

TABAKOTO MINE

Following the acquisition of Tabakoto in 2012, the Segala open pit mine was converted into an underground mine, the Kofi C open pit mine was commissioned in Q1 2015, and in 2013, the mill's capacity was expanded from 2,000 to 4,000 tonnes per day. Endeavour continues to focus on optimizing operations and reducing costs.

EXPLORATION POTENTIAL

Tabakoto is a top exploration priority in 2017 given its relatively short mine life and significant potential. As such, a \$9 million exploration program totaling approximately 72,000 meters of drilling has been planned for 2017. The program will focus on both surface exploration, with the aim of delineating resources within trucking distance at discoveries made in 2016 and on new targets, and underground drilling.
