpose of which is to provide residents of the country with more accessible cultural services and to maintain the necessary level of support for regional and municipal cultural institutions of the subject. Implementation of the state policy in the field of culture was carried out in the framework of the state program “Development of culture and art of the Amur Region”, for the implementation of measures in accordance with the Law of the Amur Region “On the Regional Budget for 2018 and the Planning Period 2019 and 2020” funds were allocated in the amount of 416 , 2 million rubles, of which from the regional budget - 381.4 million rubles (91.6%), the federal budget - 34.8 million rubles (8.4%).
There are 3 repertory theaters in the region. The number of performances presented to the audience in 2018 was 730, which was visited by 210,314 spectators. 12 performances staged.

During 2018, the State Public Joint-Stock Company "Amur Regional Drama Theater" went on tour to all cities and regional centers of the Amur Region, where 43 performances were shown, which were attended by 11,690 people.

In 2017, work began on the supply to the state cadastral registration of information about the protective zones of the OKN - architectural monuments. In 2017, information was provided on 2 protection zones, 68 in 2018. This work is planned to be completed in 2019.

As part of the control and supervision activities for the technical condition of the OKN in 2018, 75 monuments were inspected.

In 2018, work was carried out to repair 8 architectural monuments, including 1 in the city of Svobodny. The total amount of disbursed funds amounted to more than 30.0 million rubles.

Local authorities carried out current repairs of more than 100 monuments to Amur residents who died during the Great Patriotic War.

As a result of this work, the destruction or damage to 124 archeological monuments was prevented in 2008-2018. In 2018, large-scale rescue archaeological excavations were carried out at the construction site of the Amur gas chemical complex.

7. Physical education and sport

In 2018, the modernization of the sports reserve training system was continued. In total, according to the results of the year, there were 30 sports training institutions and 1 regional center for sports training. Of these, 17 (17 sports schools) in the education system, 13 (1 secondary school, 9 secondary schools, 2 youth schools, 1 central school) in the education system, and others - 1 (NU DOD "Martial Arts Sports School"). The share of organizations providing sports training services in accordance with federal standards of sports training in the total number of organizations in the field of physical education and sports, including for people with disabilities and disabled people, was 92.3%.
The total number of institutions involved in the system of sports training in 2018 amounted to 15,276 people. 5,331 athletes underwent sports training in accordance with federal standards of sports training, which is 528 more than in 2017, the training process was provided by 260 full-time trainers and trainers.

In 2018, 490 events were held, of which 287 were regional competitions with the participation of 22,860 people, 8 complex sports and athletics events among various categories of the population. The participation of 703 athletes in the national teams of the region and the Far Eastern Federal District in 203 official competitions of the Far East, All-Russian and international levels was ensured.

The sports title "Master of Sports of Russia" - 14 athletes, the category "Candidate for Master of Sports" - 206 athletes, the first sports category - 255 athletes, the All-Russian category of sports judges was awarded to 8 sports judges.

The widespread implementation of the All-Russian Physical Culture and Sports Complex “Ready for Labor and Defense” was ensured. The number of the population of the region that took part in testing the TRP tests amounted to 12 thousand people, the number of people who fulfilled state requirements for insignia was more than 5 thousand people.

Measures have been taken to develop sports infrastructure.

The number of sports facilities increased from 2187 to 2196 units (9 units, the largest of them is a fitness center with a universal games room, swimming pool and children's bath in Belogorsk, an indoor ice rink with artificial ice in Blagoveshchensk).

1.6 thousand square meters were commissioned. m of new plane sports facilities: the construction of a universal football field with rubber coating in the village. Yekaterinoslavka Oktyabrsky District, Amur Region.

Repair of the stadium in the village of Tambovka, Tambov district.

3 projects of local initiatives of citizens living in rural areas have been implemented: a playground for sports and recreation with children has been introduced in the microdistrict of the village of Ivanovka, Ivanovo district, sports playgrounds in the village. Novoaleksandrovka and with. Tambovka Tambov district.

The one-time throughput in this regard increased from 58,731 to 59,040 people per hour.

The provision of the region with sports facilities based on the one-time capacity of sports facilities amounted to 64.5%.

In order to further develop the sports infrastructure of the region, a number of projects are planned:

- completion of the construction of a sports complex with a swimming pool in ZATO Tsiolekovsky;
- erection of 8 small sports grounds for regional and municipal testing centers VFSK GTO, equipped with modern sports and technological equipment in the city of Shimano, Zavitinsk, s. Natalino, s. Markovo Blagoveshchensk district, with. Romny Romnensky district, p. Tokur, Selemdzhinsky district, with. Novoaleksandrovka Seryshevsky district, with. Chernihivka, Svobodnensky district;
- the construction of 2 outdoor fitness complexes for extracurricular health centers in Belogorsk and s. Tomskoye Seryshevsky district;
- commencement of the construction of 5 fitness centers in Blagoveshchensk, Tynda, Magdagachi, Tambovka (at the expense of Gazprom PJSC).

In the direction of preparing the sports reserve, work will continue to switch to sports training programs for the youth sports school of the Mazanovsky district and the sports school "Belogorets" in Belogorsk.

Material and technical support is of great importance in the preparation of a sports reserve. In 2019, the region will receive a subsidy from the federal budget in the amount of 6.2 million rubles for the purchase of sports equipment and equipment for sports training organizations of the Amur Region in the framework of the project "Sport is the standard of living", which will be allocated for
targeted support of 7 sports schools implementing sports training programs for basic Olympic, Paralympic, and Deaflympic sports: regional sports school of the Olympic reserve, regional sports school, sports schools No. 1 and No. 2 of the city of Belogorsk, sports Secondary schools No. 1 and No. 2 of Svobodny, sports school No. 2 of Tynda.

In the Amur Region, the proportion of the population systematically involved in physical education and sports is 29%.

8. Social protection of the population

As of 01.01.2019, the total number of recipients of social support measures amounted to 297.6 thousand people, or 37% of the total population of the region.

More than 70 types of social support measures are provided for 30 categories of recipients - veterans of war, military operations, home front workers, labor veterans, labor veterans of the Amur Region, military service veterans, disabled people, families with children, including large families, rural specialists, rehabilitated, elderly, citizens in need of support and other categories.

For the implementation of the measures of the state program “Development of the system of social protection of the population of the Amur Region” in the budget of the Amur Region in 2018, 8.9 billion rubles are envisaged, including 1.7 billion rubles from the federal budget, 99% of budget funds have been spent (8.8 billion rubles, including 1.7 billion rubles from the federal budget).

One of the priority areas of the social policy of the Government of the region remains support for large families in various forms: payment of housing and utilities, free travel by bus, provision of medicines, meals at school, purchase of school clothes and shoes.

As of 01.01.2019, the recipients of the monthly social payment for housing and utilities are 166,156 citizens of certain categories, including 37,036 people - members of large families. The amount of funds paid amounted to 2.2 billion rubles, of which 707 million rubles were from the federal budget.

In 2018, 5,298 schoolchildren took advantage of free travel on public passenger transport in the amount of 30.8 million rubles, free medicine - 9,181 people in the amount of 28.0 million rubles, 17,550 people received free meals in the school in the amount of 52.0 million rubles, the annual cash payment for the purchase of school clothes and (or) shoes was paid to 16,647 students from large families in the amount of 35.9 million rubles.

In total, 37,582 members of large families for a total of 259.1 million rubles took advantage of social support measures in 2018.

Citizens whose expenses for housing and utility bills exceed the maximum allowable share of citizens’ expenses for housing and utility bills in the total family income are recipients of a subsidy for housing and utilities. The subsidy in the Amur Region covers 27,875 families. The expenses of the regional budget for the provision of subsidies to citizens as of 01.01.2019 amounted to 819.7 million rubles.

In the reporting period, targeted social assistance was provided to 13,631 citizens, including 9,165 to families with children. The amount of funds from the regional budget spent on these purposes amounted to 44.8 million rubles. Targeted social assistance under a social contract was provided to 392 families.

In 2018, the implementation of the technology of targeted social assistance to low-income families with children living in rural areas of the region, “Self-sufficiency”, was continued. As part of the technology, low-income families are provided with social benefits for the development of subsidiary plots or the organization of individual labor activity. The amount of payment is determined depending on the individual family plan and amounts to 50 thousand rubles.

