Company

Renuka do Brasil is one of the 10 largest sugar/ethanol producing groups in Brazil, in business for more than 30 years. In the middle of 2010, Shree Renuka Sugars Limited acquired the controlling stake of the company.

The installed milling capacity is of 10.5 million tons divided between Mill Madhu, in Promissao, and Mill Revati, in Brejo Alegre, both cities located in the state of Sao Paulo, the largest sugarcane producing region in the world.

Among its principal products are: sugar, ethanol, bioelectricity, and yeast. Renuka do Brasil has an amply integrated structure, controlling not just all the industrial processes, but also all the agricultural processes, such as planting, cultivation, harvesting, and cane transport.
