Sugar

► **White/Refined Sugar -**

White sugar is sugar which has been refined and washed so that it has a white appearance and no molasses flavour. It contains 99.9% sucrose.

It is normally consumed in households and being relatively neutral in flavour, it is used as an ingredient in various edible processed foods and beverages.

► **VHP (Very High Polarised) Sugar -**

It is a type of raw sugar, manufactured mainly in Brazil, which is classified as a chemical product which is easy to transport and need further refining before it can be used for consumption. In recent years, VHP sugar (raw sugar) has been a standard sugar category traded on the international market.