As of 01.01.2019, 64 families from rural settlements took part in the technology. The expenses of the regional budget amounted to 3.0 million rubles. Families who purchased livestock with the money received, not only were able to improve the quality of their nutrition, but also, selling, for example, milk, increase their monthly cash income.

In just 8 years of implementing the technology, 1,348 families took part in it.
In 2018, the summer health campaign reached 6,920 children (in 2017 - 6,450 children) who are in difficult situations, aged 7 to 15 years. Funds in the amount of 91.3 million rubles were allocated for these purposes, including: 89.9 million rubles from the regional budget; 1.4 million rubles from the federal budget - at the expense of the Fund to support children in difficult situations.

The proportion of healthy children in difficult situations out of the total number of children in this category was 72.8%.

Positive rates were noted in the family arrangement of orphans. From 2015 to 2019, the number of orphans and children left without parental care, information about which is in the regional databank, decreased by 68.3%.

As of 01/01/2019, the regional data bank recorded 849 children left without parental care, who need a device in the family.

In 2018, 646 children left without parental care were transferred to family forms of education, including:

under guardianship (trusteeship) 346 children were transferred;

foster families - 201 children;

adopted - 18 children;

transferred to blood families - 81 children.

As of 01.01.2019, 4,135 children live in foster care in the foster families of citizens of the Amur Region.

In the reporting period, work continued on 12 rental centers for rehabilitation equipment in the cities of Blagoveschensk, Skvorodino, Zavitinsk, Belogorsk, Svobodny, Raichikhinsk, Zeya, Tynda and in the urban settlement Arkhara, Seryshevo and Magdagachi, r.p. Novobureysky.

The total number of technical rehabilitation equipment available at the rental points and intended for rental, as of 01.01.2019 - 1 792 pcs. The range of rolling stock is represented by 89 models of technical means of rehabilitation. These are medical beds, wheelchairs, crutches, support canes, anti-decubitus mattresses and pillows, walkers, support for standing and sitting, support under the back, exercise bikes, chairs for the bath / shower, handrails for the bath, etc. During 2018, items 4,452 facts of the issuance of units of technical means of rehabilitation were registered for rental to people with disabilities, senior citizens and people with limited mobility. 3976 people applied to rental offices for the indicated period.

Social services are provided by 1 unitary enterprise and 66 institutions, of which 34 are institutions with 24-hour stay of people, including 13 institutions for senior citizens and disabled people (adults).

Social services at home are provided by 19 institutions.

The total bed capacity in institutions is 2,156 beds, of which 552 beds are in 4 general boarding houses, 1,504 beds are in 4 psycho-neurological boarding schools, 100 beds are in the Center for Social Adaptation for people without a fixed residence and occupation (including 20 places in the night stay department). The level of use of the bed fund is 100%.

There are 6 charity departments in stationary social services with a total capacity of 219 beds, designed to serve senior citizens, disabled people of groups 1 and 2, who are in constant bed rest or who move around the ward with outside help.

The private sector is represented by 6 organizations that provide social services to citizens in a stationary form of social services.

The Register of Social Services Providers of the Amur Region is being maintained, which consists of 58 organizations, including 5 socially oriented non-profit organizations (hereinafter - SB NPOs) that provide social services to the population, and 1 limited liability company.

Social services without accommodation, including at home, are provided by 11 comprehensive centers of social services for the population. Institutions work with families with children, senior citizens and people with disabilities.

In 2018, social services were provided to 23,609 citizens. Compared to 2017, the number of social services provided increased by 10%.
In order to strengthen the material and technical base of social service organizations, improve the quality of social services and the effectiveness of their delivery, funds for repair and construction are provided in the framework of the social program “Strengthening the material and technical base of social service organizations and computer literacy training for non-working pensioners in 2018” work in the state autonomous institution of social services of the Amur region boarding house “Priozerye” for the elderly and Aids in the amount of 1.5 million rubles, including at the expense of the regional budget -. 224.8 thousand rubles, the funds of the Pension Fund of the Russian Federation -. 1.3 mln. rubles. Additionally, funds in the amount of 5.2 million rubles were allocated from the regional budget.

At the expense of the reserve fund of the Government of the Russian Federation, in 2018, federal budget funds were allocated to social service institutions in the amount of 32.7 million rubles for repairs and equipment:

- 28.8 million rubles allocated for the overhaul of the State Autonomous Institution of JSC Ust-Ivanovo Psychoneurological Boarding School;
- 3.9 million rubles for the repair of GAU SO JSC Blagoveschensk Boarding House.

As part of these funds, the State Autonomous Institution “Ust-Ivanovo Psycho-Neurological Boarding School” made major repairs in department No. 1, purchased kitchen, laundry and medical equipment, as well as a specialized motor vehicle.

In GAU SB JSC Blagoveschensk Boarding House, in a two-story residential building, the roof was repaired, the roof system was renovated, the attic was insulated, the roof was completely replaced.

At the end of 2018, the ratio of the average salary of social workers, including social workers of healthcare institutions, to the average monthly income from labor activity in the subject of the Russian Federation amounted to 100.24% (37.6 thousand rubles).

Within the framework of the “Accessible Environment” program with the involvement of the federal budget (10.327 million rubles) in 2018, adaptation work was carried out at 24 socially significant facilities (including 18 for the first time adaptable). The indicator of accessibility of social infrastructure by the end of the year was 59%.

In 2018, the Amur Region continued its cooperation with the Foundation for the Support of Children in Difficult Life Situations (hereinafter referred to as the Fund for the Support of Children). With the financial assistance of the Fund for the Support of Children in the Amur Region, two new regional sets of measures began to be implemented:

- a set of measures to build a modern infrastructure of early care services for children with disabilities and children with disabilities in the Amur Region in 2018-2019. (Fund funds in the amount of 8.0 million rubles);
- a set of measures to organize productive socially significant activities of minors in conflict with the law in the Amur Region for 2018-2019 (Foundation funds in the amount of 8.4 million rubles).

In order to increase the birth rate in the Amur Region, from 01.01.2018, in accordance with Federal Law of December 28, 2017 No. 418-ФЗ “On Monthly Payments to Families with Children,” a monthly payment was introduced in connection with the birth (adoption) of the first child.

The right to receive a monthly payment in connection with the birth (adoption) of the first child arises among families if the child is born (adopted) starting from 01.01.2018 and the average per capita income of the family does not exceed 1.5 times the cost of living of the able-bodied population (in 2018 - 18,276 rubles, in 2019 - 18,039 rubles).

The amount of payment in 2018 amounted to 11 979 rubles, in 2019 - 11 909 rubles (in the amount of the subsistence minimum for children established in the subject of the Russian Federation for the II quarter of the year preceding the year of applying for the payment).

In 2018, the number of children for whom the monthly payment was first made amounted to 1,528 people, the amount of funds spent amounted to 137.3 million rubles.

One of the significant measures of social support in 2018 was the release of participants and invalids of the Great Patriotic War of 1941-1945 from paying contributions for the overhaul of common property in an apartment building.
For the reporting period, 205 participants and invalids of the Great Patriotic War of 1941-1945 were exempted from paying contributions for the overhaul of common property in an apartment building. The amount of funds allocated for these purposes amounted to 668.4 thousand rubles.

According to the results of the competitive selection in 2018, 11 SONCO received financial support for the implementation of socially significant projects: 5 SONCO, whose activities are aimed at the rehabilitation and social adaptation of people with disabilities; 3 SONCO, whose activities are aimed at improving the quality of life of elderly citizens; 2 SONCO - supported projects aimed at increasing the social activity of veterans; 1 SONCO received financial support in the area of prevention of family problems and social orphans.

In 2018, 2.0 million rubles were provided for the implementation of this measure.

In order to implement the Decree of the President of the Russian Federation dated 05/07/2017 No. 204 “On national goals and strategic objectives of the development of the Russian Federation for the period until 2024” in 2018, the Government of the region carried out work on the development of the regional component of the national project “Demography”.

As part of the implementation of the activities of the regional project “Demography”, it is planned to attract 1.6 billion rubles from the federal budget in the regional budget in 2019.

