### Overview

Agri Sul is an agricultural holding company in Mozambique. The company focuses on the commercial production of sugar cane baby corn and chillies with sugar cane as their main cash crop. Currently most of their operation consists of a 800 hectares core farm but the ambition for the future is to expand this to 1500 hectares and start a large outgrower program for neighboring small scale farmers. Eventually they want to have 3 hectares of outgrowers for each hectare of their own farm. They hope that their farm can contribute to the revitalization of a once affluent farming and agri business area.