Answers to questions posed by the Legislative Assembly of the Amur Region

JUST RUSSIA Faction

1. In 2018, a meeting was held with the participation of the Governor of the Amur Region of deputies of the Legislative Assembly of the Amur Region. From the JUST RUSSIA faction, a question was asked about organizing the transportation of schoolchildren to Magdagachinsky secondary school No. 3. The governor gave an order to solve this issue to the Ministry of Transport and Construction of the Amur Region, the Ministry of Education and Science of the Amur Region. Currently, the issue of transporting children has not been resolved. Children walked all winter (3-4 km.) To the educational institution in the cold.

В соответствии с пунктом 1 части 1 статьи 9 Федерального закона от 29.12.2012 № 273-ФЗ «Об образовании в Российской Федерации», статьи 15 Федерального закона от 06.10.2003 № 131-ФЗ «Об общих принципах организации местного самоуправления в Российской Федерации» организация предоставления общедоступного и бесплатного общего образования, в том числе транспортное обеспечение обучающихся, возлагается на органы местного самоуправления, являющиеся учредителями образовательных организаций, каковыми для МОБУ СОШ № 3 являются администрация Магдагачинского района и отдел образования администрации Магдагачинского района.

Согласно статье 40 Федерального закона от 29.12.2012 № 273-ФЗ «Об образовании в Российской Федерации» транспортное обеспечение обучающихся включает в себя организацию их бесплатной перевозки между поселениями до государственных и муниципальных образовательных организаций, реализующих основные образовательные программы, и обратно, а также предоставление в соответствии с законодательством Российской Федерации мер социальной поддержки при проезде на общественном транспорте.

Вне зависимости от вида перевозок маршруты движения транспорта, включающие в себя улицы и автомобильные дороги, удовлетворяющие требованиям безопасности к перевозам пассажиров, дорожные знаки, разворотные площадки, остановочные павильоны, искусственное освещение обустраивают уполномоченные органы власти.

According to the education department of the Magdagachinsky district, 150 schoolchildren and pupils live in the Lesopunkt and Nizhniye DOSy microdistricts of Magdagachi, the distance to the educational institution is from 1 to 2 km. For the free transportation of schoolchildren and pupils to MOBU secondary school No. 3, the opening of the school route is necessary.
Judgment on the administration of the municipality Magdagachi is entrusted with the obligation, until 01.07.2019, to organize transport services for the population within the boundaries of the settlement by establishing municipal regular transport routes.

According to paragraph 2 of Article 11 of Federal Law dated 13.07.2015 No. 220-ФЗ “On the Organization of Regular Transportation of Passengers and Baggage by Road Transport and Urban Surface Electric Transport in the Russian Federation and on Amending Certain Legislative Acts of the Russian Federation” Municipal Regular Routes within one rural settlement, within the boundaries of two or more settlements located within the boundaries of one municipal district, are established, changed, canceled by the authorized body locally a government of municipal area, within the boundaries of which are indicated settlement.

In order to assist in resolving issues of local importance within the framework of the subprogram “Development of a network of public roads of the Amur Region” of the state program of the Amur Region “Development of the Transport System of the Amur Region”, the Ministry of Transport and Roads of the region annually provides a subsidy to municipalities to co-finance the costs of road activities in relation to local roads and structures on them.

In 2018, the amount of the subsidy for the co-financing of expenses for the implementation of road activities in relation to local roads and the facilities of the administration of the urban settlement on them, Magdagachi amounted to 20.1 million rubles.

The choice of repair facilities for the road network is carried out by the administration of the municipality independently in agreement with the deputies, representatives of public organizations, school directors, chief doctors of medical institutions, traffic police and residents of the municipality.

In urban area Magdagachi, measures were taken to install road signs, the device of artificial lighting in the streets of Novostroynaya, Mukhina, urban settlement Magdagachi, a bus route was determined and bus stops were installed (in the amount of 4 pieces).

At the moment Magdagachi re-sent documents to obtain a license in accordance with the new requirements, to organize transport services for the population within the boundaries of the urban settlement, Magdagachi.

2. Regional rescuers of the Amur Region do not have preferential pension provision in comparison with federal rescuers. The JUST RUSSIA faction came up with a bill to equalize social guarantees between federal and regional rescuers, as was done in the Khabarovsk Territory, the Republic of Sakha (Yakutia) and Sakhalin Oblast. The bill was not supported, as a result 73 rescuers will not be able to receive preferential pension benefits.

JUST RUSSIA fraction (hereinafter referred to as the fraction) introduced to the Government of the Amur Region a draft law of the Amur Region “On Amending Article 13 of the Law of the Amur Region “On the Emergency Rescue Service of the Region and the Status of Rescuers” (hereinafter - the bill), which proposed to establish a monthly monetary payment to regional rescuers who have reached the age of 40, or regardless of age, if they have constantly worked as rescuers in professional emergency services, professional emergency rescue formations of at least 15 years and participated in the liquidation of emergency situations in the amount of 9,965.80 rubles.

According to the explanatory note to the bill, the proposed changes included the allocation of additional funds of the regional budget for their financing in the amount of 1,435 million rubles.

In accordance with Article 34 of the Federal Law of August 22, 1995 No. 151-ФЗ On Emergency Rescue Services and the Status of Rescuers, the establishment of social support measures for this category of citizens is a right of the subjects of the Russian Federation.

In this regard, it should be noted that, on the basis of Article 261 of Federal Law dated 06.10.1999 No. 184-ФЗ “On General Principles of Organization of Legislative (Representative) and Executive Bodies of State Power of the Subjects of the Russian Federation” financing of this power is not an obligation of the subject of the Russian Federation and is carried out subject to availability.

At the same time, in accordance with the terms of the Agreement on measures for socio-economic development and improvement of public finances of the Amur Region dated 02/09/2018 No. 01-01-06 / 06-56, concluded with the Ministry of Finance of the Russian Federation, the Amur Region has not been able to establish since 2018 new expenditure obligations not related to resolving
issues referred by the Constitution of the Russian Federation and federal laws to the powers of state authorities of the constituent entities of the Russian Federation.

In connection with the foregoing, the adoption of the bill was not supported.

Принимая во внимание сохранение в 2019 году сложной экономической ситуации, необходимость соблюдения Правительством Амурской области обязательств по недопущению увеличения расходов областного бюджета принятие положительного решения по существу предложения фракции в настоящее время не представляется возможным.

3. В настоящее время родители оплачивают школьное питание стоимостью 50,00 или 87,00 рубля, для многодетных семей стоимость составляет 19,70 рубля (выдается талон). Просим разработать возможность обеспечения одним видом школьного питания с единой стоимостью всех школьников начальных классов с 1 по 4 класс (кроме детей с ограниченными возможностями здоровья). Исключить разделение в питании школьников начальных классов по категориям и социальной привязанности, т.к. это приводит к социальной неправедности, конфликтам и неприязни между детьми.

For example, in Yekaterinburg they provide free meals for primary school students, as well as for students in grades 5-11, who belong to the following categories: orphans and children left without parental care, children from low-income and large families, as well as refugees from Ukraine. In addition, students with disabilities are entitled to free meals.

Consider free meals for all primary school students.

The organization of catering for students is assigned to organizations engaged in educational activities, and is regulated by Article 37 of the Federal Law of December 29, 2012 No. 273-FZ "On Education in the Russian Federation".

In accordance with paragraph 4 of part 1 of Article 4 of the Law of the Amur Region dated 19.01.2005 No. 408-OZ "On Measures of Social Support for Large Families", exemption from payment for food (breakfast, lunch) for students in general educational institutions was established as a measure of social support for large families educational programs of primary, basic general and (or) secondary general education, in professional educational organizations - on the days of classes at a fixed amount per month (determined by the regional norm active legal act) for each student.

In accordance with the procedure approved by the Decree of the Government of the region dated September 25, 2013 No. 448 "On approval of the state program" Development of education in the Amur Region ", since 2018, subsidies have been provided to the budgets of municipalities for providing free two meals a day to children with disabilities studying in municipal educational organizations.

Currently, the Government of the region is considering the adoption of a law providing for free meals for children studying in municipal educational institutions of the Amur Region of grades 1-4.

4. We ask you to develop an electronic queue system in all children's clinics. Currently, coupons are issued 2 times less than the doctor can accept. Chaotic queues are created from coupon patients and those who came without a coupon urgently.

In accordance with the order of the Ministry of Health of the Amur Region dated October 27, 2017 No. 843 "On the functioning and development of the service" Make an appointment with the doctor in electronic form "in medical organizations of the Amur Region using the Personal Patient Account "service, make an appointment for a scheduled doctor's appointment clinics are possible:

- through the federal service "Electronic Registry" using the Unified Portal of State Services https://www.gosuslugi.ru (https://www.gosuslugi.ru/);
- through the regional portal "Electronic Registry" https: //registration28.rf;
- through electronic terminals ("infomats") installed in the lobby of medical organizations that provide primary health care;

Call Center: 77-07-03;

directly at the registry of a medical organization providing primary health care to children, daily from 07.30.

The provision of medical assistance to citizens in the Amur Region is carried out in accordance with the procedures for the provision of certain types of medical care (according to profiles) and standards of medical care according to the established diagnosis, in the amount and terms established by the Territorial Program of State Guarantees of Free Medical Assistance to the Population of the Amur Region for 2019 and for the planning period of 2020 and 2021, approved by the Decree of the Government of the Amur Region dated December 28, 2018 No. 656, which provides the basic requirements for its qualities and safety (hereinafter - Territorial Program).

In accordance with paragraph 1 of Article 11 of the Federal Law of 21.11.2011 No. 323-ФЗ "On the Basics of Protecting the Health of Citizens in the Russian Federation" (hereinafter - the Federal Law), the refusal to provide medical care in accordance with the program of state guarantees of free medical care for citizens does not allowed.

The number of coupons per day for one doctor in a children's clinic is set in accordance with the current load standards per doctor’s staff unit per day.

In addition to the planned appointments, pediatricians and medical specialists perform examinations of children who come in urgent and urgent form during the day.

5. In February 2019, a collective appeal was received by residents of the urban settlement. Progress with a request to assist in providing central heating and water supply on the street. Proletarian houses No. 1, 1а, 2, 2а, 3, 5, 7, 8, 9, 10, 11, 13, 14, 15, 16, 17, 18. A request has been sent to the Ministry of Housing and Public Utilities of the Amur Region, please provide assistance in positive solving the issue.

The heat supply of the working village (urban area) Progress is carried out by the joint venture "Raichikhinskaya SDPP" JSC "Far Eastern Generating Company" branch "Amur Generation", which is the owner of the heating networks of the village (urban area) Progress. Also, the JV "Raichikhinskaya TPP" is a guaranteeing organization for district heating. At the request of the administration about the possibility of laying heating networks to individual residential buildings on the street. The proletarian joint venture "Raichikhinskaya TPP" reported that the laying of heating networks on the street. Proletarskaya was included in the heat supply scheme of the working village (urban area). Progress is possible no earlier than 2025, since this work is costly and must be included in the investment program.

Собственники индивидуальных жилых домов имеют возможность проложить сети за собственные средства. Магистральные сети теплоснабжения проходят по ул. Заводская, существующая тепловая камера находится на расстоянии 220 метров от дома № 21 по ул. Пролетарская.

Фракция КПРФ

The phased gasification of the Amur Region will begin no earlier than 2019 after the commissioning of the Power of Siberia gas pipeline.

In the long term, the overall level of gasification in accordance with the General Scheme of gasification of the region approved by the governor of the region will be 96%. These are all areas of the region, with the exception of Selemdzhinsky.
Decree of the Government of the region dated December 26, 2017 No. 623 approved the regional gasification program for housing and communal services, industrial and other organizations of the Amur Region for the period 2018 - 2022 (hereinafter referred to as the Program), which defines the calendar schedule of activities for the preparation of natural gas for municipalities, sources and volumes of financing activities.

The program for the period 2018 - 2022 in the priority municipalities of the region: ZATO Tsiolkovsky, Svobodny and Blagoveschensk cities, Svobodensky and Blagoveschensky districts are planned as organizational (development of gasification schemes for settlements, design estimates for housing and communal services and street gas distribution networks), as well as technical measures (preparing consumers for the reception of natural gas, transferring boiler houses to gas consumption, construction and installation works at zoraspredelitelnyh networks).

Understanding the importance of the tasks set for gasification of the region, the measures of the Program are implemented on time.

In 2018, an event was planned and implemented to develop a gasification scheme for the city of Svobodny. The administration of Svobodny held an auction to select a design organization to develop a gasification scheme for the city. As a result of the auction, a contract is concluded with the winner. The deadline is 01.06.2019. As of 01.01.2019, the administration together with the designers assessed the prospective consumption of the city, compiled a “road map” for gasification, and determined the sequence of connecting facilities to the gas transportation system.

In 2019, procedures are planned for the selection of developers of design estimates for the construction of intra-settlement (street) gas distribution networks of the city of Svobodny and design estimates for the technological connection of the ZATO Tsiolkovsky boiler house to the gas branch, as well as the preparation of housing and communal facilities for receiving natural gas.

When developing the Program for the next five-year period, organizational and technical measures will be planned. The sequence of preparation of the regional municipalities and the amount of funding for events will be determined taking into account the capabilities of the regional budget and in accordance with the schedule for synchronizing the construction of gas distribution stations and gas pipelines at the expense of Gazprom.

2. In recent years, there has been a downward trend in housing construction in the Amur Region. What program activities on the part of the Oblast Government are planned to revive this area?

Since 2014, a decrease in the volume of commissioned housing has been observed in the construction complex of the region (in 2016 - 221.2 thousand sq. M., in 2018 - 158.9 thousand sq. M.).

The main problems that impede the development of housing are currently:

- low availability of mortgage products for the population (high down payment, high interest rate);
- the lack of land for large-scale development provided with communal infrastructure (the lack of engineering infrastructure for housing provided for housing affects the cost of 1 square meter of housing, since about 30% of the developer’s funds go to the construction of utility networks, which accordingly increases the cost of housing);
- financial difficulties of developers (lack of working capital for large-scale construction);
- toughening legislation in the field of shared construction;
- reduction of budget financing of housing programs.

In order to achieve the target to increase the volume of housing construction (the federal project "Housing") of not less than 120 million square meters. m per year by 2024, established by Decree of the President of the Russian Federation dated 05/05/2018 No. 204 "On national goals and strategic objectives of the development of the Russian Federation for the period up to 2024", the Council under the Government of the Amur Region for Strategic Development and Project Activities on 14.12.2018 approved regional project "Housing" (Amur region).
By the Ministry of Construction of Russia by letter of February 21, 2019 No. 6137-VYA / 07, adjusted values of the indicator of housing commissioning volumes for the Amur Region for 2019-2024 were brought.

The federal project “Housing” does not provide for the allocation of funds from the federal budget to the subjects of the Russian Federation for the implementation of additional measures that have already been implemented within the framework of state programs of the Russian Federation in order to stimulate an increase in housing commissioning. 

Thus, to increase the volume of housing construction, the Government of the region proposed to include the following measures in the National Program for the Development of the Far East:

1. Preferences to maintain effective demand among the population:
   - federal subsidizing of regional programs of preferential mortgage lending, providing for compensation of the interest rate on mortgage loans up to the level of 2%, payment of down payment, expansion of the category of citizens eligible for preferential lending;
   - an increase in federal funding for existing government obligations to provide housing for certain categories of citizens (orphans, veterans, disabled people, migrants from the Far North, young families, etc.). Funds required to close existing queues - 37,035 million rubles.

2. Preferences to support the activities of developers:
   - co-financing from the federal budget for the construction of backbone networks of communal infrastructure to provide housing sites. The cost is estimated at 6,312.0 million rubles;
   - compensation to developers for part of the cost of technological connection of residential buildings (supply - 4 thousand rubles / 1 sq. m of living space). Need for funds - 1 512 million rubles;
   - adjustment of the Federal Law of December 30, 2004 No. 214-ФЗ “On shared construction” regarding the softening of requirements for developers (operating in the territory of the Far Eastern Federal District). This measure will not require budgetary expenditures.

3. Preferences to support the activities of manufacturers of building materials:
   - the establishment of a minimum quota for the use by residents of ASEZ, investors of products manufactured by enterprises of the construction industry of the region, at least 20% of the required volume;
   - the provision of government support measures for the implementation of investment projects related to the modernization of production and (or) an increase in the range of products (tax incentives for property, interest rate subsidies on loans taken to modernize production, etc.);
   - subsidizing part of the costs to enterprises in the construction industry related to the training of specialists, advanced training of employees and retraining of specialists, including in connection with the modernization of production;
   - subsidizing part of the costs to enterprises of the construction industry for electricity spent on the production of building materials.

To date, the volume of housing commissioning in the region is planned due to the implementation of the following projects:

The volume of commissioning of housing in the Amur Region for 2019-2024, thousand square meters.

Table 5

1. Participation in events aimed at providing investors with land without tendering for housing, as part of the implementation of large-scale investment projects.

In March 2018, a tripartite agreement was signed between Amurstroy JSC, the administration of the city of Blagoveshchensk and the Ministry of Transport and Construction of the region on cooperation in connection with the implementation of a large-scale investment project in the 404 quarter of the city of Blagoveshchensk.

Within the framework of this project, it is planned:

- put into operation in the period from 2021 to 2027 11 apartment buildings for 952 apartments with a total living area of 42.8 thousand square meters. meters with the obligation of the developer to offer, in accordance with the requirements of the law, at least 30% of the area of residential premises in apartment buildings, the construction of which is provided for by a large-scale project, for acquisition by executive authorities or local governments in order to replenish their state and municipal housing stock;
- to provide infrastructure for the land plots provided for the construction of 11 apartment buildings located in the 404 quarter by building intra-quarter driveways, a transformer substation, a booster water pump station, and a distribution transformer substation.

2. Creation of a rental real estate fund (service housing).

As part of the implementation of the long-term plan for the comprehensive socio-economic development of Svobodny, Amur Region, approved by order of the Government of the Russian Federation of July 22, 2017 No. 1566-r (hereinafter referred to as the Plan), section I of the Plan includes the measure “Implementation of measures for the construction of rental housing in Free.”

Currently, the administration of the city of Svobodny has determined 2 land plots for the construction of rental housing for public sector employees in the city of Svobodny, work is underway to formulate these land plots. It is planned to allocate budgetary allocations within the framework of the state program “Providing affordable and high-quality housing to the population of the Amur Region” for the development of design estimates.

The planned date for receiving a positive conclusion of the state examination is 12/31/2019.

3. Construction as part of the creation of enterprises in the territories of priority development.

Construction of the Severny microdistrict in the city of Svobodny for gas processing plant employees and their families. The planned commissioning of housing in 2020-2024 will be 167.9 thousand square meters. meters. Construction is planned at the expense of the investor.

4. One of the main measures to stimulate an increase in housing construction is mortgage lending.

Amur Mortgage Agency JSC implements a program for citizens who are managers of maternity capital funds, which allows improving the living conditions of the family.

Moreover, Amur Mortgage Agency JSC filed an application for accreditation with DOM.RF JSC in order to consider the possibility of implementing a program of preferential mortgage lending in the region.

For the construction of a school for 1,500 students, the administration of the Blagoveshchensk district allocated a land area of 30,021 sq.m, cadastral number: 28: 10: 0130002: 2562.

The development of design estimates is planned for 2020, construction for 2021-2022.

The regional government during the period of the application company for the appropriation of the federal budget will prepare a budget application for this object.
4. In many villages of the Amur Region there are no kindergartens. Are there plans for a regional government to address this issue?

In order to fulfill the instructions of the President of the Russian Federation to ensure by 2021 100% accessibility of pre-school education for children aged 2 months to 3 years, the Ministry of Education and Science of the region together with local authorities planned to create additional places by:

1) the development of municipal systems of preschool education:

the use of internal reserves of preschool education (area optimization, re-equipment of premises);

construction (purchase) of kindergartens;

2) the development of social entrepreneurship (the creation of private kindergartens, groups of individual entrepreneurs for the supervision and care of children);

3) development of variable forms (organization of work of short-stay groups, game centers, counseling centers, psychological, pedagogical, methodological and advisory services to parents (legal representatives).

In the framework of the regional project “Promoting the Employment of Women - Creating Preschool Education Conditions for Children Under the Age of Three Years”, the National Project “Demography” in 2019 will create 530 additional places for children under the age of 3 years in municipal educational institutions engaged in educational activities pre-school educational programs and supervision and care, including:

410 places - due to intergovernmental transfers to the budget of the Amur Region “Other intergovernmental transfers provided from the federal budget to the budgets of the constituent entities of the Russian Federation for financial support of activities to create in the constituent entities of the Russian Federation additional places for children aged 2 months to 3 years in educational institutions implementing educational activities for educational programs of preschool education ”;

120 places - within the framework of the implementation of the plan for the comprehensive socio-economic development of Svobodny, approved by order of the Government of the Russian Federation of July 22, 2017 No. 1566-r “On the long-term plan of the comprehensive socio-economic development of the Free Amur Region”.

The project also provides for the creation of additional places by supporting the non-governmental sector of preschool education (2019 - at least 30 places, 2020 - at least 30 places, 2022 - at least 20 places).

In those settlements where the construction of kindergartens is not practical due to the low number of children, and the opening of groups due to the insolvency of parents, stationary and mobile counseling centers will continue to develop.

The regional project ‘Support for Families with Children’ of the National Project ‘Education’ provides for the creation of services for psychological, pedagogical, methodological and advisory assistance to parents of children receiving preschool education in the family.

5. Since 2009, the problem of defrauded investors of the Rossiya firm has not been resolved. The regional government has repeatedly met with an initiative group of contributors. Three governors have already changed, but the issue has not been resolved. Among the deceived investors there are elderly people, people with disabilities and other categories of socially unprotected Amur residents. What is the position on this issue?

By the definition of the Arbitration Court of the Amur Region, bankruptcy proceedings against LLC Russia were completed on November 30, 2015, which was the basis for making a record of the liquidation of the debtor in the unified state register of legal entities.
As of the date of the decision on the completion of bankruptcy proceedings at the expense of the bankruptcy estate, only requirements of billholders on current payments were partially satisfied. The remaining requirements of the bill holders of LLC “Russia” remained unsatisfied.

It should be noted that the requirements of the promissory note holders of LLC Rossiya on the return of invested funds arose due to the non-fulfillment by the latter of civil law obligations on promissory notes transactions, to which the Amur Region represented by its bodies was not.

By virtue of paragraph 2 of Article 142, Article 815 of the Civil Code of the Russian Federation, a bill of exchange is one of the types of securities that satisfies an unconditional obligation of the drawer (promissory note) or another payer indicated on the bill (bill of exchange) to repay the loans received upon maturity cash amounts. A payer on a promissory note is a drawer.

Thus, the solution of this issue does not apply to the expenditure powers of the constituent entity of the Russian Federation.

Article 26 of the Federal Law of 06.10.1999 No. 184-ФЗ “On the General Principles of Organization of Legislative (Representative) and Executive Bodies of State Power of the Subjects of the Russian Federation” determines that state bodies of the constituent entities of the Russian Federation are entitled at the expense of the budget of the constituent entity of the Russian Federation (with the exception of funds transferred from the federal budget for the implementation of targeted expenditures) to carry out the costs of exercising powers in the subjects of the Russian Federation, and akzhe powers in areas of joint jurisdiction in respect of matters other than those specified in paragraph 2 of Article 26, 26 of the Federal Law dated 06.10.1999 number 184-FZ “On general principles of organization of legislative (representative) and executive bodies of state power of subjects of the Russian Federation”

Moreover, the financing of powers provided for by the indicated article of the Federal Law of 06.10.1999 No. 184-ФЗ is not the responsibility of the subject of the Russian Federation, is subject to availability and is not the basis for the allocation of additional funds from the federal budget.

According to Article 83 of the Budget Code of the Russian Federation, an increase in budget allocations for the fulfillment of existing types of expenditure obligations may be carried out if there are appropriate sources of additional revenue to the budget and (or) when budget allocations are reduced for certain items of budget expenditures. Due to the limited capabilities of the regional budget, the presence of a deficit of funds to ensure priority spending, the region is not entitled to accept expenditure obligations unsecured by financial sources.

6. A resident of s. Tygdy Zgeria G.F. with information about possible corruption abuses of the head of the Magdagachinsky district Mamutin N.I. Among the information provided: forest theft of about 15 cubic meters, misappropriation and spending of charitable funds, money theft, incomplete declaration of the property and income of this official, etc. According to Zgeria G.F., he repeatedly addressed these facts, including to the governor of the region. Please provide information on the consideration of this issue and the position of the governor.

In the period from 2012 to 2015, for the state and municipal needs of the administration of the Tygdinsky Village Council, 6 contracts for the sale of forest stands with a volume of 5,943 cubic meters were concluded. m

In 2012, 4 contracts were concluded with IP Malyshav V.V. total volume of the workpiece 2 176 cubic meters. m, (commercial wood - 1,652 cubic meters, wood - 517 cubic meters).

In 2014, 2 contracts were concluded with IP Malyshav V.V. the total volume of the workpiece 3 767 cubic meters. m (commercial wood - 3,515 cubic meters, wood - 252 cubic meters).

In 2013, 2015, no contracts were concluded.
All the received volume was spent for municipal needs of the administration of the Tygda village council and the population of the Tygda village council.

In this connection, the statement Zgerya G.F. about forest spending in the amount of about 15,000 cubic meters. m did not find its confirmation, respectively, is unreasonable.

During the audit of the accounting (financial) statements of the administration of the Tygda village council for the period 2013-2014, no violations were identified, and therefore, the spending of charitable funds was carried out in accordance with the decisions of the Tygda village council of people’s deputies.

In 2017, Mamutin N.I. KAMAZ-4310, which was stolen in June 2003 and is on the federal wanted list, was not indicated in the declaration.

According to the Ministry of Internal Affairs for the Magdagachinsky District of 08/23/2007, this vehicle was deregistered, in connection with which Mamutin N.I. did not consider the vehicle registered as a registered vehicle, therefore did not indicate it in the declaration. On this fact, the Department for the Prevention of Corruption and Other Violations of the Department of State Civil Service and the Prevention of Corruption and Other Violations of the Amur Region from 12/07/2018 to 03/05/2019 conducted an audit, which established that according to the methodological recommendations of the Ministry of Labor and Social Protection of the Russian Federation Mamutina N.I. It belongs to the category of non-essential and does not entail the application of legal liability measures to it.

7. In the Amur Region, as well as in a number of other regions of the Russian Federation, a problem arose with the affected bill holders of Financial Trading Company LLC, who purchased securities from ATB Bank. In a number of regions, the authorities of the subject provide assistance to these persons. Position of the Government of the region on this issue?

Obligations on promissory notes are obligations of a civil law nature, and the procedure for their implementation is governed by civil law.

It follows from paragraph 1 of Article 1 of the Civil Code of the Russian Federation (hereinafter - the Civil Code of the Russian Federation) that civil law is based on the recognition of the equality of participants in the relations regulated by it, and the inadmissibility of arbitrary interference by anyone in private affairs. According to Article 11 of the Civil Code of the Russian Federation, the protection of violated or contested civil rights is carried out in accordance with the jurisdiction of cases established by the procedural legislation, by a court, arbitration court or arbitration court. The protection of civil rights by administrative procedure is carried out only in cases provided by law.

By virtue of the provisions of Article 5 of the Federal Constitutional Law of December 31, 1996 No. 1-FKZ “On the Judicial System of the Russian Federation”, the state authorities of the Amur Region are not entitled to interfere in the activities of the court, including to give a legal assessment of the circumstances of the case.

The Oblast Government interacts with the Amur Oblast branch of the DGU of the Central Bank of the Russian Federation, as well as ATB Bank, in order to monitor and analyze the situation related to the return of funds on purchased bills of exchange by the Financial and Trading Company LLC (hereinafter - FTK).

According to the information provided by ATB Bank, the FTK is currently making phased redemption of bills in accordance with the conditions published on the company’s website, in addition, the FTK, being a person obligated under bills, makes payments and in enforcement proceedings in accordance with accepted and entered into Legal force Judicial decisions. As of January 25, 2019, the company FTK made payments on the basis of repurchase and on writ of execution on 352 promissory notes for a total amount of 230 million rubles. Information on payments made on FTK bills is available on the company’s website. If the FTC refuses to fulfill obligations to pay a bill to protect its interests, billholders can appeal to the court.

In the branch of ATB Bank, you can obtain information on possible further actions for the return of funds, as well as the original bill for further presentation to the notary with the corresponding application as unpaid by the due date.
At the same time, in order to resolve the situation related to the return of funds on FTK bills purchased at ATB, the Bank of Russia has developed an information sheet for billholders, which describes the procedure for returning their funds.

The Board of Directors of the Bank of Russia created the Special Closed Joint Unit Investment Fund (hereinafter referred to as the Fund) under the management of the Management Company of the Banking Consolidation Fund Limited Liability Company (hereinafter - UK FKBS LLC). The fund was created in order to compensate the Bank of Russia for paying billholders by court order.

The approach to reimbursing funds to FTK bills holders has not changed; cash payments are possible only by court order. LLC UK FKBS will redeem promissory notes that are returned to ATB by court order to invalidate the purchase and sale of promissory notes.

Since “ATB” is not a person obligated on FTK bills, ATB has no legal basis to fulfill obligations on FTK bills issued by the FTK in pre-trial procedure. The Bank of Russia recommends that bill holders apply to a court that is authorized to declare transactions involving individuals purchasing FTK bills invalid.

Moreover, if court decisions are made that summarize judicial practice and can be extended to one or another category of billholders, to which ATB is obligated to pay, ATB bank will pay money to these categories of billholders as if they were lawsuits have been filed with the court, as well as pretrial claims at ATB for the repayment of bills.

Payments by court order may be made by the debtor or by force, after which the legal holder of the bill ceases to be the holder of the bill, the bill must be transferred to ATB Bank. In case of non-return of a bill, ATB Bank reserves the right to demand it in a judicial proceeding.

As of February 1, 2019, 196 lawsuits have been filed and are pending with the courts of the Amur Region, containing claims related to contracts of sale of FTK promissory notes.

Judicial decisions on the recognition of contracts of sale of promissory notes and collection of funds from the Bank “ATB” are already being executed, payments to billholders are made, including by force.

So, as of February 5, 2019 (inclusive), ATB Bank was presented with and accepted for execution to recover funds 30 writ of execution in the amount of 56 million rubles.

In addition, we inform you that the issue of returning money on bills was considered at a personal reception on 08/08/2018 by the Deputy Prosecutor General of the Russian Federation Yu.A. Gulyagin with the participation of the branch in the Amur Region of the Dagestan State University of the Central Bank of the Russian Federation, the Department of the Ministry of Internal Affairs in the Amur Region, the Office of the Rospotrebnadzor of the Amur Region, where all the necessary explanations and recommendations were given, which are currently relevant.

8. The Government of the Russian Federation and the regions actively support socially oriented public associations. Representatives of the Amur Writing Organization repeatedly appealed to the Communist Party faction with a request to assist in their work. How is the interaction between the Government of the region and the writing (literary) community of the Amur Region carried out? What types and amounts of budget assistance are provided or planned?

In order to promote and further develop domestic culture in the region and to encourage authors and collectives for works that have received wide public recognition and have become a significant contribution to the artistic culture of the Amur Region, the annual Governor Prize in the field of literature and art in the Amur Region was established in 1994.

The competition in the nomination in the field of literature can be nominated works of both young authors and professional writers, corresponding to the provision on awards in the field of literature and art in the Amur Region, approved by resolution of the Head of the Administration of the Amur Region dated November 25, 1997 No. 570 "On Prizes in the Field literature and art in the Amur Region "(as amended by the resolution of the Governor of the Amur Region dated 02.26.2018 No. 34).
In accordance with the current Russian legislation, state bodies do not deal with issues of the release of works and their replication. Once every 2 years, the Ministry of Culture and National Policy of the region allocates funds GBUK "Amur Regional Scientific Library. N.N. Muravyov-Amursky "for the acquisition of the next literary collection" Amur "for the libraries of the region. From 01.10.2018, the Amur Regional Public Writing Organization, on the basis of a tripartite agreement, provided non-residential premises with an area of 14 sq.m. equipped with furniture for free in the State Public Institution Amur Regional Scientific Library named after N.N. Muravyov-Amursky."

The Ministry of Culture and National Policy of the region, regional libraries are working on covering the activities of Amur writers on the official websites of institutions and official accounts on social networks, and information is also regularly sent to the media.

In order to increase the status of reading, reading activity and improving the quality of reading, developing culture and reading competence of the population of the Amur Region, the Ministry of Culture and National Policy of the region has developed a regional program "Support and development of reading in the Amur Region for 2019-2021". The program provides for the organization of meetings of writers of the Amur region with readers (at least 4 annually), the organization and holding of a seminar for young authors of the Amur region, as well as the promotion of books and informing potential audiences about book novelties, online distribution and delivery.

In the formation of the state task GBUK "Amur Regional Scientific Library. N.N. Muravyov-Amursky ", GBUK "Amur Regional Children's Library "takes into account joint events with the Amur Regional Public Writing Organization in accordance with the prepared action plan (creative presentations, participation of writers in the international festival "Russian-Chinese Culture and Art Fair ", field trips to municipal libraries). In June 2019, as part of the jubilee X international festival "Russian-Chinese fair of culture and art", the International Festival "Reading Coast" will be held.

The program of the event is planned to hold an international literary scientific-practical conference in which creative intelligentsia of Russia and China will take part. The chairman of the writing organization is introduced and invited to this event.

9. At the end of 2018, at the initiative of the Government of the region, an autonomous non-profit organization "Agency for the Development of Civil Society of the Amur Region" was created. From the regional budget funds were directed to this organization. The results of the activities of this organization. What does she do and what has she done?

In accordance with the order of the Government of the Amur Region dated December 5, 2018 No. 180-r, an autonomous non-profit organization "Agency for the Development of Civil Society of the Amur Region" (hereinafter referred to as the Agency) was created, the main purpose of which is to provide services in the field of promoting the development of civil society in the Amur Region.

In the regional budget for 2018, funds are provided for a voluntary property contribution to the Agency in the amount of 10.00 thousand rubles.

Due to the fact that the Agency was registered on December 28, 2018 and on December 29, 2018 (the end of the fiscal year) there were no banking details, funds were not allocated from the regional budget in 2018 to the Agency.

10. Residents of microdistrict No. 1 in the city of Shimanovsk since 2014 have applied to the Government of the region, the governor of the region, the ministry of housing and communal services of the region, the overhaul fund (hereinafter - the fund) with a request to solve the problem with the leaking roof of apartment buildings (No. 9 , 17, 18, 26). The position of the Government of the region on this issue?

The general meeting of the partnership of apartment owners No. 9, 17, 18, 26 of microdistrict No. 1 of the city of Shimanovsk agreed on a major overhaul by replacing the flat roof with a pitched roof.

When performing design and estimate documentation on replacing a pitched roof, an expert opinion is needed on the actual bearing capacity of the house structures with engineering surveys.
In the adopted register (list) of design organizations with whom the foundation has the right to work, there are no organizations that have self-regulatory organizations for engineering surveys.

Replacing a flat roof with a pitched roof is not a major overhaul, but a reconstruction of the object, since it is necessary to issue a town-planning plan for the land plot and a notice for construction.

Based on the foregoing, the fund, together with the administration of the city of Shimanovsk, made the following decisions:

- repair the roof without changing the design;
- owners of apartment buildings to open their own settlement accounts, to which the funds collected by the fund will be returned and to further repair the roof by contracting organizations attracted by the owners.

**Faction "UNITED RUSSIA"**

1. Activities carried out in 2015 by the Ministry of Agriculture of the region, the Government of the region, allowed the region to take part in the Program of renewal of the fleet of vehicles, carried out by Rosagroleasing OJSC. So, the Zeya district was allocated a quota for updating combines in the amount of 4 units of KZS-812-04 Amur-Palesse. Upon receipt of the combines, support was planned from the regional budget, since this type of support was carried out annually. In 2016, funding for this event was not carried out. The inability of the peasant farms to pay leasing payments on their own (without subsidies) has already led to disastrous results. In December 2016, one of the four combines was sold; in 2018, another combine was withdrawn from the head of the peasant farm for debts on lease payments.

We ask you to consider the possibility of financing under the state program "Development of agriculture and regulation of markets for agricultural products, raw materials and food of the Amur Region for 2014 - 2020", approved by the Government of the Amur Region dated September 25, 2013 No. 447, as part of the event "Reimbursement of part of the costs to agricultural producers paying leasing payments for acquired agricultural machinery for agricultural producers of Zeisky district who purchased combines in 2015 year. The required amount for 2016 is 1217 thousand rubles, 2017 1217 thousand rubles, 2018 1217 thousand rubles.

In the absence of financial support for the cheapening of combines, the farmers of the Zeya district will need to return this equipment. The farmers who acquired the equipment in subsequent years receive support from the regional budget, and those who bought the equipment in 2015 were deprived of it. Please consider the possibility of making changes to the state program "Development of agriculture and regulation of markets for agricultural products, raw materials and food of the Amur Region for 2014 - 2020".

In the period from 2012 to 2013, 95% of combine harvesters (219 units produced by the regional machine-building plant JSC "KMPs Kranspetsburmash") were acquired by farmers under leasing agreements with JSC "Rosagroleasing". At the same time, the farmers of the region were compensated for 50% of the costs of paying leasing payments from the regional budget, for which more than 300 million rubles were allocated.

The elimination of the consequences caused by the large-scale flood that took place in the Amur Region in 2013 required the region to attract credit resources, for which payments from the regional budget are currently ongoing. Due to the significant financial burden on the regional budget, since 2014, compensation to farmers for part of leasing payments has not been carried out.

In 2015, combine harvesters were purchased on favorable terms as part of the Agricultural Machinery Park Renovation Program implemented by Rosagroleasing JSC. Preferential terms for their acquisition included a delay of the first lease payment for six months, the absence of an initial lease payment, a small percentage of the cost of equipment.
This year, the Decree of the Government of the region dated 24.04.2014 No. 266, which regulates the rules for granting subsidies to reimburse part of the costs to agricultural producers paying leasing payments for acquired agricultural machinery, was amended in accordance with paragraph 7 of the Protocol of the meeting, chaired by the Chairman of the Government of the Russian Federation Medvedev YES. on the development of agricultural machinery production dated January 18, 2019 No. DM-P9-Zpr. In accordance with this clause, in the current year equipment subject to the requirements of Decree of the Government of the Russian Federation of July 17, 2015 No. 719. having the opinion of the Ministry of Industry and Trade of Russia on its production on the territory of the Russian Federation, is subject to subsidization.

Due to the fact that the Amur-Palesse combine harvesters do not have a conclusion from the Ministry of Industry and Trade of Russia on production in the Russian Federation, it does not seem possible to compensate part of the costs to farmers for paying lease payments.

2. At meetings with the population, many voters ask a question regarding the election system for the heads of rural settlements. Currently, in most village councils of the Amur Region, heads of administrations are selected on a competitive basis. Citizens raise the question of returning the old system of elections for the heads of village councils: popular (direct elections). Is the regional government considering such an opportunity?

In accordance with Federal Law dated 06.10.2003 No. 131-ФЗ "On General Principles of the Organization of Local Self-Government in the Russian Federation", the powers of state authorities of the constituent entities of the Russian Federation in the field of local self-government include:

legal regulation of issues of the organization of local self-government in the constituent entities of the Russian Federation;

legal regulation of the rights, duties and responsibilities of state authorities of the constituent entities of the Russian Federation and their officials in the field of local self-government;

legal regulation of the rights, duties and responsibilities of local governments and local government officials in the subjects of jurisdiction of the constituent entities of the Russian Federation, as well as within the powers of state authorities of constituent entities of the Russian Federation in matters of joint competence of the Russian Federation and constituent entities of the Russian Federation;

legal regulation of the rights, duties and responsibilities of local governments and local government officials in the exercise of certain state powers, which local governments are endowed with the laws of the constituent entities of the Russian Federation.

In addition, in accordance with the Federal Law of 06.10.2003 No. 131-ФЗ "On General Principles of the Organization of Local Self-Government in the Russian Federation" and the Law of the Amur Region dated December 18, 2014 No. 459-OZ "On Certain Issues of Forming Local Self-Government Bodies of Amurskaya Municipalities oblasts "the head of the municipality in accordance with the charter of the municipality is elected at the municipal elections, either by the representative body of the municipality from its composition, or by the representative body of the municipality from the number of candidates represented by the competitive commission according to the results of the competition.

The charter of the municipality and decisions made in the form of legal acts adopted at a local referendum (gathering of citizens) are acts of higher legal force in the system of municipal legal acts, have direct effect and are applied throughout the territory of the municipality.

The adoption of the charter of a municipality and the introduction of amendments and additions to it are in the exclusive competence of the representative body of the municipality.

Thus, the question of changing the form of election of the head of the municipality is the responsibility of the representative body of the municipality.
3. Large investment projects make the main contribution to the development of the regional economy. But we must not forget that without small and medium-sized businesses, the territories will also not be able to develop. Our cities and regions lack an independent “internal” development. Question: what additional conditions and, more importantly, organizational measures on the part of the Oblast Government are taken to support small businesses in the regions and to increase the entrepreneurial activity of Amur residents. How do you feel about the agricultural and industrial cooperation of small and medium-sized enterprises, including those with large businesses, the development of which is a task that can only be solved jointly with the government?

On the territory of the Amur Region, the conditions for entrepreneurial activity are improved annually.

One of the main tasks of the Government of the region is to develop and implement a system of measures and mechanisms to support and develop small and medium-sized enterprises (hereinafter - SMEs) in the region.

Infrastructure facilities have a positive impact on the sphere. In 2018, the following business support infrastructure facilities are operational:

1. Amur Region Investment Promotion Agency, the main function of which is to accompany investment projects from the idea stage to direct implementation.

2. An enterprise support center providing consulting and training services.

3. Export Support Center, the task of which is to facilitate the entry into foreign markets of goods, services and technologies.

4. The Center for Cluster Development, which creates the conditions for effective interaction of cluster members and expands the access of business entities to the procurement of major customers.

In 2019, a microfinance organization and a business incubator will be created.

Much attention is paid to the development of youth entrepreneurship. Amur Business Fair promotes youth involvement in entrepreneurship and an increase in the number of newly created SMEs.

As part of the implementation of the initiatives of the Agency for Strategic Initiatives ANO, in March this year, the “Boiling Point” was opened - a place for joint work of young entrepreneurs, public organizations and government officials.

At the beginning of 2019, the Unified Business and Investment Support Center was created in the Amur Region, which brought together all existing organizations to provide assistance and support to entrepreneurship in the region: SME lending development fund, Investment Promotion Agency, Export Support Center, Enterprise Support Center, Cluster Development Center.

Particular attention is paid to the organization of information and feedback from investors and entrepreneurs. The modernization of the Investment Portal of the Amur Region (hereinafter - the Portal) continues:

an interactive investment map has been developed, on which in a visual form, in relation to the locality, lists of infrastructure facilities being created, investment projects and proposals, as well as a database of vacant premises and production capacities in the region are presented;

online calculator of tax incentives for potential residents of areas of priority development, which allows the investor to calculate the effectiveness of the project when applying the preferential tax regime;

an important additional function was the creation of a service of investment municipal offices, which makes it possible to integrate each municipal entity into the portal. Having visited the Portal, the investor will be able to familiarize himself with the investment potential of each municipality in detail, select the proposed sites, land plots and projects in a specific territory.

The portal works in 3 languages: Russian, English and Chinese.

In 2019, a single Entrepreneurship Support Portal was launched, which will unite all support resources. Currently, there is a filling of the resource.
The regional government is actively working to reduce administrative procedures.

In order to reduce the time for obtaining a building permit in the regional state system “Portal of State and Municipal Services (Functions) of the Amur Region”, interactive links to the official websites of resource-supplying organizations of the region are placed for transferring to personal accounts. This allows you to conclude contracts of connection (technological connection) to the networks of engineering and technical support, electrical networks, including the receipt of technical specifications in electronic form.

In 2018, direct financial support was provided to the business, including:

- reimbursement of part of the costs associated with the acquisition of equipment;
- provision of a subsidy to a leasing company in the amount of shortfall in income arising from the provision of a lump-sum discount to an SME entity when paying an initial payment under a leasing agreement;
- grants to novice entrepreneurs;
- subsidy for the implementation of social projects.

In 2019, subsidies to businesses will be provided through municipal programs aimed at supporting and developing SMEs. For these purposes, due to the funds of the regional budget, 47.0 million rubles are provided.

In addition to financial and advisory support, entrepreneurs are provided with property support. In order to promote business development, lists of state and municipal property have been compiled for leasing to SMEs (including at preferential rental rates).

The composition of the property is constantly replenished, today 750 objects are included. The lists can be found on the websites of the Ministry of Property Relations of the Amur Region (mio.amurobl.ru) and local authorities.

Together with the business, the development of an interactive map of property support for SMEs is being completed, which allows for quick viewing of free real estate objects of any municipality, characteristics, photos of the object and contacts of those responsible.

Starting from 2017, when renting property included in the regional list, SMEs are provided with a discount on rent. In the first year, 20% of the rent is paid, in the second year - 40%, the third - 60%, the fourth - 80%, the fifth - 100%.

Another type of state support for SMEs is the provision of tax benefits.

The provision of tax benefits and preferences is regulated by the laws of the Amur Region:

- dated 04.10.2010 No. 389-OZ “On reduced rates of tax on profit of organizations to be credited to the regional budget, and on investment tax deduction in the territory of the region” - reduction of the tax rate credited to the regional budget to 13.5%;
- dated November 28, 2003 No. 266-OZ “On the tax on property of organizations in the territory of the Amur Region” - exemption from tax;
- dated November 18, 2002 No. 142-OZ “On Transport Tax in the Amur Region” - exemption from tax;
- dated 05.05.2015 No. 528-OZ “On the establishment of a zero tax rate levied in connection with the application of the simplified taxation system for taxpayers - individual entrepreneurs” - tax holidays;
- dated 05.10.2018 No. 251-OZ “On the establishment of tax rates for tax levied in connection with the application of the simplified tax system, depending on the categories of taxpayers” - a reduced rate;
- dated May 13, 2009 No. 201-OZ “On Establishing Additional Grounds and Other Terms for the Deferral or Installment Plan for the Payment of Regional Taxes, Fines and Fines and Other Grounds and Conditions for the Provision of an Investment Tax Credit” - the right of a taxpayer to change the deadline for paying tax;
4. According to the information of the Ministry of Economic Development and External Relations of the Amur Region on the results of the implementation of the activities of the program “Spiritual, Cultural and Economic Development of the Village of Albazino”, as well as the activities of state programs of the Amur Region aimed at the socio-economic development of the village, there has been no planned since 2016 financing from the federal and regional budgets of the main program activities.

Is there any plan to return to financing the above activities in 2019?

And will the implementation of the program “Spiritual, cultural and economic development of the village of Albazino” continue in 2019?

The program “Spiritual, cultural and economic development of the village of Albazino” is a set of measures implemented within the framework of state programs of the Amur Region, and organizational measures that do not require funding.

The results of the Program implementation for previous periods and events planned for 2019 are presented in the table.

5. To be able to work in the city, many young parents living in villages where there are no kindergartens are forced to take their children to urban pre-school educational organizations from the countryside. Such a situation, in particular, is observed in some settlements of the Svetodensky district. At the same time, the capacities of many district culture houses allow placing at least one group of different ages there. It is clear that all such groups should work subject to the observance of all necessary sanitary rules and norms, but it may make sense to consider the possibility of opening such groups on the basis of cultural houses? After all, the solution to the problem of providing children with places in preschool institutions is necessary from a social, economic and demographic point of view.

Preschool institutions of the city of Svetodny are visited by 10 children living in rural areas (the village of Beloyarovo - 1, the village of Podgornyi (suburb) - 2, the village of Bardagon - 3, the village of Novo-Ivanovka - 4).

Parents of these children work in the city and take their children to kindergartens in Svetodny.

The placement of a group for the care and supervision of preschool children on the basis of a cultural institution is possible subject to the requirements of SanPin 2.4.1.3049-13 "Sanitary and epidemiological requirements for the design, maintenance and organization of the work mode of preschool educational institutions" and SP 118.13330.2012 "Public buildings and facilities."

Bringing the premises of the houses of culture in accordance with the requirements of these regulatory documents involves the reconstruction of buildings. Reconstruction work can only be carried out after an engineering survey of buildings is carried out, on the basis of which design and estimate documentation will be developed. After development of the design and estimate documentation, it is necessary to obtain a positive conclusion of the state examination and a building permit (reconstruction). Significant financial costs are required to carry out these activities.

Carrying out all measures to bring the premises of the houses of culture in accordance with the requirements of SanPin for placement of preschool groups is not economically feasible.
